

Course Outline

Teacher: Ms. Lau

zlau@emsb.qc.ca

Subject: Math

These WOTP students will further their knowledge of math concepts with a particular emphasis on math utilized within the workplace environment. The students will have access to calculators. The emphasis will be on how to use the tools necessary to find the solutions to daily, real-life situations.

Students will be given math worksheets and problem- solving strategies to help them further develop their problem solving and math skills. Students will have access to assistive technology and will be expected to complete their assignments in a timely manner.

Course content:

1. Place Value
2. Addition, Subtraction, Multiplication, Division
3. Decimals and Fractions
4. Percentages and Tax
5. Money and Budgeting
6. Problem- Solving (short word problems)

Evaluations:

Quizzes, tests and class assignments will be used to assess the students' understanding of the Math topics required to complement their work placements in the WOTP program.
