

The Facts About Prescription Drugs and Medicaid in New Mexico

Medicaid provides health care coverage to low-income, aged, and disabled individuals and families. Over one-in-five Americans are covered by Medicaid¹. Without Medicaid, millions of Americans would not have access to necessary health care services, including prescription medicines. All 50 states and the District of Columbia elect to cover prescription drugs as a benefit under the Medicaid Drug Rebate Program (MDRP)². The MDRP is a federal-state-drug manufacturer program that provides significant rebates to Medicaid programs that offset the costs of prescription drugs while ensuring patients can access needed medicines.

Breakdown of FFY 2024 Medicaid Spending in New Mexico³

Only 4% of the total Medicaid spending in New Mexico is spent on retail brand and generic prescription drugs

Nursing, Rehabilitation Services / Home Healthcare, Personal Assistance & Waiver Programs	Administrative
Hospital Care	Brand Rx
Professional Services	Generic Rx
Other Health and Durable Medical Equipment	Mental Health Facilities

Manufacturers rebate \$264 million back to New Mexico and the federal government, which is 46% of the total Medicaid spending on drugs in the state.⁴

\$8B was spent on Medicaid in New Mexico During FFY 2024⁵

34% of New Mexicans were covered by Medicaid in 2024.⁶

Medicaid fills gaps in coverage for those disproportionately impacted by chronic conditions, like asthma and diabetes.⁷

Medicines are an important tool for controlling Medicaid costs.⁸

- Reducing access to drugs can lead to higher acute care utilization and costs.
- Denials in 6 medication classes were associated with net total medical spending increases.
