

AIM HIGH PROGRAM 2025-2026

Course Outline

Teacher: Mr. Michalopoulos

Subject: Mathematics – AIM HIGH

Overview:

All students are working on an Individual Education Plan and the course is designed with flexibility to alter lessons and assignments to help students achieve their goals. The curriculum is modified according to the needs of each student.

Students are usually given a printout of note and a copy is made available on Google Classroom. Student work is usually done individually with occasional small group or partner work in the latter part of the lesson. Students are encouraged to work with each other on problem solving processes and strategies. Students have regular access to assistive technology when necessary. Students will be expected to complete homework once or twice a week.

Course content:

Topics covered may include:

- Arithmetic and Problem Solving
- Integers
- Cartesian plane
- Geometry
- Fractions/Decimals/Percentages
- Introduction to Algebra

Evaluations:

Students will be given a variety of tests, quizzes, and in class assignments to gauge their progress and mastery of the different topics. Students will also be given more detailed situational problems during the term and during formal evaluations. Students will be provided with lots of extra time and the assistive technology they need.
