

Pearls in Contraceptive Counseling: Prioritizing Patient Values and Comfort in Reproductive Care

Komal Soin, MD, MPH, FFAFP

Associate Professor
Director of Maternal Child Health and Women's Health
John A. Burns School of Medicine
Honolulu, HI

1

Disclosure

I have no financial interests or relationships
to disclose.

2

Learning Objectives

- 1 Reframe counseling to prioritize patient values
- 2 Describe evidence-based natural family planning methods and summarize digital technologies
- 3 Review recent advancements in contraceptive methods and technologies
- 4 Review contraceptive methods and management in medically complex patients.
- 5 Discuss strategies to reduce discomfort and manage side effects

3

Your Role in Contraceptive Care

Poll Question: Which Statement Best Reflects Your Current Role in Contraceptive Care? Select the One That Best Applies:

Full-Spectrum Provider

Including all procedures and complex family planning.

Implant & Short Term Methods

Focuses on implants, pills, patches, and emergency contraception.

Prescribing Comfort

Comfortable with prescribing all methods, but no procedures.

Discussion & Referral

Engages in discussion but refers out for prescriptions and procedures.

4

Let's Start with You

What's the one question or topic about contraception or family planning that you feel least confident addressing?

Take a moment to reflect and share

5

The Patient-Centered Approach

6

A Paradigm Shift in Contraceptive Counseling

From:

"What method should
I recommend?"

To:

"What are your goals
and concerns?"

**Understand your
biases**

**Same day access and
removal**

7

Method Selection Journey

*Exploring Contraceptive
Options Together*

8

Natural Family Planning

Calendar Method

Basal Body Temperature (BBT)

Cervical Mucus Method

Withdrawal Method

9

What Are Your Patients Using for Natural Family Planning?

Fertility Tracking Apps

Natural Cycles, Kindara, Cervitudo, Euki, Flo, Ovia, etc

Log BBT, cervical mucus, and cycle dates

Wearable Devices

Oura Ring, Femometer ring, Tempdrop, Ava bracelet

Collect physiological data for enhanced, passive tracking

Ovulation Predictor Kits

Home urine tests: Detect the LH surge

Mira fertility tracker: measures 4 hormone levels.

10

Guided by its core values and mission, the Commission generally conducts research and provides data, information and research that are accurate, reliable and useful to the government.

Medical Eligibility for Initiating Contraception:

Absolute and Relative Contraindications

For women using oral contraceptives (OCs), medical eligibility for contraceptive use and the WHO criteria for Recommendations for Contraceptive Use. WHO criteria for Recommendations for Contraceptive Use.

Condition	Qualifier for condition	Contraceptive preference WHO category	Progestin- only OCs	Progestin- only injection	Progestin- only implant	Progestin- only intrauterine device	Copper IUD

USMEC 4-Tier System

1: No restriction | 2: Benefits outweigh risks
3: Risks outweigh benefits | 4: Unacceptable risk

Key Scenarios

- Migraines with aura: CHCs = Category 4
- Hypertension: CHCs = Category 3-4
- VTE history: CHCs = Category 4

Build Confidence with Guidelines

- USMEC
- CDC

Collaborate with Specialists

- Complex FP
- Ob/Gyn
- Adolescent Health

Trust Your Capabilities

Updates in Contraception: What's New?

Opill: 1st OTC pill in the United States

LARCs: Extended Use & Improved Design

Levonorgestrel IUD: 8 years.

Implant: 5 years

Copper IUD: 12 years, improved design

Newer Formulations

Drospirenone POP (Slynd)

Lower hormone options

SQ Depo, non-hormonal gels (Phexxi)

13

Short Acting Hormonal Methods

Oral Contraceptives, Patches, & Rings

Combined vs. progestin-only

Medroxyprogesterone

Subcutaneous vs Intramuscular route

14

Choosing Your Pill: Estrogen vs. Progestin

Estrogen

- Stabilizes Endometrial Lining
- Regulates Cycle
- Prevents LH surge & Inhibits Ovulation

Progestin

- Thickens Cervical Mucus
- Suppresses LH
- May Inhibit Ovulation

15

Progestin-Only Pills (POPs)

Mechanism of Action

Ideal Candidates

Common Side Effects

- * **Ortho Micronor: Norethindrone, "mini pill"**
- * **Slynd: Drospirenone**
- * **Opill OTC: Norgestrel**

16

How to Choose a Combined Pill

Estrogen Dose Selection

Low (20-25 mcg), Medium (30-35 mcg), High (50 mcg)

Progestin Androgenicity Assessment

Consider patient's acne and hirsutism history

Monophasic vs Multiphasic options

Prefer monophasic for consistent hormone levels and ease of use

Great App: [Contraception Point of Care](#)

17

Other Short-Acting Hormonal Methods

The Patch

- Xulane, Twirla
- Weekly application
- BMI <30 kg/m²

The Ring

- NuvaRing, EnilloRing
- Annovera
- Monthly use

Depo-Provera (DMPA)

- Every 3 months
- SubQ & IM formulations

18

Long-Acting Reversible Contraceptives (LARCS)

Types

- Hormonal IUDs
- Copper IUD
- Subdermal implant

Benefits

- Highest effectiveness rates
- Extended duration
- "Set and forget" convenience

19

Emergency Contraception: Understanding Your Options

WHAT IS EMERGENCY CONTRACEPTION (EC)?

EC is birth control to use after sex to prevent pregnancy.

Types of EC	When can I use EC?	How do I get EC?	What about next time?
Over-the-counter EC pills	ASAP works best within 3 days but may work up to 5 days May be less effective over 165 pounds.	No prescription needed Find it at a pharmacy, clinic, or online.	Take it every time you need EC You can get extra EC for next time.
Prescription EC pills	ASAP but can work up to 5 days Most effective EC pill. May be less effective over 195 pounds.	Need a prescription Talk to a health care provider online or in person.	Take it every time you need EC Ask about a refill so you can have it for next time.
IUDs	Anytime up to 5 days Nearly 100% effective for any weight.	Visit a health care provider to have an IUD placed Say it's for EC so you are scheduled quickly.	Keeps working as birth control You can have it removed at any time.

20

Implementation & Procedures

From Selection to Safe Practice

21

Reducing Discomfort

1 Open Body Language

2 Offer Pain Management

3 Discuss Pain Proactively

Don't minimize pain. Validate patient experiences.

22

Pain Management Options

Pharmacological

- Pre-procedure NSAIDs
- Lidocaine cream and spray
- Paracervical, Intracervical lidocaine
- Anxiolytics, IV sedation when indicated

Non-Pharmacological

- Heating pads
- Music, verbicaine, ultrasound
- Breathing techniques
- Support person present

23

Managing Difficult IUD Insertions

Thorough Assessment & Preparation

- Consider Anatomy
- Speculum Choice
- Type of IUD and size

Optimizing Technique & Tools

- Tenaculum and traction
- Os finders and dilators
- Ultrasound guided
- Pain Control

Other Considerations

- Postpartum and breastfeeding
- Testosterone
- Misoprostol

24

Managing Difficult IUD Removals

Strings not visualized

- Cytobrush
- IUD hook
- Endocervical speculum

Imaging

- Ultrasound
- X Ray Abdomen/Pelvis

25

Managing Difficult IUD Removals

Attempt to retrieve IUD with instrumentation

When to Refer

- Repeated unsuccessful attempts
- Suspected embedded or fragmented IUD
- Need for hysteroscopic removal

26

Managing Side Effects

OCPs (pills)

Estrogen:

- Nausea
- Bloating/edema
- Irregular bleeding
- Mood changes

Progesterone:

- Acne, hirsutism
- Weight gain
- Mood changes

Implant

- Irregular bleeding
- Weight changes
- Mood effects

Intrauterine Device (IUD)

- Cramping
- Irregular bleeding
- Expulsion signs

DMPA (Depo-Provera)

- Irregular bleeding
- Weight gain
- Bone density
- Delayed return to fertility

27

Interactive Case Study

A 35-year-old patient who vapes and has well-controlled hypertension on amlodipine wants to start an oral contraceptive.

What is your initial clinical recommendation, and why?

28

Digital Health & Resources

Building Expertise and Support Networks

29

Digital Health in Contraception

Key Considerations

- FDA-cleared apps vs. period trackers
- "Perfect use" vs. "typical use" rates
- Data privacy concerns
- Cost accessibility

30

When to Refer to a Specialist

Complex Medical Conditions

Persistent Complications/Failed Procedures

Unusual Anatomy or History

31
