

## COURSE STANDARDS AND PROCEDURES

### **COURSE:**

Secondary 1 Science & Technology, 555-104

**CLASS RESOURCES:** Worlds workbook and online exercises, Explore Learning

### **COURSE DESCRIPTION:**

Secondary 1 Science and Technology is an introduction to the scientific aspects of life. The main focus of this course is to build a base for the foundation of science and its implications in our lives. The course involves hands-on labs, virtual labs for individual practice as well as theoretical components. Students will also become familiar with standard laboratory practices and be encouraged to apply theoretical concepts in a practical way through lab work.

Students will understand that science is a process as well as a body of knowledge. Students explore the design cycle (investigation, design, planning, creation and evaluation).

### **MYP AIMS ADDRESSED BY THE COURSE:**

MYP Course Aims	MEQ Course Objectives
Develops skills to design and perform investigations, evaluate evidence, and reach conclusions.	Competency 1: Seeks answers or solutions to scientific or technological problems.
Cultivate analytical inquiry and flexible minds that pose questions, solves problems, construct explanations, and judge arguments.	Competency 2: Makes the most of his/her knowledge of science and technology.

### **FUNDAMENTAL IB CONCEPTS:**

- Communication: Students will conduct labs and complete hands-on activities and assignments in which they will have to use the appropriate scientific language.

**KEY INSTRUCTIONAL STRATEGIES/APPROACHES TO LEARNING:** - The ATLs that will be focused on is critical thinking. Students will analyze and evaluate issues and ideas by gathering and organizing relevant information to formulate an argument and interpret data to draw reasonable conclusions and generalizations. This will be achieved by incorporating various inquiry-based activities throughout the year.

**IB MYP LEARNER PROFILE:-**

- Knowledgeable: During the inquiry-based activities, students will be asked to use their previous knowledge of different scientific concepts in order to solve a new problem.
- Inquirers: Students will develop their skills for inquiry.
