Independent Auditors' Report

(Free translation from Spanish language original)

The Board of Directors and Stockholders Grupo Financiero Scotiabank Inverlat, S. A. de C. V. Sociedad Controladora Filial:

We have examined the accompanying consolidated balance sheets of Grupo Financiero Scotiabank Inverlat, S. A. de C. V. and Subsidiaries ("the Group") as of December 31, 2006 and 2005 and the related consolidated statements of income, stockholders' equity and changes in financial position for the years then ended. These consolidated financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Mexico. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and are prepared in accordance with the accounting criteria for financial group holding companies in Mexico. An audit consists of examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting criteria used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As explained in note 2 to the consolidated financial statements, the Group is required to prepare and present its consolidated financial statements in accordance with the accounting criteria established by the National Banking and Securities Commission ("the Banking Commission") for financial group holding companies in Mexico, which in general conform to Mexican Financial Reporting Standards issued by the Mexican Board for Research and Development of Financial Reporting Standards (Consejo Mexicano para la Investigación y Desarrollo de Normas de Información Financiera or CINIF). These accounting criteria include particular rules, which in certain respects differ from such standards.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Grupo Financiero Scotiabank Inverlat, S. A. de C. V. and Subsidiaries as of December 31, 2006 and 2005, and the results of their operations, the changes in their stockholders' equity and the changes in their financial position for the years then ended, in conformity with the accounting criteria established by the Banking Commission for financial group holding companies in Mexico, as described in note 2 to the consolidated financial statements.

KPMG CARDENAS DOSAL, S. C.

Alejandro De Alba Mora

Notes to Consolidated Financial Statements

December 31, 2006 and 2005

(Millions of constant Mexican pesos as of December 31, 2006)

These consolidated financial statements have been translated from the Spanish language original solely for the convenience of foreign/English-speaking readers.

(1) Description of business and significant transactions-

Description of business-

Grupo Financiero Scotiabank Inverlat, S. A. de C. V. ("the Holding Company") is a subsidiary of The Bank of Nova Scotia (BNS), which owns 97.3% of its capital stock; it is authorized to buy and administer the voting stock issued by financial and brokerage entities, auxiliary credit organizations, and other entities primarily engaged in providing complementary or auxiliary services to one or more of such financial entities.

At December 31, 2006 and 2005, the Holding Company and its subsidiaries (the Group) includes Scotiabank Inverlat, S. A., Institución de Banca Múltiple, Grupo Financiero Scotiabank Inverlat (the Bank), a multiple service banking institution which, among other activities, accepts deposits from the general public, grants and receives loans, engages in securities transactions and provides trust services; Scotia Inverlat Casa de Bolsa, S. A. de C. V. Grupo Financiero Scotiabank Inverlat (the Brokerage Firm), which acts as intermediary in securities and financial transactions; and Scotia Fondos, S. A. de C. V., Sociedad Operadora de Sociedades de Inversión, Grupo Financiero Scotiabank Inverlat (the Mutual Fund Management Company), which acts as a mutual fund management company in conformity with applicable laws; and, from June 2006 Scotia Afore, S. A. de C. V. (the Afore, which commenced operations in November 2006) which was incorporated for the purpose of managing and operating retirement funds in terms of the applicable laws and general provisions issued by the National Commission for the Retirement Savings System (Comisión Nacional del Sistema de Ahorro para el Retiro or CONSAR).

Significant transactions-

On April 11, 2006, the Bank acquired consumer (automobile) loans from a Limited Purpose Financial Company (SOFOL) for an agreed-upon price made up of two portions: the first fixed portion of \$3,076 (nominal) paid on the acquisition date and a second portion consisting of a determinable amount that may not exceed \$360 (nominal) (see note 9c).

On December 7, 2006 and as a result of the sale of securities previously placed in trust, the Brokerage Firm recognized in its statement of income: revenues for \$31, which is shown under "Other income", and a security deposit and accrual for \$8 and \$1, respectively. Both the security deposit and the accrual are subject to being returned to the purchaser pursuant to certain specific purchase/sale agreement clauses, which expire on December 7, 2007. In addition, the transaction was subject to income tax of \$7 to be withheld on credit revenues, which the Brokerage Firm absorbed and recognized in income under "Other expense".

On June 30, 2005 the Bank announced a program for issuing revolving banking debt certificates for a total authorized amount of \$5,000, which was increased to \$10,000 on May 23, 2006. The program will be effective for 48 months following the authorization date. As of December 31, 2006 and 2005, certificates worth \$4,200 and \$2,292, respectively, had been placed (see note 13).

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

At the Stockholders' Meeting held on April 22, 2005 a resolution was passed to merge Lepidus, S. A. de C. V. (Lepidus, an entity incorporated on the aforementioned date, through the spin-off of assets of Scotia Inverlat Casa de Bolsa, S. A. de C. V.), with the Bank (surviving entity). As a result of the merger, the Bank's capital stock, prior years' results of operations and the statutory reserve increased by \$184, \$177 and \$10, respectively.

(2) Summary of significant accounting policies-

(a) Financial statement presentation and disclosure-

On February 16, 2007 the indicated officers authorized the accompanying consolidated financial statements.

The accompanying consolidated financial statements have been prepared, based on the applicable banking legislation, in conformity with the accounting criteria for financial group holding companies in Mexico, established by the National Banking and Securities Commission ("the Banking Commission"). The Banking Commission is responsible for the inspection and supervision of financial group holding companies and for reviewing their financial information.

The accompanying consolidated financial statements include the financial statements of the Holding Company, the Bank, the Brokerage Firm, the Mutual Fund Management Company and, beginning in 2006, the Afore. All significant intercompany transactions and balances have been eliminated in consolidation.

The consolidated financial statements also include the financial statements of the Bank's UDI Trusts (restructured loan portfolio), created for the purpose of managing restructured loans through Federal Government support programs (see note 9f), where the Bank acts as grantor and trustee and the Mexican Government is the trust beneficiary. The trusts have been valued and presented in conformity with the accounting rules prescribed by the Banking Commission.

In general, the accounting criteria established by the Banking Commission conform to Mexican Financial Reporting Standards (FRS) issued by the Mexican Board for Research and Development of Financial Reporting Standards (CINIF, see note 23), and include particular rules relating to accounting, valuation, presentation and disclosure, which depart from such standards — see paragraphs b, d, e and ℓ of this note.

For cases not contemplated therein, the accounting criteria include a process which provides for the supplementary use of other accounting principles and standards, in the following order: FRS; International Financial Reporting Standards issued by the International Accounting Standards Board; accounting principles generally accepted in the United States of America (US GAAP); or in cases not covered by these principles and standards, any other formal and recognized accounting standard that does not contravene the general criteria of the Banking Commission.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006, except value of the UDI)

The accompanying consolidated financial statements are expressed in millions of Mexican pesos of constant purchasing power, using the Investment Unit (UDI) value. The UDI is a unit of measurement whose value is determined by the Banco de México (the Central Bank) based on inflation. UDI values used at December 31, were as follows:

December 31,	<u>UDI</u>	Annual inflation		
2006	\$ 3.7889	4.16%		
2005	3.6375	2.91%		
2004	3.5347	5.45%		

For purposes of disclosure in the notes to the consolidated financial statements, pesos or "\$" refers to Mexican pesos, and when reference is made to "dollars" or "USD", it means dollars of the United States of America.

Assets and liabilities related to the purchase and sale of foreign currencies, investment in securities, securities repurchase/resell agreements and derivative financial instruments are recognized in the consolidated financial statements on the day the transactions are entered into, regardless of the settlement date.

The preparation of the consolidated financial statements requires management to make a number of estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

The 2005 memorandum accounts of the consolidated balance sheet and the consolidated statement of changes in financial position include certain reclassifications to conform to the classifications used in 2006.

(b) Cash and cash equivalents-

Cash and cash equivalents consist of cash on hand, precious metals (coins), deposits with banks, 24 and 48-hour foreign currency purchase and sale transactions, margin accounts related to standardized futures and options contract transactions made on the Mexican Derivatives Exchange, bank loans with original maturities of up to three days ("Call Money") and deposits with the Central Bank, which include the statutory monetary deposits that, in conformity with the Law, are maintained in order to regulate the liquidity in the financial markets; such deposits have no maturity and bear interest at the average bank funding rate. In conformity with Bulletin C-10 of FRS, beginning January 1, 2005, the aforementioned margin accounts would be reported under "Transactions with derivative financial instruments".

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The receivables associated with 24 and 48-hour foreign currency sales are recorded in "Other accounts receivable", while the obligations arising from such foreign currency purchases are recorded in "Sundry creditors and other accounts payable".

(c) Investment securities-

Investment securities consist of equities, government securities and bank promissory notes, listed and unlisted, classified into three categories according to management's investment intentions, as follows:

Trading securities-

Trading securities are bought and held principally to be sold in the near term. Debt securities are initially recorded at cost and subsequently marked to market using information provided by an independent price vendor. When a fair and representative market value cannot be determined, the most recent fair value is used or otherwise the security is carried at cost plus accrued interest.

Equity securities are valued at the lower of information provided by an independent price vendor, by applying the equity method, or, as an exception, at cost restated for inflation using UDI factors, or estimated net realizable value. Valuation adjustments are reflected in results of operations.

On value date transactions, where the amount of trading securities is insufficient to cover the amount of securities deliverable in the securities purchase and sale transactions, the credit balance is shown as a liability under "Assigned securities pending settlement".

All rights and obligations arising from 24 and 48-hour securities sales and purchases, respectively, (value date transactions), are recorded in "Other accounts receivable" and "Sundry creditors and other accounts payable", respectively. Securities receivable and deliverable under such transactions are reported in "Investment securities" and marked to market.

Available-for-sale securities-

Securities not classified as trading, but which are not intended to be held to maturity. Available-for-sale securities are initially recorded at cost and valued in the same manner as trading securities, except that the mark-to-market adjustments net of deferred taxes are reported in stockholders' equity under "Unrealized gain (loss) from valuation of available-for-sale securities", which upon sale, are cancelled in order to recognize in income the difference between the net realizable value and the acquisition cost. If there is pervasive evidence that a security represents a high credit risk and/or the estimated value has decreased, the book value is written down through a charge to operations.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Held-to-maturity securities-

Held-to-maturity securities are debt securities that the Group has the intent to hold until maturity, and which have defined payments and maturity of more than 90 days. Held-to-maturity securities are recorded at acquisition cost and interest is recognized in income as earned.

Transfers between categories-

Transfers between categories, except transfers to trading securities category, and held-to-maturity securities to available-for-sale category, require express authorization from the Banking Commission. Any unrealized gain or loss from valuation of available-for-sale securities is cancelled and recognized in income upon transferring available-for-sale securities to the trading category. For transfers of available-for-sale securities to the held-to-maturity category, any unrealized gain or loss from the valuation of available-for-sale securities is amortized to income over the remaining term of the instrument.

(d) Securities under repurchase/resell agreements-

Securities under repurchase/resell agreements are stated at fair value using information provided by an independent price vendor, and the obligations or rights from the commitment to repurchase or to resell are stated at their net present value at maturity. The net assets and liabilities are reported in the consolidated balance sheet after individually offsetting the restated values of the securities receivable or deliverable and the repurchase/resell agreement commitment of each transaction. The repurchase/resell agreements where the Group is the repurchasing and reselling party with the same entity cannot be offset. The repurchase/resell agreement presentation differs from FRS, which require reporting balances separately and offsetting only similar transactions with the same counterparty. Interest and premiums are reported in the results of operations under "Interest income" and "Interest expense", while both realized and unrealized gains or losses from these transactions are reported under "Financial intermediation income, net".

In conformity with Circular 1/2003 issued by the Central Bank, the parties to repurchase/resell agreements maturing in more than three days are required to contractually secure such transactions in the event of fluctuations in value resulting in an increase in the net exposure that exceeds the maximum amount agreed upon by the parties. The guarantees granted (without transfer of title) are recorded in the securities portfolio as restricted or pledged trading securities, or in other restricted cash equivalents if granted in cash deposits. Guarantees received not representing a transfer of title are recorded in memorandum accounts as assets in custody or under management. Such guarantees are valued in conformity with the current rules for investment securities, cash equivalents and assets in custody or under management, respectively.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Securities under repurchase/resell agreements that cannot be renegotiated are reported as secured borrowing or lending transactions. Premiums are recognized in income as earned using the straight-line method over the term of the transaction.

(e) Transactions with derivative financial instruments-

Transactions with derivative financial instruments comprise those carried out for trading or hedging purposes, the accounting treatment of which is described below:

Futures and forward contracts – The net market value of the future price of the contracts is presented in the consolidated balance sheet with a corresponding charge or credit to results of operations, except in the case of transactions designated as hedges where gains or losses are recorded as deferred credits or debits, and are amortized using the straight-line method over the term of the contract, and are reported together with the primary position.

Swaps – Rights or obligations arising from the exchange of cash flows or asset yields (swaps) are recorded as assets or liabilities. The assets and liabilities derived from the swaps for trading purposes are marked to market, reporting the net value of the swap on the consolidated balance sheet, while the related gains or losses are recognized in income, except in the case of interest rate swaps designated as hedges where gains or losses are recorded as deferred credits or debits, and amortized using the straight-line method over the term of the contract, and are reported together with the primary position.

Options – Put and call option obligations (premiums collected) and rights (premiums paid) are recorded at the contract value and marked to market, recognizing relevant gains or losses in results of operations. Premiums collected or paid are recognized in "Financial intermediation income, net" when the option expires.

The abovementioned policies depart from Bulletin C-10 of FRS, which provides that derivative financial instruments are to be recognized at fair value without taking in to consideration management's intentions. Changes in fair value of trading derivative financial instruments are recognized in the income statement in integral cost of financing, whereas those related to hedges are recognized in the same caption of the income statement in which the valuation result of the primary position is recognized or in other comprehensive income.

(f) Clearing accounts-

Amounts receivable or payable for investment securities, securities repurchase/resell agreements, securities loans and/or derivative financial instruments which have expired but have not been settled at the balance sheet date, as well as the amounts receivable or payable for purchase or sale of foreign currencies which are not for immediate settlement or those with a same day value date, are recorded in clearing accounts.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The debit and credit balances of clearing accounts resulting from the purchase or sale of foreign currencies may be offset providing a contractual right to offset exists, and it is the intention to settle on a net basis, or realize the asset and settle the liability simultaneously. Assets and liabilities of similar transactions or arising from the same contract may also be offset, provided that they have the same maturity and are settled simultaneously.

(g) Past due loans and interest-

Outstanding loans and interest balances are classified as past due according to the following criteria:

Commercial loans with one principal amortization and interest payment - 30 or more days after due date.

Commercial installment loans - 90 or more days after the first unpaid installment of principal and interest, or 30 or more days in the case of principal.

Commercial loans with one principal amortization and periodic interest payments - 30 or more days after due date in the case of the principal payment and 90 or more days after due date in the case of interest payments.

Revolving credits, credit cards and other – When unpaid for two normal billing cycles or when 60 or more days past due.

Residential mortgage loans - 90 or more days after the due date of the first unpaid installment on outstanding balance.

Overdrafts for checking accounts without lines of credit – When the overdraft occurs.

In addition, a loan is classified as past due when the debtor files for bankruptcy protection.

Past due loans are reclassified as current when the past due principal and interest has been fully paid by the debtor, except for restructured loans or renewals, which are transferred when three timely consecutive payments have been made (sustained payment).

(h) Allowance for loan losses-

An allowance for loan losses is maintained which, in management's opinion, is sufficient to cover credit risks associated with the loan portfolio, guarantees issued and irrevocable loan commitments. The allowance is established as explained on the next page.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Graded commercial portfolio – Studies are conducted to classify the loan portfolio using the internal grading model applicable to the Bank's commercial portfolio. The Banking Commission's official document No. 142-1/531247/2006 dated November 28, 2006 authorized the use of the Bank's internal grading model for a two-year period, beginning December 1, 2006. The internal grading model complies with the methodology prescribed by the Ministry of Finance and Public Credit (SHCP), and follows the provisions set forth by the Banking Commission for loan grading.

In compliance with the *General Provisions applicable to the Loan Portfolio Grading Methodology for Credit Institutions* ("the Provisions"), the Bank, based on the results from its internal grading model, references its gradings to those of the Provisions so as to validate the adequacy of the allowance. Loans granted to Federal and Municipal Entities, self-paying Investment Projects, trustees acting under Trusts and "structured" loan schemes which permit an evaluation of the related risk, are individually graded in conformity with the methodologies prescribed by said Provisions (see note 22).

Graded residential mortgage and consumer loans – These loans are parametrically evaluated in conformity with the Provisions, which stipulate rules for establishing allowances to recognize potential loan losses based on past due installments, probability of default, and expected loss given default.

The allowance percentages are determined based on the risk levels, according to the following table:

Risk level	Range of allowance percentages
A - Minimum	0.5 - 0.9
B - Low	1 – 19.9
C - Medium	20 - 59.9
D - High	60 - 89.9
E - Loss	90 - 100.0

General reserves – In conformity with the Provisions, those allowances resulting from risk level "A".

Specific reserves – Those allowances resulting from risk levels "B", "C", "D" and "E".

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Impaired loan portfolio – For financial statement disclosure purposes, commercial loans rated as having risk levels "C", "D" and "E" are regarded by the Bank as impaired loans, without giving consideration to improvements in risk levels resulting from the secured portion of the loan, as are loans that although current, result from negotiations in which a forgiveness, reduction or settlement was authorized at the end of the agreed-upon term, and loans payable by individuals classified as undesirable customers.

Exempt portfolio – consists mainly of loans to government entities, including the IPAB, which are not graded.

Additional reserves – are established for those loans, which in management's opinion, may give rise to concern in the future given the particular situation of the customer, the industry or the economy. In addition, allowances are made for past-due interest and other items that in management's opinion could result in a loss.

Global reserves – are established to cover inherent losses in the loan portfolio, but which cannot be identified with any individual loan.

Loans considered unrecoverable are written off against the allowance when their collection is determined to be impractical. Recoveries on loans previously written off are credited to the allowance.

(i) Other accounts receivable-

Amounts related to sundry debtors not recovered within 90 days following the initial recording (60 days for unidentified balances), are provided for and charged to results of operations, irrespective of the probability of recovery, except for those related to recoverable tax, creditable value-added tax and settlement account balances.

(j) Foreclosed assets and assets received in lieu of payment-

Foreclosed assets are stated at the lower of the adjudicated value or net realizable value. Assets received in lieu of payment are stated at the lower of the appraisal value or the price agreed upon by the parties. Any shortfall between the appraisal value and the balance due is written off against the allowance for loan losses. Assets under enforceable promise to sell are recorded at the agreed-upon selling price, with any gain or loss in relation to the latest asset value being recognized in deferred credits or in results of operations for the year, respectively. Income from rents of foreclosed assets is reported as a reduction of the asset value.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Foreclosed assets are written down to reflect any impairment in value through a charge to results of operations for the year. Additional reserves are created on a quarterly basis to recognize potential impairment in the asset value resulting from the passage of time, in conformity with the Provisions referred to in (h) of this note. The reserves are established based on the following table:

	Reserve	percentage			
Months elapsed from the date of foreclosure or received in lieu of payment	Real property	Chattels, receivables and investment securities			
Over: 6	0%	10%			
12	10%	20%			
18	10%	45%			
24	15%	60%			
30	25%				
36	30%				
42	35%	1000/			
48	40%	100%			
54	50%				
60	100%				

(k) Premises, furniture and equipment-

Premises, furniture and equipment are initially recorded at their acquisition cost, and restated for inflation based on factors derived from the value of the UDI.

Depreciation and amortization are calculated on the restated asset values using the straightline method over the estimated useful lives of the assets.

The Group evaluates periodically the values of premises and leasehold improvements, to determine whether there is an indication of potential impairment. Recoverability of assets is measured by a comparison of the carrying amount of an asset to future net revenues expected to be generated by the asset. If the carrying amount exceeds its estimated net revenues, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are reported in the consolidated financial statements at the lower of the carrying amount or realizable value.

(l) Permanent investments in shares-

Investments in affiliated companies are accounted for by the equity method. Equity in the results of operations of affiliated entities is recognized in results of operations for the year, whereas equity in the increase or decrease in other stockholders' equity accounts is recognized in the Group's stockholders' equity under "Gain from holding non-monetary assets from valuation of permanent investment in shares".

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Also, this caption includes permanent investments in shares of issuing companies where the Group has no significant influence, which are valued at cost and adjusted for inflation by applying the National Consumer Price Index (INPC) issued by the Banco de México. Valuation adjustments are recognized in stockholders' equity under "Gain from holding non-monetary assets from valuation of permanent investments in shares". When the valuation of the investment is consistently below the adjusted cost, the investment is written down to its realizable value through a charge to results of operations.

In order to operate, the Brokerage Firm must purchase and hold shares in the Bolsa Mexicana de Valores, S. A. de C. V. (Mexican Stock Exchange), Cebur, S. A. de C. V., S. D. Indeval, S. A. de C. V. and Contraparte Central de Valores de México, S. A. de C. V. As required by the Banking Commission, these investments are valued using the equity method based on the most recent financial statements available; under FRS these investments would be accounted for at the lower of cost restated for inflation or realizable value, since the investing entity exerts no significant influence.

The investment in the shares corresponding to the fixed capital of mutual funds is accounted for based on the stockholders' equity of the mutual funds using the equity method, which is equal to the market price published by the price vendor. The difference between the nominal value and the price at the valuation date is recorded in results of operations under "Equity in the results of operations of subsidiary and associated companies, net".

(m) Income tax (IT) and employee statutory profit sharing (ESPS)-

Deferred income tax as well as deferred ESPS are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. A deferred tax asset is not recognized for the Bank's tax loss carryforwards since utilization is contingent upon compliance with all conditions agreed upon with the IPAB (see note 17). The effect is recognized as realized.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in results of operations for the period enacted.

Deferred ESPS, in certain subsidiaries, is recognized for timing differences from the reconciliation of book income to income for ESPS purposes, on which it may reasonably be expected that a future liability or benefit will arise and there is no indication that the liabilities or benefits will not materialize.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

(n) Deposit funding-

Deposit funding comprises demand and time deposits from the general public, as well as money market funding and issue of bank bonds. Interest is charged to expense on the accrual basis. For instruments sold at a price other than face value, the difference is recognized as a deferred charge or credit and amortized on the straight-line basis over the term of the respective instrument.

(o) Bank and other loans-

Bank and other loans comprise short and long-term loans from domestic and foreign banks, loans obtained through credit auctions with the Central Bank and development fund financing. In addition, this caption includes loans rediscounted with agencies specializing in financing economic, productive or development activities. Interest is recognized on the accrual basis.

(p) Pensions, seniority premiums, post-retirement benefits, and obligations for payments upon termination of labor relationship-

Effective April 1, 2006, the Bank, the Brokerage Firm and Mutual Fund Management Company established a defined pension and post-retirement contribution plan, comprising all employees who join after that date. The plan is optional for employees who joined the Bank on a date prior to the plan's coming into effect. The amounts contributed are recognized directly as expenses in the consolidated statement of income (see note 15).

Furthermore, as required by the collective bargaining labor agreement, the non-contributory defined benefit pension plan continues in effect. Plan eligibility requirements are: reaching the age of 60 with five years of service, or age 55 with 35 years of service. In addition, there is a plan that covers seniority premiums and severance payments to which employees are entitled in accordance with the Federal Labor Law and obligations relating to post-retirement medical benefits, food coupons and life insurance of retirees.

The net periodic cost and the accrued benefits for pensions, seniority premiums, severance payments and post-retirement benefits of the defined benefit plans are recognized in results of operations each year based on computations prepared by independent actuaries of the present value of these obligations, using the projected unit credit method and real interest rates. Amortization of the net cost of prior unrecognized services is based on the average remaining service life of the employees eligible to plan benefits.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

(q) Restatement of capital stock, statutory reserves and unappropriated retained earnings-

This restatement is determined by multiplying stockholder contributions and retained earnings by UDI factors, which measure accumulated inflation from the dates contributed or generated through the most recent year end. The resulting amounts represent the constant value of stockholders' equity.

(r) Gain or loss from holding non-monetary assets-

The gain or loss from holding non-monetary assets represents the difference between the specific valuation of these assets and their cost restated based on the value of the UDI.

(s) Monetary position gain or loss-

The Group recognizes in results of operations the effect (gain or loss) in the purchasing power of its monetary position, which it determines by multiplying the difference between monetary assets and liabilities at the beginning of each month by inflation through year end. The aggregate of these results represents the monetary gain or loss for the year arising from inflation, which is reported in results of operations for the year.

The gain or loss arising from interest-bearing monetary assets and liabilities is included in the consolidated statement of income as part of the "Financial margin", while the gain or loss from all other monetary items is presented in "Other income" or "Other expense", respectively.

(t) Revenue recognition-

Interest on loans granted is recorded in income as earned. Interest on past due loans is not recognized in income until collected.

Fees and interest collected in advance are recorded as "Deferred credits" and recognized in results of operations as earned.

Fees related to the issuance of credit cards and services rendered are recorded in income upon collection, whereas those corresponding to commercial, personal and mortgage loans are deferred and recognized in income using the straight-line method over the shorter of the term of the loan or three years.

Fees earned on trust activities are recognized in income as earned. Fees not collected within 90 days are fully reserved.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Fees collected from customers on the purchase and sale of equities are recorded in income when contracted. Premiums on securities resell agreements and interest from investments in fixed income instruments are recognized in income as earned. Premiums earned on repurchase/resell agreements are calculated based on the present value of the price at maturity.

(u) Customer securities-

Customer securities in custody, guarantee or under the Group's administration are recorded in the respective memorandum accounts at market value, representing the maximum expected amount for which the Group is obligated to its customers in the event of a future loss contingency.

(v) Foreign currency transactions-

The accounting records are maintained in both Mexican pesos and foreign currencies. For financial statement presentation purposes, currencies other than dollars are translated to dollars at the exchange rates as established by the Banking Commission, and the dollar equivalent, together with dollar balances, is then translated into Mexican pesos using the exchange rate determined by the Central Bank. Foreign exchange gains and losses are reflected in results of operations for the year.

(w) UDI Trusts-

Asset and liability accounts of the loan portfolio restructured in UDI Trusts are expressed in Mexican pesos by applying the UDI value determined by the Central Bank at the end of each month. Income and expense accounts are expressed in Mexican pesos by applying the average UDI value.

(x) Contributions to the Institute for the Protection of Bank Savings (IPAB) and to the Reserve Fund-

Among other provisions, the Bank Savings Protection Law created the IPAB, which purpose is to establish a system to protect the savings of the public and regulate the financial support granted to banking institutions in order to comply with this objective.

According to the Law, IPAB guarantees depositors' accounts up to 400,000 UDIS.

The "Other assets" caption includes contributions to the self-regulatory reserve fund, created by the stock market community, intended for supporting and contributing to the strengthening of the stock market.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

(y) Contingencies-

Liabilities for loss contingencies are recorded when it is probable that a liability has been incurred and the amount thereof can be reasonably estimated. When a reasonable estimation cannot be made, qualitative disclosure is provided in the notes to the consolidated financial statements and in the case of the Bank are recorded in memorandum accounts. Contingent revenues, earnings or assets are not recognized until their realization is virtually assured.

(3) Accounting change-

Labor obligations

Beginning January 1, 2005, the Group adopted the Bulletin D-3, Labor Obligations, regarding the recognition of a liability for compensation to employees upon termination of the labor relationship before retirement age (severance liability), for reasons other than restructuring. On adoption and in conformity with the option established, the Group recognized an unamortized asset and a liability of \$289 (\$277 nominal). Amortization is based on the estimated average service lives of the employees entitled to such compensation, and resulted in an expense for the year of \$31 (\$30 nominal).

(4) Foreign currency position-

Central Bank regulations require that banks and brokerage firms maintain balanced positions in foreign currencies within certain limits. The short or long foreign currency positions permitted by the Central Bank for banks and brokerage firms is equal to a maximum of 15% of the basic and global capital, respectively.

The Bank has been authorized by the Central Bank to maintain a larger long position, which includes a capital hedge of up to 50 million dollars in 2006 and 2005. Accordingly, as of December 31, 2006 and 2005, the Bank's long position is within the authorized limits. At December 31, 2006 and 2005, the maximum short and long positions authorized by the Central Bank for the Brokerage Firm is \$155 and \$121 (nominal), respectively, that is equivalent to 15% of the Brokerage Firm's global capital which is \$1,035 and \$807 (nominal) in each year.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006, except exchange rate and otherwise stated)

The foreign currency position at December 31, 2006 and 2005, stated in millions of dollars is analyzed as follows:

	<u>2006</u>	<u>2005</u>
Assets Liabilities	1,030 _(970)	1,031 <u>(942</u>)
Long position	60	89
	=== =	====

At December 31, 2006, the long foreign currency position consists of 94% in US dollars (99% in 2005), 2% in euros (0.1% in 2005) and 4% in other foreign currencies (0.9% in 2005).

At December 31, 2006 y 2005, the exchange rate of the peso to the dollar was \$10.81 and \$10.63, respectively.

(5) Cash and cash equivalents-

Cash and cash equivalents at December 31, 2006 and 2005, are analyzed as follows:

	<u>2006</u>	<u>2005</u>
Cash on hand	\$ 1,908	1,515
Deposits with domestic and foreign banks	5,218	5,520
Deposits with the Central Bank	12,466	13,582

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006, except value per share)

(1) At December 31, 2006 and 2005, includes 18,513,657 and 23,308,845 shares, respectively, of an entity engaged in air transportation with a net book of 82 cents per share, which is below the market value determined by the price vendor as of December 31, 2006 and 2005 of \$2.65 and \$4.08, per share, respectively. The Bank's management decided to maintain those shares valued at a price below market price due to the uncertainty as to the realizability of any gain, based on the current depressed condition of the airline industry worldwide, and the high volatility of the market value and low negotiability of those shares listed on the Mexican Stock Exchange.

Also at December 31, 2006 includes 55,433 class B shares of an international entity engaged in the operation of credit cards, which market value at such date amounts to \$59. The Bank received the shares in June 2006 as a result of an initial public offering made by the aforesaid entity and for which an additional payment was received for \$27 (2.4 million dollars) corresponding to 79,770 redeemed shares, which was recognized in the consolidated statement of income caption of "Other income".

(2) The negative balance of Special CETES of states and municipalities is a result of the swap liability exceeding the assets.

(b) Issuers over 5% of the Bank's net capital-

At December 31, 2006 and 2005, investments in non-government debt securities of the same issuer do not exceed 5% of the Bank's net capital.

(c) Issuers in excess of 5% of the Brokerage Firm's global capital-

At December 31, 2006 and 2005, investments in debt securities other than government securities, of the same issuer that exceeded 5% of the Brokerage Firm's global capital are as follows:

<u>Issue</u>	Certificates	Rate	Term (days)	Amount

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

(8) Derivative instruments-

Trading:

At December 31, 2006 and 2005, derivative financial instruments for trading purposes are analyzed as follows:

	2006		2005		
	<u>A</u>	<u>ssets</u>	Liabilities	Assets	<u>Liabilities</u>
Futures and foreign currency and	Φ.	0			
interest rate forward contracts	\$	8	_	_	53
Interest rate swaps		-	39	_	8
Foreign currency options Mexican stock exchange index (IPC) futures and options and interest rate		1	1	1	_
futures		94	=	<u>-</u>	_4
	\$	103	40 ==	1 ==	65

At December 31, 2006 and 2005, options are balanced since for each buy option there is a sell option; accordingly, the Group's operation is limited to negotiating the contract premiums, which are included in the consolidated statement of income under "Financial intermediation income, net".

Hedge transactions:

Derivative transactions for hedging purposes are presented in the consolidated balance sheet together with the primary position they cover. At December 31, 2006 and 2005, derivative financial instruments for hedging purposes are analyzed as follows:

Primary						
<u>Derivative</u>	position		<u>2006</u>	<u>2005</u>		
Interest rate forward						
contracts (see note 6)	Investment securities	\$	(11)	_		
Variable interest rate						
swaps	Fixed-rate loan portfolio *		(9)	(2)		
Variable interest rate						
swaps	Fixed-rate deposit funding		(1)	_		
			===	==		

^{* \$6} correspond to the hedging of the loan granted to the Federal District Government (see note 9) and \$3 for commercial loans.

The Group may reduce or modify the market risk mainly through two activities: converting fixed to variable rate assets and floating-rate to fixed rate liabilities. Both transformations are achieved using interest rate swaps .

At December 31, 2006 of the total transactions there are nine designated as cash flow hedges that total \$1,600 and are converting 28-day liabilities; the remaining \$8,930 are designated as fair value hedges.

At December 31, 2006 and 2005, the purchase and sale of Mexican stock exchange index (IPC) futures are for hedging and trading purposes, respectively, in recognized markets at an average price of \$0.26 and \$0.18 (nominal), respectively, maturing in the months of March and June 2007 and 2006, respectively. At December 31, 2006 and 2005, purchases of futures were made for purposes of hedging the Brokerage Firm's options issued.

In general, reducing the market risk impacts the financial margin as the revenue gaps are closed (funding long-term fixed-rate loans with short-term liabilities) and, as a result, the benefits from the increase in the margin are reduced when short-term rates fall. At December 31, 2006, with an average TIIE rate of 7.57%, it is estimated that had these derivatives not existed, the financial impact would have been an additional positive margin of \$133 (unaudited figure).

	\$ 89,289	100	87,252	100
		===	=====	===

(c) Acquisition of consumer loans-

On April 11, 2006, the Bank acquired consumer (automobile) loans with a contractual value of \$3,219 from a Limited Purpose Financial Company (SOFOL) for an agreed-upon price made up of two portions: the first fixed portion of \$3,076 (nominal) paid on the acquisition date and a second portion consisting of an amount determinable based on a comparison between monthly and projected collections but which may not exceed \$360 (nominal), which was recorded as a liability. The difference between the contractual price and the agreed-upon price for both portions was recorded as a deferred charge of \$217; the deferred charge is being amortized over a period equal to the remaining life of the loans and the resulting liability shall be payable upon termination thereof. At December 31, 2006, the amortized amount corresponding to deferred charges amounts to \$60 and the balance of the liability totals \$350.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The SOFOL is charged with managing the loan portfolio and sends the necessary information to the Bank on a daily basis for accounting purposes. For this service the Bank pays an annual fee of 1%, computed on the outstanding average balance of the loan portfolio.

At December 31, 2006, the outstanding balance of this portfolio amounts to \$2,207.

(d) Loan to IPAB-

On May 5, 2005, a \$2,000 loan (nominal) was granted to the IPAB, maturing in 2012, with the right of prepayment. The loan bears interest at the 28-day TIIE (Interbank Equilibrium Interest Rate) plus 0.25%; principal and interest are payable at maturity and monthly, respectively. During 2006 and 2006 the IPAB paid interest amounting to \$161 and \$125, respectively. The loan is for debt refinancing in conformity with Article 2 of the Federal Revenue Law for fiscal 2005 and, since it does not arise from capitalization or cash flow schemes or participation in the program referred to in the fifth transitory article of the Bank Savings Protection Law, it is reported under "Loans to Government Entities" (see e. in this note).

(e) Loans to government entities-

At December 31, 2006 and 2005, loans granted to government entities are analyzed as follows:

	<u>2006</u>	<u>2005</u>
Highway construction loans	\$ 5,343	5,574
Loans to the Federal District government	7,145	8,142
Autonomous entity loan	801	1,043

Mexican states and municipalities	194	212
Other	2,217	<u>2,475</u>
Total loans to government entities	\$ 17,989	19,858
-	====	

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Highway construction loan:

Granted for construction of highways, was rescued by the Mexican government in 1997 and restructured in bonds. The bonds are amortized on a quarterly basis, with a 10-year grace period, maturing on August 31, 2012 and payable from 2007. Interest is at the arithmetic average of the 91-day CETES rate.

Loans to the Federal District government:

The balance of loans granted to the Federal District government relates to five lines of credit, two of which, beginning March and August 2005, by virtue of an amendment agreement bear fixed interest rates between 10% and 11% (variable interest rate between TIIE+ 0.20% and 0.40% prior to the agreement). The remaining three lines of credit bear variable interest rates between TIIE + 0.20% and TIIE + 0.40%. The aforementioned balances are as follows:

Starting	Maturity	Dec	ember 31,
date	date	<u>2006</u>	<u>2005</u>

Mexican government support programs:

As a result of the economic crisis in 1995, the Mexican government and the Asociación de Banqueros de México, A. C. (the Mexican Bankers' Association) established loan support programs and agreements, to assist debtors of credit institutions in meeting their obligations. The programs and agreements established were as follows:

- Immediate Support Program for Bank Debtors (ADE).
- Credit Support Program for the Domestic Productive Plant (PACPPN).
- Financial Support and Promotion for Micro, Small and Medium-sized Companies (FOPYME).
- Financial Support to the Agricultural, Cattle-raising and Fishery Sector (FINAPE).
- Additional Benefits to Housing Loan Debtors (BADCV).

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Subsequently, other programs were established such as the Benefits for Bank Debtors of the Agricultural, Cattle-raising and Fishery Sector, the Benefits for Corporate Loan Debtors and the Agreement for Benefits to Housing Loan Debtors ("Punto Final").

The financial support programs and agreements consist of discounts granted to debtors, which are generally absorbed proportionately by the Mexican government and the Bank, in accordance with the terms of each program. Certain discounts are conditional subject to the net cash flows contributed by the Bank to the specific economic sector. The amounts receivable from the Federal Government on discounts granted in connection with the BADCV and BADCVF programs, as of December 31, 2006 and 2005 amount to \$278 and \$314, respectively.

The Bank's cost associated with the various debtor support programs and agreements for the years ended December 31, 2006 and 2005, is as follows:

<u>2006</u>	<u>2005</u>
\$ 31 _ <u>15</u>	35 18
\$ 46 	53
	\$ 31 15

(f) UDI Trusts restructured loans-

The Bank participated in several loan-restructuring programs established between the Mexican government and the Mexican banks. The Bank underwrote restructuring programs that consisted mainly of changing peso-denominated loans to UDIS through trusts created with funding provided by the Central Bank. At December 31, 2006 and 2005, the outstanding balances of restructured loans under UDI Trusts are analyzed as follows:

		2006					
	Loan po	Loan portfolio					
	Current	Past due	interest rate				
States and municipalities	\$ 194		6.34%				
Residential mortgages	1,355	106	8.93%				
Individual loans	<u>70</u>	9	9.74%				
	\$ 1,619	115

Individual loans	-	93	4	9.13%			
	\$	1,821	109				
			====				

(g) Additional loan portfolio information-

Annual weighted lending rates:

Annual weighted loan interest rates during 2006 and 2005 were as follows:

	<u>2006</u>	<u>2005</u>	
Commercial loans *	8.79%	9.99%	
Personal loans	15.21%	16.06%	
Credit card	25.90%	27.44%	
Residential mortgages	11.50%	11.66%	

^{*} Includes commercial, financial and government entities loans.

Loans rediscounted with recourse:

The Mexican Government has established certain funds to promote the development of specific areas of the agriculture, cattle-raising, industrial and tourism sectors, which are managed by the Central Bank, Nacional Financiera, S.N.C., Banco Nacional de Comercio Exterior (Bancomext) and Fideicomisos Instituidos en Relación con la Agricultura (FIRA) by rediscounting loans with recourse. At December 31, 2006 and 2005, the amount of loans granted under these programs aggregated \$3,429 and \$4,914, respectively, and the related liability is included in "Bank and other loans" (see note 14).

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Restructured loans:

At December 31, 2006 and 2005, restructured and renewed loans are analyzed as follows:

	Current <u>loans</u>	Past due <u>loans</u>	<u>Total</u>
<u>2006</u>			
Commercial loans Residential mortgages Personal loans	\$ 154 ⁽¹⁾ 1,335 14	102 10 	256 1,345 ⁽²⁾ <u>14</u>
2005	\$ 1,503 ====	112	1,615
2005 Commercial loans Residential mortgages Personal loans	\$ 564 ⁽¹ 1,136 11 \$ 1,711	82 103 ———————————————————————————————————	646 1,239 ⁽²⁾
	Ψ 1,/11	===	====

⁽¹⁾ At December 31, 2006 and 2005 this amount does not include the debt currently owed by the Federal Government for the highway rescue program of \$5,343 and \$5,573, respectively, forming part of the exempted portfolio.

For the years ended December 31, 2006 and 2005, no past due interest was capitalized.

Risk concentration:

At December 31, 2006, balances due from one debtor individually exceed 10% of the Bank's basic capital (two in 2005). The balance of those loans as of December 31, 2006 and 2005 is \$1,863 and \$4,025, respectively, or 10% and 28% of the basic capital, respectively. The balance of the loans granted to the three largest debtors as of December 31, 2006 and 2005 amount to \$3,803 and \$5,122, respectively.

⁽²⁾ From the total balance of restructured and renewed residential mortgage loans as of December 31, 2006 and 2005, \$1,063 and \$1,202, respectively, correspond to loans transferred from UDI trusts that expired in 2005. In performing the restructures, the Bank obtained additional guarantees that at December 31, 2005 amount to \$7,950.

^{*} Includes commercial loans, loans to financial institutions and government entities.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The movement of the past due loan portfolio for the years ended December 31, 2006 and 2005 is summarized below:

	<u>2006</u>	<u>2005</u>
Balance at beginning of year Settlements	\$ 1,608 (105)	1,871 (10)
Write-offs and debt forgiveness Net transfers from current portfolio Foreign exchange loss	(884) 1,303 (11)	(1,115) 913 <u>(51</u>)
	\$ 1,911	1,608

Nominal interest on the past due loan portfolio not recognized in results of operations for the year ended December 31, 2006 amounted to \$185 (\$151 in 2005).

Impaired loans:

The balance of impaired commercial loans as of December 31, 2006 and 2005 is \$811 and \$1,299, of which \$250 and \$629 are recorded in current loans, and \$561 and \$670 are past due loans, respectively.

(h) Allowance for loan losses-

As explained in notes 2(h) and 22(c), the loan portfolio is classified and an allowance is established to provide for credit risks associated with the collection of the Bank's loan portfolio.

At December 31, 2006 and 2005, the allowance for loan losses classified between general and specific reserves according to the criteria mentioned in note 2(h), is as follows:

		_2	2006	20	05
Loan portfolio	G	eneral	Specific	General	Specific
Commercial *	\$	180	996	206	1,412

In July 2005 one loan matured that bore 6-month interest at LIBOR, plus 1.3%, plus tax-exempt interest rate equal to IT. Interest was payable semiannually in January and July. During 2006 and 2005, interest was paid of USD 1,276 (thousand) and USD 1,646 (thousand), respectively.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Due to the operating characteristics of the interbank loans made to the Bank, such as access to funds via auctions, loans regulated by Banco de Mexico with no pre-established limit, loans subject to availability of funds of the lenders' budget with no limit to the Bank, loans whose limit is daily agreed upon by the lender, at December 31, 2006 and 2005, the Bank has no significant interbank lines of credit with authorized amounts that have not been drawn down.

At December 31, 2006 and 2005, bank and other loans average annual interest rates are as follows:

	2006	2006 Rates		Rates
	Pesos	Foreign currency	Pesos	Foreign <u>currency</u>
Banco de México	7.17%	_	8.29%	_
Development banks	10.21%	7.32%	11.50%	5.83%
Development agencies	5.77%	5.66%	7.49%	5.15%
Foreign banks	_	5.98%	_	4.40%

(15) Pensions, seniority premiums and post-retirement benefits and obligations for payments upon termination of labor relationship-

Effective April 1, 2006, the Bank, the Brokerage Firm and the Mutual Fund Management Company (the entities) established a defined pension and post-retirement contribution plan, comprising all employees who join the entities after that date. The plan is optional for employees who joined the entities on a date prior to the plan's coming into effect. Such plan provides for pre-established contributions by the entities and the employees, which the employee may fully withdraw upon reaching age 65 and 10 years of service.

The present benefit obligation amount transferred from the defined benefits plan to the defined contribution plan by the employees who chose to do so was \$284 and the result from the extinction and reduction of the defined benefits obligation for \$3 was recognized as an extraordinary loss in the consolidated statement of income.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006, except otherwise stated)

For the period of April 1 to December 31, 2006, the charge to income corresponding to the entities' contributions in connection with the defined contribution plan amounted to \$41.

The Bank and the Brokerage Firm continue with the defined benefit pension plan for the employees who opted not to change to the new defined contribution plan, which is based on years of service and the employee's compensation during the five years before retirement.

The cost, obligations and assets of the defined benefit plans: pension, seniority premiums, post-retirement medical benefits, life insurance and food coupons of retirees were determined based on calculations prepared by independent actuaries at December 31, 2006 and 2005 and are presented in nominal values as follows:

		2	2006	2005

(Millions of constant Mexican pesos as of December 31, 2006)

At December 31, 2006, the additional liability from the Bank's additional benefits upon retirement is analyzed below (nominal):

	Pensions	Seniority <u>premiums</u>
Additional liability Intangible asset	\$ 36 _(3)	5 (2)
Reduction in stockholders' equity	\$ 33	3

At December 31, 206 and 2005, statutory severance liabilities are analyzed as follows (nominal):

	<u>2006</u>	<u>2005</u>
PBO	\$ 295	275
Unamortized items:		
Variances in assumptions and experience	(12)	_
Transition liability	<u>(233</u>)	<u>(257)</u>
Net projected liability	\$ 50	18
	===	==
Liability:		
Unfunded provision	\$ 69	30
Additional asset and liability	<u>201</u>	<u>217</u>
Total liability	\$ 270	247
	===	===

A reconciliation of recognized statutory severance assets and liabilities as of December 31, 2006 and 2005, follows (nominal):

	<u>2006</u>	<u>2005</u>
PBO at January 1 Amortization of transition liability for the year	\$ 273 (31)	277 <u>(30</u>)
PBO net of amortized transition liability for the year	242	247
Net periodic cost Severance payments made in the year	(64) _23	(60) _30
Additional asset and liability	\$ 201	217
	===	===

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Below is an analysis of the entries of the plan assets to meet the labor obligations for the years ended December 31, 2006 and 2005 (nominal):

	<u>2006</u>	<u>2005</u>
Balance at beginning of year	\$ 3,029	2,628
Contributions to the fund	88	260
Return on plan assets	308	298
Transfer to the defined contribution plan	(284)	_
Payments made	<u>(160</u>)	(157)
Balance at year end	\$ 2,981	3,029
		
Rates used in the actuarial projections are:		
	<u>2006</u>	<u>2005</u>
Yield on plan assets	5.0%	5.0%
Discount rate	4.5%	5.0%
Rate of increase in compensation	1.0%	0.5%
Medical expense increase rate	3.0%	3.0%
Estimated inflation rate	3.5%	4.5%

The amortization periods (years) for unamortized items are as follows:

	<u>Pensions</u>	Seniority premiums	Post-retirement medical benefits, food vouchers & life insurance	Severance <u>liability</u>
Bank	12.60	8.46	16.26	8.80
Brokerage Firm	13.00	14.00	18.00	11.00
Mutual Fund				
Management				
Company	_	12.27	_	11.22
	====		====	====

(16) Related-party transactions-

During the normal course of business, the Group carries out transactions with related parties. According to the Group's polices, the Bank's Board of Directors authorizes all credit transactions with related parties, which are granted at market rates with guarantees and terms in accordance with sound banking practices.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

At December 31, 2006 and 2005, principal balances with related parties are for bank loans granted of \$581 and \$1,247, respectively, and bank loans received of \$3 and \$16, respectively. Principal income and expense items arising from related-party transactions for the years ended December 31, 2006 and 2005 were the interest earned and payable on these loans.

(17) Income tax (IT), asset tax (AT), and employee statutory profit sharing (ESPS)-

Under current Mexican tax law, corporations must pay the greater of IT or AT. For determining taxable income for IT purposes, there are specific rules relating to the deductibility of expenses and the recognition of the effects of inflation.

On May 19, 2004, the Bank was awarded a favorable court ruling on a proceeding with respect to articles 16 and 17, last paragraph of the IT Law passed in 2002. Accordingly, the Bank may use the same taxable income for employee statutory profit sharing as that used for IT determination purposes.

The AT Law provides for a 1.8% tax rate on assets, less certain liabilities. AT payable in excess of IT for the year may be recovered in the ten succeeding years, restated for inflation, provided that IT exceeds AT in any of such years. Given its uncertain recovery, the Bank's AT for 2006 and 2005, which amounted to \$23 and \$15 (nominal), respectively, was charged to results of operations of such years.

Current IT, AT and ESPS expense:

The current IT, AT and ESPS expense in the consolidated statement of income is analyzed as follows:

	2006		2006		20	05
	T	axes	ESPS	Taxes	ESPS	
Bank and subsidiaries (AT and IT for \$23 and \$18 in 2006 and \$15 and \$22 in 2005,						
respectively)	\$	41	252	37	191	
Brokerage Firm (IT)		66	24	60	20	
Mutual Fund Management						
Company (IT)		4	1	4	1	
Excess in Bank's provision		_	_	_	17	
Restatement for inflation		_4	_10	6	10	
	\$	115	287	107	239	
		===	===	====	===	
		\$	402	3	346 ===

		(Continued)

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Other considerations:

According to the IT Law, tax losses, restated for inflation, may be carried forward to offset the taxable income of the ten succeeding years. At December 31, 2006, there are tax loss carryforwards which originated from 1995 through 2000; however, as a result of the agreement between the Bank of Nova Scotia ("BNS") and IPAB, the Group shall not benefit from tax losses sustained in fiscal years between June 30, 1996 and December 31, 1999 without the prior written consent of the IPAB. Should the Bank derive any economic benefit from the carryforwards of such tax losses, the IPAB will be paid an amount similar to the economic benefit received.

For the years ended December 31, 2006 and 2005, tax loss carryforwards of \$2,335 and \$1,913 (nominal), respectively, were utilized which resulted in tax benefits of \$677 and \$574 (nominal) respectively, reported in the consolidated statement of income as a reduction of current income tax expense. The Bank does not recognize the potential AT benefit that as of December 31, 2006 and 2005 amounts to \$177 and \$169, respectively, because its realization depends on first utilizing all of the tax loss carryforwards.

In conformity with the Income Tax Law in force for fiscal 2006, the IT rate is 29% (30% in 2005), and will be 28% from 2007.

In accordance with Mexican tax law, the tax authorities may examine transactions carried out during the five years prior to the most recent income tax return filed.

Corporations carrying out transactions with related parties, whether domestic or foreign, are subject to certain requirements as to the determination of prices, since such prices must be equivalent to those that would be used in arm's-length transactions.

(18) Stockholders' equity-

(a) Structure of capital stock-

At December 31, 2006 and 2005, the authorized capital stock is represented by 3,306,531,531 common, registered shares with no par value, divided into 1,818,592,342 Series "F" shares and 1,487,939,189 Series "B" shares.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The minimum fixed portion of capital stock is represented by 3,018,866,182 subscribed and paid shares - 1,660,376,400 Series "F" and 1,358,489,782 Series "B" shares. 287,665,349 shares - 158,215,942 Series "F" and 129,449,407 Series "B" shares, have not been paid and are held as treasury stock.

(b) Comprehensive income-

The comprehensive income reported in the consolidated statement of changes in stockholders' equity represents the results of the Group's activities during the year and includes the net income, plus the result of the valuation of available-for-sale securities and of non-monetary assets (premises, furniture and equipment and permanent investments in shares), and the adjustment for labor obligations upon retirement in 2006.

(c) Restrictions on stockholders' equity-

No individual or entity may acquire direct or indirect control of Series "B" shares in excess of 5% of the Group's paid-in capital, through one or more simultaneous or successive transactions of any kind. If deemed appropriate, the SHCP may authorize the acquisition of a higher percentage, provided that it does not exceed 20% of the capital stock.

In conformity with the General Corporation Law, five percent of the Holding Company's net income for the year must be appropriated to the statutory reserves until such reserves reach 20% of the paid-in capital.

At December 31, 2006, stockholder contributions restated as provided for by the tax law aggregate \$5,772, and may be reimbursed to the stockholders tax-free, to the extent that the tax basis of such contributions equal or exceed stockholders' equity.

Distributions in excess of the tax basis retained earnings (CUFIN) account, which at December 31, 2006 amounts to \$3,375, are subject to income tax, payable by the Holding Company on behalf of the stockholders.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The unappropriated retained earnings of subsidiaries may not be distributed to the Holding Company's stockholders until these are received by way of dividends from the subsidiaries. Also, unrealized gains from the valuation of investments in securities and derivative financial instruments may not be distributed until realized.

(d) Capitalization-

The SHCP requires credit institutions to maintain a minimum capital as a percentage of assets at risk. The percentage is calculated based on the assigned risk in conformity with the rules established by the Central Bank. Information relating to the Bank's capitalization follows:

Capital as of December 31:

	<u>2006</u>	<u>2005</u>

Net capital (Tier 1 + Tier 2)	17.0%	14.6%
	===	

Capital adequacy is monitored by the Risk Area through capitalization index proyection which considers the various established operating limits vis-à-vis the net capital, with a view to avoiding any possible capital shortfalls and taking any necessary measures to ensure that the capital is maintained at an adequate and sound level.

At December 31, 2006 and 2005, the structure of net capital increased principally due to the results of operations for the year and the valuation of available-for-sale securities; additionally in 2005, as a result of the effect of the merger of Lepidus (see a. in this note).

(19) Memorandum accounts-

Transactions on behalf of third parties-

(a) Customer securities-

The funds managed by the Brokerage Firm following customer instructions for investing in various financial instruments of the Mexican financial system are recorded in memorandum accounts.

Funds under management at December 31, 2006 and 2005 are as follows:

Financial margin after allowance for loan				
losses/ Average earning assets	5.7%	5.8%	5.3%	3.4%

(21) Commitments and contingencies-

(a) Litigation-

The Group is involved in a number of lawsuits and claims arising in the normal course of business. It is not expected that the final outcome of these matters will have a significant adverse effect on the Group's financial position and results of operations. Certain cases are covered by an indemnity clause of the agreement with the IPAB.

On February 24, 2005, Banco de México on the Banking Commission's instructions proceeded to make the adjustments related to the accounting imbalances of UDI trusts, and those associated with minor findings. Accordingly, the Bank made the relevant accounting entries to match those adjustments in both its own and the trusts' accounting records. As a result, the imbalances between the portfolio restructured in UDIs recorded in memorandum accounts and the portfolio recorded in those trusts balanced out. Therefore, on February 24, 2005, Banco de México cancelled the Bank's Special Cetes worth \$874 (\$839 nominal) and liability for UDI trusts converted into pesos amounting to \$786 (\$755 nominal); the result of the swap represented a loss of \$87 (\$84 nominal). Furthermore, on November 24, 2005, Banco de México cancelled the Bank's Special Cetes amounting to \$6 by way of a contractual penalty.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Contingent asset arising from Value-added Tax (VAT) litigation

In 2004, the Bank and the Brokerage Firm received a favorable final decision regarding the procedure used for determining the creditable VAT factor. The favorable ruling confirms entitlement of the aforementioned entities to full tax credit for the VAT paid in the period from January 1, 2003 through July 31, 2004. In 2006 the Bank recovered \$494, while the Brokerage Firm filed amended tax returns claiming \$30 (including inflation restatement and interest), which the SAT has not refunded to date.

(b) Responsibility agreement-

The Holding Company has entered into an agreement with its subsidiaries, whereby it undertakes to be jointly and severally responsible for compliance with the obligations that according to the applicable provisions are inherent to the activities of each of the Group's financial entities. In addition, the Holding Company agrees to unlimited and several responsibility for the losses of each and every one of these financial entities.

Contingency for joint and several obligation for tax claim litigation

During 2005, the Financial Group received an official letter from the SAT whereby it was notified that its joint liability assumed in favor of the Brokerage Firm by way of a tax credit (unpaid tax liability) of fiscal 1991 for a total of \$138 (nominal) was binding and so the proceeding for the enforcement of the judgment would commence.

On November 22, 2005, the Group filed a proceeding for annulment before the Federal Fiscal and Administrative Court to leave without effect the aforesaid administrative proceeding. However, the Group fully reserved the judgment amount in the results of operations for 2005.

(22) Risk management-

The purpose of the comprehensive risk management function is to identify and measure risks, monitor the impact that these risks may have on the operations and control their effects on income and shareholder value by applying the best mitigating strategies available, and the incorporation of a risk culture in daily transactions.

The ultimate purpose of the Group is to generate shareholder value by maintaining the organization's stability and creditworthiness. Sound financial management increases the profitability of performing assets, helps maintain appropriate liquidity levels and provides control over exposure to losses.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

In compliance with the provisions issued by the Banking Commission and the guidelines established by BNS, the Group continues to implement a series of actions designed to strengthen the comprehensive risk management function and thus identify and measure, monitor, transfer and control the credit, liquidity and market risk exposures and other risks arising from day-to-day transactions, including compliance with regulatory requirements and other legal matters.

The Board of Directors is responsible for establishing the Group's risk management policies as well as the overall risk level to which the Group is exposed and for approving related policies and procedures, at least once a year. The Board of Directors is also responsible for establishing the structure of limits for the various types or risks; such limits may be based on value-at-risk, volumetric or notional amounts and are established in relation to the Group's stockholders' equity. Furthermore, pursuant to the policies in force, the Board of Directors entrusts the implementation of the procedures designed to measure, manage and control risks to the Risk Management Committee and the Comprehensive Risk Management Unit (UAIR).

In turn, the Risk Management Committee assigns responsibility for monitoring the compliance with the policies and procedures for market and liquidity risks to the Asset-Liability and Risk Committee (CAPA). Furthermore, the UAIR has policies in place for reporting and correcting any deviations from the specified limits. Such deviations must be reported to the Risk Management Committee and the Board of Directors.

(a) Market risk-

The purpose of the market risk management function is to identify, measure, monitor, and control risks arising from interest and exchange rate and market price fluctuations and other risk factors that are present in the money, foreign exchange, capital and derivative instruments markets, in which the Group maintains positions for its own account.

The CAPA performs weekly reviews of the various activities that represent market risks for the Group, focusing on the management of asset and liability positions reported in the consolidated balance sheet in connection with credit, funding and investing, as well as securities trading activities.

Derivative instruments are valuable risk management tools for the Group and its customers. The Group uses derivative instruments to control the market risk originating from its funding and investing activities, as well as to reduce funding-related costs. To control interest rate risks inherent in fixed-rate loans, the Group enters into interest rate swaps, forward and futures contracts. Forward foreign exchange contracts are also used to control exchange rate risks. The Group trades derivative instruments on behalf of its customers and also maintains positions for its own account.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Market risk management in securities trading activities— The Group's securities trading activities are directed primarily to providing service to its customers. Accordingly, to meet its customers' demand, the Group maintains positions in financial instruments and holds an inventory of financial instruments for trading purposes. Access to market liquidity is available through offers to buy from and sell to other intermediaries. Even though these two activities represent transactions the Group carries out for its own account, they are essential to allow customers access to markets and financial instruments at competitive prices. In addition, the Group has treasury positions invested in the money and capital markets so that surplus cash generates the maximum yields in the Group's income. In general, trading positions are taken in liquid markets, which avoid high costs at the time such positions are liquidated. The trading securities portfolio (fixed and variable income and derivative instruments) is marked to market on a daily basis.

The Group applies a series of techniques designed to assess and control the market risks to which it is exposed in the normal course of its activities. The Risk Committees both of the Group in Mexico and of BNS in Toronto and the Board of Directors authorize individual limit structures for each of the financial instruments traded in the markets and by business unit. The limit structure considers mainly volumetric or notional amounts for value at risk, stop loss, diversification, stress, intraday, marketability, precious metals, and other limits.

The value at risk (VaR) is an estimate of the potential loss of value within a specific level of statistical confidence that might arise from maintaining a specific position during a specific period of time (the holding period) under normal market conditions. VaR is calculated daily on all of the Group's risk-exposed financial instruments and portfolios using the Risk Watch methodology developed by Algorithmics.

VaR is calculated using the historical simulation method, with a 300-working day time span. In order to conform to the measurement methodologies used by BNS, the Group calculates VaR considering a 99% confidence level and a 10-day holding period.

Since VaR is used to estimate potential losses under normal market conditions, stress testing is performed monthly assuming extreme conditions, with the purpose of determining risk exposure under unusually large market price fluctuations (volatility changes and the correlation among risk factors). The Risk Committee has approved the stress limits.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

For purposes of marking the Group's positions to market, a price vendor has been contracted to determine prices using technical and statistical methods as well as valuation models authorized by the Banking Commission. During the fourth quarter of 2006, the authorized limits and the average and maximum positions of VaR, in millions of nominal pesos, except for foreign currency forwards and futures, which are presented in millions of dollars, are shown below (unaudited information):

		Position		VaR	
<u>Market</u>	Average	<u>Maximum</u>	Limit	Average	Limit
Pesos: Money market Interest rate derivatives	\$ 57,039.4	67,689.2	105,000.0	33.9	_
(futures and swaps)	68,341.3	71,054.2	102,400.0	<u>35.4</u>	
Total interest rate positions	\$125,380.7 ————	138,743.4	207,400.0	69.3	150.0
Total investment equity securities ⁽¹⁾	\$ 82.7	177.7 ====	200.0	7.3	23.0
<u>Dollars:</u> Forward and futures foreign exchange					
contracts (2)	1,652.6	1,937.3	3,170.0	0.4	_
Foreign exchange market ⁽²⁾ Foreign currency options ⁽²⁾	1.5 s ⁽²⁾	6.0	60.0	0.8	
	11.4	13.6	60.0	0.0	
Total foreign exchange and foreign currency derivatives	1,665.5	1,956.9	3,290.0	1.2	19.5

The Brokerage Firm issued in average IPC warrants for \$5,070.86 pesos in terms of notional amount, the maximum being \$6,741.83 pesos.

The Forwards position is a gross position (long + short) and the Foreign Exchange position is net (long - short).

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

During 2006, the Group's average global VaR (unaudited) was \$29.92 million pesos and the global VaR at December 31, 2006 (unaudited) was \$23.13 million pesos.

<u>Market risk management in lending and borrowing activities</u> – The interest rate risk originating from lending and borrowing activities is assessed weekly through analyses of the interest rate gaps derived from funding and investing activities. This weekly supervision function is supported by a risk assessment process, which includes simulation models and sensitivity analyses.

Simulation models help the Group assess interest rate risks dynamically. These models are applied mainly to the balance sheet position and consider hypotheses with respect to growth, mix of new activities, interest rate fluctuations, maturities and other related factors.

<u>Market risk management in available-for-sale securities</u> - Available-for-sale securities are considered within the Group's structural position and to measure their risk, reprising gaps, economic value sensitivity to interest rates are considered.

(b) Liquidity risk-

The Group's liquidity risks result from the funding, borrowing and securities trading transactions, such as demand deposits, maturities of time deposits, drawing against credit lines, settlement of transactions involving securities, derivative instruments, and operating expenses. The liquidity risk is reduced to the extent that the Group is able to obtain funds from alternative financing sources at an acceptable cost.

Among the factors that are implicit in the strategy applied to liquidity risk management are assessing and anticipating commitments payable in cash, controlling asset and liability maturity gaps, diversifying sources of funding, establishing prudential limits and assuring immediate access to liquid assets.

(c) Credit risk-

Transactions with customers originate credit risk exposure. Such exposure is recorded in balance sheet and memorandum accounts. Exposure to credit risk recorded in the balance sheet consists primarily of loans granted, while that recorded in memorandum accounts includes guarantees issued, as well as any other financial instrument whereby credit is extended to a third party.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial

AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The Group has developed policies and procedures to manage its loan portfolio risk level and composition, with the purpose of quantifying and managing the loan portfolio-related credit risks and reducing the risk of loss resulting from a customer's failure to comply with the agreed terms.

Policies and procedures for granting, controlling and collecting loans, as well as evaluating and monitoring credit risk and the methods used to identify current or past due impaired commercial loans— The Group's credit risk management is based on the application of well-defined strategies to control this type of risk. Among these are the centralization of credit processes, the diversification of the portfolio, improved credit analysis, strict supervision and a credit risk-scoring model.

The Group has three different levels of credit authorizations: The Board of Directors, Credit Committee and the Credit Department. Each level is defined depending on the amount of the transaction, the type of borrower and the purpose for which the funds will be used.

The business areas prepare and structure the different proposals, which are analyzed and authorized by the Credit Department, or, if applicable, recommended to the corresponding authorization level, thus ensuring an appropriate separation between loan origination and the authorization of transactions.

The business areas also continually evaluate the financial situation of each customer, conducting an in-depth review and analysis of the inherent risk in each loan at least once a year. Should any impairment in a customer's financial situation be detected, the customer's grade is immediately revised. In this way, the Group identifies the changes that occur in the risk profile of each customer. Such reviews consider the overall credit risk, including derivative transactions and foreign exchange exposure. In the case of risks above the acceptable level, additional reviews are carried out more frequently, at least once a quarter.

<u>Loan risk concentrations</u>- The Group has implemented policies and procedures to maintain a sound and diversified portfolio with a prudent and controlled risk. Among such policies are the setting of credit risk exposure limits, considering business units, currency, term, sector, etc. The limits are submitted annually to the Board of Directors for approval and their behavior is monitored and reported to the Risk Committee on a monthly basis.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

<u>Methodology used to determine allowances for loan losses</u>- The Group uses a credit risk classification system derived from the BNS methodology in order to identify the level of risk of loans as well as to ensure that the yields from each loan are proportionate to the risk assumed. This also includes systems and strategies to grant loans and monitor the loan portfolio. These systems, processes and strategies are used in more than 40 countries. The Group also takes advantage of BNS experience in portfolio grading, estimating allowances and losses, adapted as appropriate to the laws and needs of the Mexican market.

This model considers the following risk factors: country risk, financial behavior, financial hedging, debtor management, overall strength (the customer's relation to the economic environment, competitiveness, strengths and weaknesses), account management, industry conditions and payment experience.

Such factors constitute an evaluation of the customer's risk profile and the result is obtained by applying an algorithm that considers such elements. This algorithm is the result of BNS experience, its statistical analysis and adaptation to the Mexican market.

The internal grading system (classified by "IG Codes") uses eight grades considered to be acceptable (IG 98 to IG 77), five grades to reflect a higher than normal risk (IG 75 to IG 60) and four considered to be unacceptable (IG 40 to IG 20). A correlation has been established between the internal grading model and the levels of risk contained in article 126 of the General Provisions applicable to the Loan Portfolio Rating Methodology for Credit Institutions published in the Federal Official Gazette on December 2, 2005 ("the Provisions").

By means of official document no. 142-1/531247/2006 dated November 28, 2006, the Banking Commission renewed for a one-year period from December 1, the Bank's authorization to continue using its internal loan portfolio rating model applicable to the totality of the Commercial Loans, except for loans granted to Federal and Municipal Entities, self-paying Investment Projects, trustees acting under Trusts and "structured" loan schemes which permit an evaluation of the related risk as well as those granted to Financial Entities, which are graded individually according to the methodologies set forth in articles 112, 114 and 115 of the Provisions. From December 2004, loan grading and provisions are made, respectively, pursuant to articles 126,130 and 131 of the aforesaid Provisions.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

The chart below shows the correlation between the internal grades and those established in the aforementioned Provisions:

Grade	IG Code	Banking Commission
Excellent risk	98	A-1
Very good risk	95	A-1
Good risk	90	A-1
Satisfactory risk	87	A-1
High adequate risk	85	A-2
Medium adequate risk	83	A-2
Low adequate risk	80	B-1
Medium risk	77	B-1
High moderate risk	75	B-2
Medium moderate risk	73	B-2
Low moderate risk	70	B-3
Watch list	65	C-1
Special supervision	60	C-1
Sub-standard	40	C-2
High impairment	22	C-2
Doubtful recovery	21	D
Non-performing	20	Е

Description of each risk level:

Excellent Risk: Borrowers with the highest credit rating, outstanding financial structure and solid/consistent profitability. Their capacity for the timely repayment of debt is outstanding, which provides them with unrestricted access to the money and capital markets as well as to alternative financing sources. Management has sufficient experience and optimum performance. These borrowers are not vulnerable to changes in the environment of the country or of their economic sector.

Very Good Risk: Borrowers with a solid financial structure that generate sufficient funds and liquidity to cover short and long-term debts; however, they depend on the Bank to a greater extent than excellent risk borrowers. The management team is competent, with the capacity to easily overcome moderate setbacks. They operate in a stable or growing economic sector.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

Good Risk: Borrowers with a good financial structure, with consistent earnings and reliable cash flow. Their capacity to cover and service the debt is good. The management team has shown to be good, with adequate capabilities in critical areas. The characteristics of the economic sector and the country's economy are sound, without indications that may adversely affect them.

Satisfactory Risk: Borrowers with an adequate financial structure that can easily repay their loans in an effective manner. Although their earnings are consistent with the industry average, they are more susceptible to adverse economic conditions than borrowers in higher ratings. Management is competent and has the support of stockholders. The industry where they operate may be subject to cyclical trends.

High Adequate Risk: Borrowers who still have satisfactory ability to repay their loans and an adequate financial structure. However, although consistent, their earnings are slightly below industry average. The management team's capabilities to obtain profitable and efficient results are satisfactory. The industry where they operate may be subject to cyclical trends.

Medium Adequate Risk: Borrowers whose timely repayment of principal and interest thereon is still guaranteed; however, their earnings are currently below industry average, which suggests that their continued strength may be at risk. Management may be family-owned or professional and performance is fairly satisfactory, with management initiatives being supported by stockholders. The industry where they operate may be subject to cyclical trends.

Low Adequate Risk: Borrowers whose financial structure, profitability and current funding are generally adequate. Operating cash flows are at the break-even point and show adequate levels to cover the debt; however, earnings are below the industry average. Management may have problems in overcoming setbacks, but it is still considered adequate. The industry where they operate may be subject to cyclical trends or be affected by applicable regulations.

Medium Risk: Borrowers that can easily meet their loan commitments in the short-term but whose payments in the long-term are potentially uncertain; with growing leverage and lower debt capacity. Management meets the minimum risk criteria. The industry where they operate may be subject to cyclical trends or be affected by macroeconomic changes.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

High Moderate Risk: Borrowers face a slight decrease in earnings, although they have good potential for successfully overcoming these difficulties. Operating cash flows are at the break-even point and suffice to timely meet their debt payments, but with a certain descending trend. Management shows mixed operating results and long-term prospects. The industry where they operate shows growth problems.

Medium Moderate Risk: Borrowers face growth problems or weak capitalization, have reasonable potential for successfully overcoming these difficulties, and they are currently meeting their payment obligations in a timely manner; however, their funds rarely come from alternative sources and therefore their sustained repayment capacity is contingent. Management evidences certain weaknesses that make stockholders skeptical, to a certain degree, of their performance.

Low Moderate Risk: Borrowers whose financial structure shows clear signs of weakness that may adversely affect their capacity or willingness to meet their long-term payment obligations. They regularly use alternative funding sources, and payments are generally late. Management shows certain noteworthy weaknesses and share ownership may be concentrated in one single individual. The industry sector in which they operate is highly susceptible to changes in macroeconomic conditions.

Watch List: Borrowers whose financial structure is weak, the debt position is unbalanced and debt is overextended. They regularly require funding from non-routine sources, and repayment performance is weak. These borrowers meet the Bank's minimum acceptable requirements. Management performance is poor. Borrowers are vulnerable to any business and/or industry problems.

Special Supervision: Borrowers who have cash flow and liquidity problems that may require funding from alternative sources to prevent defaulting on their loans. Urgent changes are required in how the business is managed and its direction in order to combat the deterioration, which probably can be corrected in the medium term. Both the country and industry environment are frail. These customers definitely have unacceptable risks.

Sub-standard: Borrowers whose future feasibility is uncertain unless there are changes in their business activities, market conditions and management. Customers in this category call for substantial reorganization. Repayment history is bad and their loans are currently past due. The industry in which they operate faces temporary problems.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

High Impairment: Borrowers with clear financial problems that put at risk compliance with the service of their debt, are susceptible to bankruptcy proceedings, have defaulted on their payments and are highly dependent on alternative sources for meeting their loan repayment commitments. Management problems threaten the borrower's ability to continue as a going concern and so the impairment is deemed permanent. Viability of the industrial sector relies on structural changes.

Doubtful Recovery: Borrowers with permanent financial problems. Businesses in this category are likely to have ceased operating and so their payment performance is practically non-existent. Payments are up to one year past due and considered as doubtful recovery. Management is deficient and unreliable and the industry where they operate has been permanently affected.

Non-performing: Borrowers who have ceased making loan repayments and whose situation does not allow for restructuring. Management is ineffective or has shown clear signs of dishonesty. The industry where they operate faces permanent problems and so it is practically impossible to maintain the loan as a performing asset.

Exempt portfolio and methodology:

Part of the portfolio is exempt from grading, examples are: Mexican government sovereign debt, highway loans guaranteed by the Mexican government, and IPAB loans not arising from portfolio sales. No allowances are required for this portfolio.

The Group has implemented the CreditMetrics® methodology and adapted it to the conditions in Mexico. This methodology measures and controls the credit risk of the different segments of the loan portfolio.

- This methodology includes estimating expected and unexpected losses using measurements of the probability of the occurrence of credit events (transition matrices), including likelihood of non-compliance.
- A level of confidence of 99.75% over a one-year period is used to determine unexpected losses ("Credit VaR").
- The correlation between different economic sectors is used to measure the effect of the concentration in the commercial loan portfolio. Constant correlation assumptions consistent with international practices are made for the retail loan portfolio (credit card, personal and residential mortgage loans).
- Furthermore, stress testing is performed regularly as to both expected and unexpected losses.

GRUPO FINANCIERO SCOTIABANK INVERLAT, S. A. DE C. V. Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

<u>Credit culture</u>- To create and promote a credit culture, the Group has permanent training programs for personnel involved in the loan origination and authorization processes. Among such programs is required advanced training in commercial banking practices that provides support tools for the analysis and evaluation of credit risks, as well as decision-making workshops.

<u>Implementation of prudent credit criteria</u>- In accordance with the <u>Prudent Credit Provisions</u>, the Group has established control measures to timely identify, measure and limit the taking of risks derived from the credit activity in its different phases, which are documented in the Credit Policies and Procedures Manual and are constantly reviewed and updated, as well as submitted for approval by the Board of Directors annually.

(d) Operational risk-

In conformity with the *General Provisions* applicable to credit institutions, published in the Federal Official Gazette on December 2, 2005, operational risk is a non-discretionary risk, which is defined as the potential loss resulting from internal control failures or deficiencies, errors in transaction processing or storage or in data transmission, as well as adverse administrative or legal resolutions, frauds or theft and includes, among other things, technological risk and legal risk.

For compliance with the rules on operational risk established by the aforementioned Provisions, the Group has put in place policies and procedures enabling it to implement an appropriate operational risk management process, which are described below:

- 1. Policies for Operational Risk Management.- These policies primarily promote the risk management culture, particularly as to operational risk, so that the Group can measure, identify, monitor, limit, control and disseminate the operational risks inherent in the day-to-day activities.
- 2. Manual for Operational Risk Data Gathering and Classification.- These policies define the requirements for reporting the information that supports the measuring processes, including the scope, functions and responsibilities of the units providing the information, as well as its classification and specific characteristics.

Additionally, the Group has a structured methodology in place to identify and evaluate the operational risks to which it is exposed. The objectives of the methodology are as follows:

- Classify the significant operational risks identified based on their importance.
- Rely on a systematic procedure so that Group is aware of the operational risks to which it is exposed.
- Establish plans to mitigate risks.
- Comply with the requirements as established by Article 86, sections I and III of the *Prudent Provisions for Comprehensive Risk Management*.

Also, regular audits are performed by an experienced independent internal audit department, including comprehensive reviews of the design and operation of the internal control systems in all business and support groups, new products and systems, and the reliability and integrity of data processing operations.

As a result of the Operational Risk management, the Group has identified operational risks for legal contingencies, which if they materialize, would cause a negative impact on the Bank's financial position at December 31, 2006 and 2005 of \$368 and \$300 (\$288 nominal), respectively, which account for 2% of the Bank's stockholders' equity and were fully reserved.

At the close of 2006, the Group had built historic database of operational risk losses which includes losses incurred during the period between January 2003 and December 2006, which aggregate 23,233 loss events with a total value of \$371 million pesos, classified under 16 risk factors, itemized on the following page (unaudited information).

The Group has a process in place termed Key Risk Indicators, which consists of ratios or measurements that allow for the understanding of the operational risk trend and are mainly intended for identifying early warnings associated with the increase in risk of future losses, formalize a follow-up process and establish mitigating or corrective measures.

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

(23) Recently issued accounting standards-

Beginning June 1, 2004, CINIF is responsible for issuing financial reporting standards in Mexico. To accomplish this task, the CINIF received from the Mexican Institute of Public Accountants the bulletins of Generally Accepted Accounting Principles and Circulars issued through that date, which have been renamed as Financial Reporting Standards (FRS), and will continue in force until modified, substituted or superseded by a new FRS. Through December 2006, CINIF had issued eight series A and one series B FRS, effective for fiscal years beginning after December 31, 2005. Therefore, all prior series A bulletins, as well as bulletins B-1 and B-2, have been superseded.

On June 26 and September 15, 2006 resolutions that modify the general provisions applicable to brokerage firms and credit institutions (the Modifications), respectively, issued by the Banking Commission, were published in the Official Gazette. The Modifications are effective from 2007.

The modifications harmonize certain criteria issued by the Commission with FRS. In the first place, they establish that the Commission shall issue particular rules for specialized operations, but resort to the supplementary use of other accounting principles and standards set forth in FRS A-8, and only if the standards referred to by FRS A-8 do not provide a solution for the accounting recognition may a supplementary standard may be used, provided all the requirements noted in such FRS are met. The supplementary use of other accounting principles and standards should be applied in the following order: accounting principles generally accepted in the United States of America ("US GAAP") or any other formal and recognized accounting standard. Management believes that the implementation of the Modifications will not have a significant impact on the Group's financial information.

The most relevant Modifications are the following:

- The following particular standards contained in bulletins issued by the CINIF are included: B-1 "Accounting changes and correction of errors", B-7 "Business acquisitions", C-10 "Financial instruments, derivatives and hedging transactions", "C-15 "Impairment of long-lived assets and their disposition" and D-5 "Leasing".
- Consolidation- All entities are required to be consolidated. Previously, only entities belonging to the financial sector were required to be consolidated.
- Investment securities- Only held-to-maturity securities may be transferred to the available-for-sale category.

Sociedad Controladora Filial AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Millions of constant Mexican pesos as of December 31, 2006)

- Repurchase/resell agreements and securities lending transactions Recording, valuation and presentation rules are included for the offsetting of guarantees in repurchase/resell agreements and securities lending transactions.
- Derivative financial statements- The application of Bulletin C-10 of FRS is mandatory.
- Loan portfolio:
 - The treatment for purchased loan portfolios and the concept of collection rights are incorporated.
 - Released provisions and recoveries are credited to the current year's results of operations.
 - Commissions charged in loan origination are recognized over the life of the loan.
- Sundry debtors- The amounts not recovered within 90 days (60 days if unidentified) were fully reserved while from 2007 a recoverability analysis should be performed.
- Foreclosed assets- From 2007 and with no retroactive effect, foreclosed assets are deemed non-monetary assets for purposes of recognizing the effects of inflation on the financial information.
