

Oct. 7, 2026

Dear Homeschooling Parents,

The English Montreal School Board is pleased to offer Grade 10 homeschoolers the opportunity to participate in **Science Laboratory Preparation Sessions** throughout the academic year.

These **optional** sessions are designed to provide homeschoolers with valuable hands-on experience in a school science laboratory setting. Through regular attendance and active participation, homeschoolers will have the opportunity to:

- Become familiar with the science laboratory environment and laboratory procedures;
- Develop confidence in using laboratory equipment and materials;
- Practice important laboratory techniques and scientific skills;
- Gain experience following experimental procedures, recording observations, and analyzing results; and
- Become more familiar with the expectations and format of the end-of-year Science & Technology Laboratory Examination.

Data has shown that homeschoolers who have attended practice labs have been more successful on the end of year lab exam.

All sessions will take place at Laurier Macdonald High School (7355 boul. Viau, Saint-Léonard, QC H1S 3C2) as follows:

November 9, 2026 3:45-5:45	Introduction to Chemistry - Volume, mass, density, pH (acids and bases) - How to write a lab report
December 7, 2026 3:45-5:30	Introduction to Electricity and Magnetism - Building electrical circuits - Learning to take measurements (amperage, voltage, resistance)
April 1, 2027 3:30-5:30	Introduction to Technology - Learning to use tools to analyze, design and construct technical objects
By appointment: homeschool@emsb.qc.ca	Concentration - Learning to make concentrated and diluted solutions

Homeschoolers who choose to participate are expected to attend regularly and actively engage in laboratory activities. If one or more of these dates is not convenient for you, you are encouraged to reschedule a visit through our office.

Please submit your registration for the Grade 10 Science Laboratory Preparation Sessions before October 28th: <https://forms.gle/jwZHhkuLfTDUy21V7>

We look forward to welcoming Grade 10 homeschoolers to these science laboratory sessions and supporting them in developing their practical science skills.

Thank you,
EMSB Homeschooling Office
