

Market prices internalized our view rapidly

Over-adjustment can only be avoided with aggressive monetary policy response and public investment execution

Key messages

- **We forecast a technical recession in Q3-23.** Negative y/y quarterly GDP growth the whole year with a contraction of 0.8% in 2023. In the short-run, we forecast monthly GDP contraction between 2 and 1% y/y in June. Central Bank's baseline GDP growth scenario for 2023 will be adjusted downward again.
- **With 0% m/m GDP growth for the rest of the year, the GDP contraction in 2023 would be above 1%.** What would be the factors that would drive the acceleration of economic activity during the second half of the year? We need not only cuts in the MPR, but also a recovery of public and private investment.
- **Our high-frequency data suggest that the slowdown process has continued in Q2-23, both in goods and services consumption.** However, restaurants and travel sales showed greater dynamism favored by the CyberDay.
- **We forecast Retail Sales decreasing 10% y/y in June. Preliminary data for July confirms that no recovery is observed for now.**
- **Tradable inflation fell sharply in Q2-23 contrary to the asymmetric pass-through estimated by the Central Bank.** Non-tradable inflation (mainly services) continued to slow down.
- **Market prices (inflation and benchmark rate) moved rapidly to Scotiabank's view. We maintain our forecast of inflation at 3.7% and MPR between 6.5 and 7.5% by December 2023.** We do not share the view of inflation decreasing to 3% by the end of this year, but rather during the first quarter of 2024.

Broad adjustment in consumption of goods, in line with the slowdown in tradable inflation.

Consumption of goods

(level, real, index Sep.2019=100, seasonally adjusted, quarterly data)

Inflation of durable (mostly tradable) goods

(var. %, a/a)

Source: Central Bank, Scotiabank Economics

Without excess liquidity, private consumption now determined by a weak labor market. No strong recovery in sight.

Purchases with debit cards

(%, real annual growth, 28-day mov. avg., up to July 11)

Purchases with debit cards

(level, real, index 1-Jan-2020=100, 28-day moving sum, up to July 11)

Source: Scotiabank Economics

Mild stabilization in private consumption in June

Supermarkets

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

Department stores

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

- Supermarkets sales remain weak but stabilizing.
- Department stores also affected by weak demand.

* Data show purchases with debit cards. Inflation-adjusted index.
Source: Scotiabank Economics

Some stabilization in purchases of semi-durable goods

Electronic stores

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

Clothing and footwear

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

- Demand for durable goods remain weak (cars and electronics).
- Clothing and footwear purchases still decreasing.

* Data show purchases with debit cards. Inflation-adjusted index.
Source: Scotiabank Economics

Recreation spending experienced a temporary rebound (CyberDay)

Restaurants

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

Tourism travel

(level*, index 1-Jan-2020=100, 28-day moving sum, up to June 30)

Recreation spending experienced a temporary

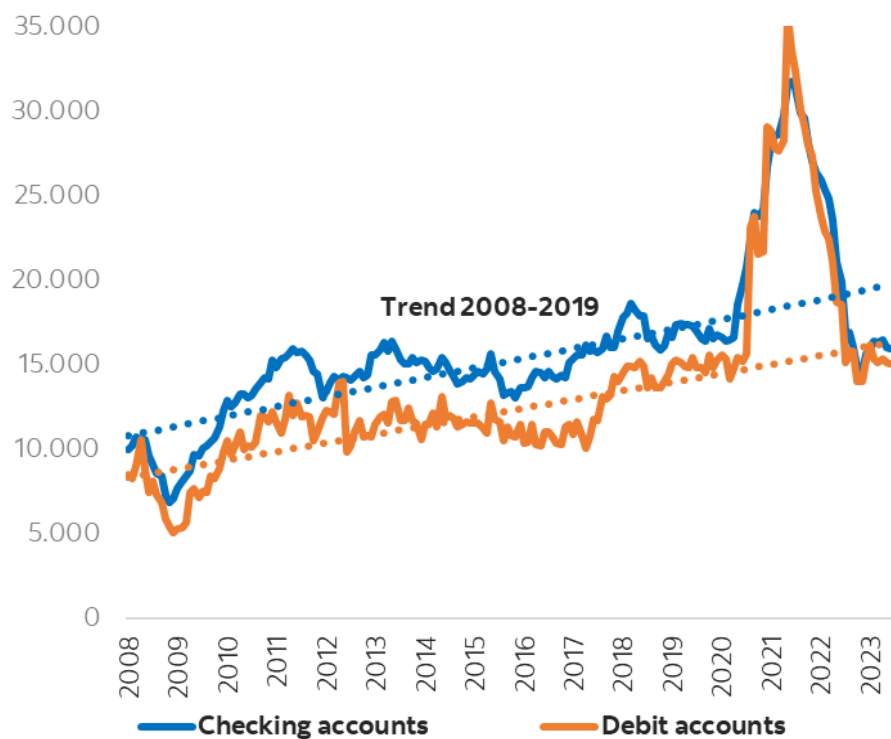

- Restaurant spending recovered strongly.
- Tourism remains the most dynamic service sector, favored by CyberDay event at the end of May.

* Data show purchases with debit cards. Inflation-adjusted index.
Source: Scotiabank Economics

High short-term interest rates drained liquidity, encouraging greater household saving. Term deposits (<90 days) remain high.

Liquidity in non-remunerated accounts: people

(millions of USD, natural persons, as of June 2023)

Liquidity in non-remunerated accounts: firms

(millions of USD, firms, as of June 2023)

We forecast a drop of 10% y/y in retail sales in June. Car sales and imports show signs of over-adjustment.

Retail sales (INE) vs Transactional data*
(percentage, annual growth)

New cars: sales & imports

(Sales: units per month; Imports: USD millions per month)

* This figure compares the INE's monthly retail sales indicator with our data on total purchases with debit cards reported in previous slides.
