Notes to the Consolidated Financial Statements

Independent Auditors' Report

The Shareholders and Directors of
Scotiabank Chile:

Opinion

We have audited the accompanying consolidated financial statements of Scotiabank Chile and its Subsidiaries (the "Group"), which comprise the consolidated statement of financial position as of December 31, 2025, and the related consolidated statements of income, other comprehensive income, changes in equity and cash flows for the year then ended, and the related notes to the consolidated financial statements, including information on material accounting policies.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Scotiabank Chile and its Subsidiaries as of December 31, 2025, and their consolidated performance and their consolidated cash flows for the year then ended in accordance with Accounting Standards and Instructions issued by the Financial Market Commission (CMF).

Basis for opinion

We conducted our audit in accordance with Auditing Standards Generally Accepted in Chile. Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of Scotiabank Chile and its Subsidiaries in accordance with the Code of Ethics issued by the Colegio de Contadores de Chile A.G., and we have fulfilled our other ethical responsibilities in accordance with those requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, have been of most significance in our audit of the consolidated financial statements of the current year. These matters have been addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Allowances for loan losses made Note 41	
The key audit matter	How the matter was addressed in our audit
<p>See Note 41 to the consolidated financial statements.</p> <p>The allowance for loan losses is a significant caption in the Bank's consolidated financial statements, both because of its magnitude and its impact on profit or loss and regulatory indicators, and is determined in accordance with the standards and instructions issued by the Financial Market Commission.</p> <p>Calculating this provision involves applying models and methodologies that require a significant degree of judgment from the Bank, including segmenting the loan portfolio, assessing the credit risk of the transactions, classifying debtors, and using assumptions that consider the historical behavior of the portfolio and significant macroeconomic variables.</p> <p>Because of the complexity of these models, the sensitivity of the provision to changes in the assumptions used, and the high degree of judgment involved in its determination, this matter was considered significant for our audit.</p>	<p>Our audit procedures were focused on assessing the reasonableness of the allowances for loan losses made and the adequacy of the related disclosures, and included, among others:</p> <ul style="list-style-type: none"> • To gain an understanding of the process and relevant internal controls associated with the determination of provisions for credit risk, as well as to evaluate the design, implementation, and operational effectiveness of these controls. • Evaluate the methodology and models used by the Bank for the calculation of the Group allowance, considering their consistency with the current standards and instructions issued by the Financial Market Commission. • For the collective allowance, we involve our credit risk specialists to assist us in assessing the appropriateness of the model, the main assumptions used, as well as the portfolio classification and segmentation applied by the Bank through independent recalculation of the allowance and retrospective tests. • Verification of the financial reasonableness of the individual allowance on a sample of loan transactions, including the assessment of their risk classification by inspecting customer files and, where appropriate, recalculating the associated allowance. <ul style="list-style-type: none"> ▪ We evaluated the adequacy of the disclosures in the consolidated financial statements, comparing them to the requirements established in the Compendium of Accounting Standards for Banks.

Responsibilities of Management and those Charged with Governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the accompanying consolidated financial statements in accordance with Accounting Standards and Instructions issued by the Financial Market Commission (CMF), and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, Management is responsible for assessing Scotiabank Chile and its Subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management intends to liquidate Scotiabank Chile and its Subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Scotiabank Chile and its Subsidiaries' financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Auditing Standards Generally Accepted in Chile will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

As part of an audit in accordance with Auditing Standards Generally Accepted in Chile, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Scotiabank Chile and its Subsidiaries' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Scotiabank Chile and its Subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause Scotiabank Chile and its Subsidiaries to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the audit of Scotiabank Chile and its Subsidiaries to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the Group's consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during the audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other matters

Colegio de Contadores de Chile A.G. approved Auditing Standards Generally Accepted in Chile to fully and unreservedly adopt the International Standards on Auditing issued by the International Auditing and Assurance Standards Board (IAASB) for audits of financial statements prepared for the year beginning on January 1, 2025.

The audit of the consolidated financial statements of Scotiabank Chile and its Subsidiaries as of December 31, 2024 was performed in accordance with Auditing Standards Generally Accepted in Chile effective at such date on which we issued an unmodified opinion on January 30, 2025.

 Consolidated Statements of Cash Flows
 for the years ended December 31, 2025 and 2024

	Notes	12/31/2025 MCh\$	12/31/2024 MCh\$
B) CASH FLOWS FROM INVESTING ACTIVITIES:			
Acquisitions of investments in companies	14	-	-
Disposals of investments in companies	14	-	-
Dividends received from investments in companies	34	531	400
Acquisitions of property and equipment	16	(10,934)	(4,604)
Disposals of property and equipment		3,682	3,117
Acquisitions of intangible assets	15	(33,370)	(47,333)
Disposals of intangible assets		-	-
Total net cash flows generated from (used in) investing activities		(40,091)	(48,420)
C) CASH FLOWS FROM FINANCING ACTIVITIES:			
Attributable to the interest of the owners:			
Proceeds from issuance of letters of credit		-	-
Redemption and payment of interest / principal on letters of credit		-	-
Issuance of current bonds		680,667	501,274
Redemption and payment of interest / principal on current bonds		(1,088,043)	(1,233,481)
Issuance of mortgage bonds		-	-
Redemption and payment of interest / principal on mortgage bonds		-	-
Payment of interest/principal on lease contracts	17	(14,863)	(14,960)
Subordinated bonds issuance		-	31,199
Payment of interest and principal on subordinated bonds	23	(73,271)	(72,034)
Issuance of bonds with no fixed maturity date		-	696,318
Redemption and payment of interest of bonds with no fixed maturity date		(45,564)	-
Issuance of preference shares		-	-
Redemption of preference shares and payment of preference shares dividends		-	-
Increase in paid-in capital by issuance of ordinary shares		-	-
Payment of ordinary shares dividends	28	(216,472)	(122,388)
Attributable to non-controlling interest			
Payment of dividends an/or withdrawals of paid-in capital made with respect to subsidiaries related to non-controlling interest		(4,843)	(17,466)
Total net cash flows generated from (used in) financing activities		(762,389)	(231,538)
D) INCREASE (DECREASE) IN CASH AND CASH EQUIVALENTS FOR THE YEAR		205,434	(233,967)
EFFECT OF EXCHANGE RATE FLUCTUATIONS ON CASH HELD		(3,170)	27,497
INITIAL BALANCE OF CASH AND CASH EQUIVALENTS		1,333,390	1,539,860
FINAL BALANCE OF CASH AND CASH EQUIVALENTS		1,535,654	1,333,390

The Consolidated Statements of Cash Flows as at December 31, 2025 and 2024 were prepared under the indirect method.

SCOTIABANK CHILE AND SUBSIDIARIES

 Consolidated Statements of Changes in Equity
 for the years ended December 31, 2025 and 2024

Note 1 General information

Scotiabank Chile (hereinafter the "Bank") is the Parent of a group of entities, constituted in Chile as a closely-held corporation. Its original incorporation was authorized via Supreme Decree issued by the Ministry of Finance No. 1389 dated March 29, 1944. The Bank is primarily involved in the brokerage of money and financial instrument such as personal property, commercial paper or any other credit instrument.

The current ownership structure is composed of Nova Scotia Inversiones Limitada (99.80%) and non-controlling interests (0.20%). Nova Scotia Inversiones Limitada is the Bank's exclusive controlling shareholder.

The Bank's registered address is located at Avenida Costanera Sur No. 2710, Torre A, Las Condes, Santiago and its website is www.scotiabank.cl.

Note 2 Significant accounting policies

(a) Basis of preparation

The Consolidated Financial Statements, which comprise the Consolidated Statements of Financial Position, Consolidated Statements of Income, Consolidated Statements of Other Comprehensive Income, Consolidated Statements of Cash Flows, and Consolidated Statements of Changes in Equity of the Bank and its subsidiaries, have been prepared in accordance with accounting criteria issued by the Comisión para el Mercado Financiero (hereinafter, the "CMF"), and in everything that is not dealt with by it or in contravention of its instructions, banks must adhere to generally accepted accounting principles, which correspond to the technical standards issued by the Colegio de Contadores de Chile A.G., coinciding with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). Banking CMF GAAP differs from IFRS.

Should any discrepancy exist between accounting principles generally accepted in Chile and the accounting standards issued by the CMF, the latter shall prevail.

(b) Basis of consolidation

The Bank's consolidated financial statements have been consolidated with those of its subsidiaries in accordance with International Financial Reporting Standard IFRS10 "Consolidated Financial Statements." These comprise the preparation of the separate financial statements of the Bank and the companies included in the consolidation, and include the adjustments and reclassifications required for the consistent application of the accounting policies and measurement criteria applied by the Bank.

The Consolidated Financial Statements have been prepared using consistent accounting policies for similar transactions and other events in equivalent circumstances. Significant intercompany transactions and balances (assets and liabilities, equity, revenue, expenses and cash flows) generated from operations performed between the Bank and its subsidiaries and between such subsidiaries have been eliminated on consolidation, in addition to recognize non-controlling interest related to third party ownership percentage in the subsidiaries of which the Bank is not the owner either directly or indirectly and is shown separately in the Bank's equity and profit or loss.

i) Subsidiaries

"Subsidiaries" are considered to be entities over which the Bank has the ability to exercise control. This ability is generally, but not only, reflected by owning directly or indirectly at least 50% of the voting shares of associates, or even if this percentage is lower or null, if the Bank has been granted such control by an agreement with the shareholders of the subsidiaries. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Thus, an investor controls an investee if and only if the investor has all the following:

- Power over the investee when it has interest that provide it with the ability to direct the subsidiary's significant activities;
- Exposure, or rights, to variable returns from its involvement with the subsidiary; and
- The ability to use its power over the investee to affect the amount of the investor's returns.

The subsidiaries over which the Bank has the ability to exercise control and, accordingly, are included in the consolidation of these Consolidated Financial Statements are detailed as follows:

Company	Direct	Indirect	Direct	Indirect
	December 2025	December 2025	December 2024	December 2024
	%	%	%	%
Scotia Administradora General de Fondos Chile S.A.	99.33	0.67	99.33	0.67
Scotia Corredora de Seguros Chile Limitada	99.90	0.10	99.90	0.10
Centro de Recuperación y Cobranza Limitada	99.90	0.10	99.90	0.10
Bandesarrollo Sociedad de Leasing Inmobiliario S.A.	99.91	-	99.91	-
CAT Administradora de Tarjetas S.A.	51.00	-	51.00	-
CAT Corredores de Seguros y Servicios S.A.	51.00	-	51.00	-
Servicios Integrales S.A.	51.00	-	51.00	-
Administradora y Procesos S.A.	51.00	-	51.00	-
Scotia Corredora de Bolsa Chile Limitada	99.19	0.80	99.19	0.80
Scotia Asesorías Financieras Limitada	98.74	-	98.74	-
Scotia Azul Sociedad de Leasing Inmobiliario S.A.	97.49	-	97.49	-
Scotia Operadora de Tarjetas de Pago S.A.	99.90	0.10	99.90	0.10

ii) Non-controlling interests

Non-controlling interest represents the portion of losses and gains and of net assets which the Bank does not control directly or indirectly. It is presented separately in the Consolidated Statements of Income, the Consolidated Statements of Other Comprehensive Income, Consolidated Statements of Changes in Equity and the Consolidated Statements of Financial Position within Equity.

iii) Loss of control

When the Bank loses control of a subsidiary, it derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity. Any resulting gain or loss is recognized in profit or loss. If the Bank retains any interest in the former subsidiary, then such interest is measured at fair value at the date that control is lost.

(c) Basis of measurement

The Consolidated Financial Statements have been prepared on the historical cost basis, except for the following:

- Financial assets held for trading at fair value through profit or loss.
- Financial assets not held for trading mandatorily measured at fair value through profit or loss.
- Financial assets designated at fair value through profit or loss.
- Financial assets at fair value through other comprehensive income.
- Financial Derivative Contracts and Financial Derivative Contracts for Accounting Hedge.

(d) Functional and presentation currency

The Bank and its Subsidiaries have defined the Chilean peso as their functional currency, as its deposit, placement and investment transactions are mainly expressed in such currency. These Consolidated Financial Statements are presented in Chilean pesos. All the information presented in Chilean pesos has been rounded to the nearest million.

(e) Foreign currency transactions

Transactions in currencies other than the functional currency are considered transactions in foreign currencies and are initially translated into the respective exchange rate of such currency at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate as at the date of the Consolidated Statements of Financial Position. Differences arising from fluctuations in the exchange rate between the registration and the next closing date are recorded with debit or credit to profit or loss.

Assets and liabilities in foreign currency US dollar are recognized at their equivalent amount in Chilean pesos, calculated at the accounting representation exchange rate of Ch\$900.40 per US\$1 as at December 31, 2025 (Ch\$994.74 as at December 31, 2024).

The "accounting representation exchange rate" means those exchange rates that must be applied to reflect in Chilean pesos the assets and liabilities that are recorded in foreign currencies, and to make the adjustments to the equivalent accounts in Chilean currency. The accounting representation exchange rate of the different currencies relates to the Bank's determination of market prices at the accounting close date.

The loss of MCh\$169,895 as at December 31, 2025, related to "Foreign currency translation differences, indexation and accounting hedge of foreign currencies" (loss of MCh\$220,036 as at December 31, 2024), shown in the Consolidated Statements of Income, includes the recognition of the effects of exchange rate fluctuations on assets and liabilities denominated in foreign currency or adjusted for foreign exchange rates, and the net gain or loss from derivatives in accounting hedges for foreign currency risk of the Bank and its subsidiaries.

(f) Business segments

The Bank provides segment financial information to identify and disclose in the notes to the Consolidated Financial Statements the nature and financial effects arising from its business activities and the economic environments in which it operates, in accordance with IFRS8 "Operating Segments." Such standard requires that the Bank provides information on the different types of business activities in which it is involved and assists the users of Financial Statements to obtain:

- Better understanding of return.
- Better assessment of future cash flow projections.
- Better judgment on the company as a whole.

The Bank's operating segments are determined based on identifiable components providing products or services related to the business. These business segments deliver products and services subject to risks and yields different from those of other segments and their operating results are reviewed by Management for operating administration and decision-making purposes. Management has decided that there are five reportable segments: "Retail", "Wholesale", "CAT", "Treasury" and "Others", the details of which are included in Note 6.

(g) Transactions with related parties

Disclosures on significant related parties are detailed in Note 43, in accordance with IAS24 "Related Party Disclosures" indicating the relationship with each related party involved, as well as the transaction description and related balances. All of this is performed for an adequate understanding of the potential effects of such relation on the Consolidated Financial Statements.

Intragroup balances and transactions between related parties, are eliminated in the process of preparing the Bank's Consolidated Financial Statements.

(h) Consolidated Statements of Changes in Equity

The Statements of Changes in Equity included in these Consolidated Financial Statements include movements in Equity occurred between January 1 and December 31, 2025 and 2024.

The consolidated Statements of Changes in Equity include all movements in net equity, including those arising from changes in the accounting policies.

(i) Consolidated Statements of Other Comprehensive Income

This section includes changes in equity by disclosing income and expenses of the Bank and its subsidiaries resulting from the performance of its activities during the year, distinguishing those recorded as profit in the profit and loss account for the year and other income and expenses directly recorded in net equity.

Accordingly, this statement includes:

- Consolidated profit or loss for the year.
- Items that will not be reclassified to profit or loss.
- Income tax on other comprehensive income that will not be reclassified to profit or loss.
- Items that can be reclassified to profit or loss.
- Income tax on other comprehensive income that can be reclassified to profit or loss.

(j) Financial assets and financial liabilities

1. Recognition

Initially, the Bank recognizes loans and advances to customers, financial assets held for trading at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial liabilities at amortized cost on the date they were originated. Regular purchases and sales of financial assets are recognized on the trade date; i.e., the date at which the Bank commits to purchase or sell the asset.

A financial asset or financial liability which is not recognized at fair value through profit or loss is initially measured at fair value plus transactions costs that are directly attributable to its acquisition or issue. Items measured at fair value through profit or loss, are initially measured at fair value, recognizing in profit or loss the associated transaction costs.

2. Classification

Accounting policies associated with each classification are addressed in letters:

- Financial assets held for trading at fair value through profit or loss (letter (l)).
- Financial assets at fair value through other comprehensive income (letter (m)).
- Financial derivative contracts and financial derivative contracts for accounting hedge (letter (n)).
- Financial assets at amortized cost (letter (o)).
- Special allowances for credit losses (letter (aa)).

At initial recognition, the Bank classifies its financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss, based on:

- i) The entity's business model to manage financial assets.
- ii) The characteristics of the contractual cash flows from the financial asset.

A financial asset should be measured at fair value through profit or loss unless the financial asset is measured at amortized cost or at fair value through other comprehensive income. However, the Bank may make an irrevocable election at initial recognition to present subsequent changes in fair value in other comprehensive income for specific investments in equity instruments that would otherwise be measured at fair value through profit or loss.

The Bank classifies financial liabilities as subsequently measured at amortized cost except for financial liabilities at fair value through profit or loss. These liabilities, including derivatives that are liabilities, are subsequently measured at fair value.

3. Derecognition

The Bank derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial asset that is created or retained by the Bank is recognized as a separate asset or liability. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset transferred) and the sum of the consideration received (including any new asset obtained less any new liability assumed) plus any cumulative gain and loss that had been recognized in other comprehensive income is recognized in profit and loss.

The Bank derecognizes from the Consolidated Statements of Financial Position a financial liability, or a portion of it, when its contractual obligations are discharged or canceled or expire.

4. Offsetting

Financial assets and liabilities are offset, and the net amount presented in the statement of financial position when, and only when, the Bank has a legal right to set off the recognized amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously. Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions such as in the Bank's trading activity.

5. Measurement at amortized cost

Amortized cost is understood as the acquisition cost in which the financial asset or liability was initially measured, minus the capital repayments that may be made, more or minus, as the accumulated amortization is applicable, using the effective interest method, of the difference between the initial amount and the repayment amount at maturity. For financial assets, minus any value reduction of the impairment amount which had been recognized, either directly or as an increase in the asset amount or through a complementary account of its amount.

6. Fair value measurement

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

When available, the Bank measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are easily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis.

If the market for a financial instrument is not active, the Bank establishes fair value using a valuation technique. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially similar, discounted cash flow analyses and option pricing models.

The chosen valuation technique makes a maximum use of market inputs, relies as little as possible on estimates specific to the Bank, incorporating all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument.

Periodically, the Bank calibrates valuation techniques and tests them for validity using prices from observable recent market transactions of the same instrument or based on other available observable market data.

The Bank establishes a fair value hierarchy, which segregates the inputs and/or assumptions of the valuation techniques used in measuring the fair value of financial instruments.

7. Identification and measurement of impairment

The Bank assesses at each closing date of the Consolidated Statements of Financial Position, whether there is objective evidence that financial assets are not carried at fair value through profit or loss are impaired. These financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact that can be estimated reliably on the future cash flows of the asset.

Objective evidence that financial assets are impaired includes default or delinquency by a debtor, indications that a debtor or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the Bank, or economic conditions that correlate with defaults in the Bank's and its subsidiaries' assets. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is also objective evidence of impairment.

For financial assets "Loans and advances to banks" and "Loans and accounts receivable from customers", impairment is applied in accordance with Chapter B-1 "Provisions for credit risk" of the CNC for Banks, which are described in Note 2 letter (aa).

For financial assets at fair value through other comprehensive income, debt financial instruments at amortized cost and Rights under resale agreements and securities lending agreements, impairment determined by a model of expected credit losses according to IFRS9.

This impairment model measures credit loss allowances using a three-stage approach based on the extent of credit deterioration since origination:

- **Stage 1:** Where there has not been a significant increase in credit risk since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default estimated for the next 12 months. If the financial instrument has a remaining term of less than a year, probability of default is computed using the remaining term to maturity.
- **Stage 2:** When financial instrument experiences a significant increase in credit risk subsequent to origination but is not considered to be in default, it is included in this Stage. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- **Stage 3:** This stage includes financial instruments classified as in default. The allowance for credit losses is made based on the instrument's lifetime expected credit losses.

The measurement of expected credit loss is estimated using inputs like probability of default, exposure at default, and loss given default. Details of these parameters are as follows:

- **Probability of default:** Is an estimate of the likelihood of default over a given time horizon. A default may only happen at certain time over the remaining estimated life if the facility has not been previously derecognized and is still in the portfolio.
- **Exposure at Default:** The exposure at default is an estimate of the exposure at a future default date, considering expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- **Loss given default:** The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as percentage of the exposure at default.

The Bank has a model that allows characterizing the risk profile of a customer, assigning an internal rating to each debtor. To determine impairment, the rating is applied to the valuation of each instrument in accordance with the model defined by the Market Risk unit.

Impairment losses on financial assets at fair value through other comprehensive income are recognized in "Impairment of financial assets at fair value through other comprehensive income" in the Consolidated Statements of Income.

Impairment losses on debt financial instruments at amortized cost and Rights under resale agreements and securities lending agreements are recognized in "Credit-impaired financial assets at amortized cost" in the Consolidated Statements of Income.

(k) Cash and deposits in banks

For purposes of the Consolidated Statements of Cash Flows, the Bank considers the sum of cash in banks and on hand, net debit and credit balances of operations pending settlement as well as those investments in fixed-income mutual funds, debt financial instruments, and investments sold under repurchase agreements with high liquidity are readily convertible to known amounts of cash from the initial investment date and have low risk of change in value, with maturities of 90 days or less from the acquisition date to be cash and cash equivalents.

The Bank uses the indirect method for the preparation of the Consolidated Statements of Cash Flows, where cash flows are determined from the Bank's profit or loss for the period and then incorporates non-cash transactions, as well as income and expenses associated with cash flows from operating, financing and investing activities.

For the preparation of the Consolidated Statements of Cash Flows, the Bank considers the following concepts:

i) Cash flow

Cash and cash equivalents inflows and outflows; i.e., highly-liquid short-term investments with low risk of changes in value, such as: deposits with Banco Central de Chile, deposits in domestic banks and deposits in foreign banks.

ii) Operating activities

Operating activities are the principal revenue-producing activities of the Bank and other activities that are not investing or financing activities.

iii) Investing activities

Investing activities are the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.

iv) Financing activities

Financing activities are activities that result in changes in the amount and composition of the contributed equity and of liabilities that are not part of operating or investing activities.

(l) Financial assets held for trading at fair value through profit or loss

Financial assets held for trading at fair value through profit or loss relate to financial assets acquired for the purpose of generating profits from price fluctuations at short-term or through margins from their brokerage or at amounts that are included in a portfolio for short-term gain taking.

These securities are measured at their fair value in accordance with market prices at the reporting date. Gains or losses resulting from their adjustment to fair value, as well as gains and losses from trading activities are included within the caption "Net financial result" in the Consolidated Statements of Income.

(m) Financial assets at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if it meets both of the following conditions:

- a) the financial asset is held within a business model the purpose of which is achieved by obtaining contractual cash flows and disposing of financial assets; and
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest and indexation on financial assets at fair value through other comprehensive income are included in "Interest and indexation income" in the Consolidated Statements of Income for the period.

(n) Financial derivative contracts and financial derivative contracts for accounting hedge

Financial derivatives that include foreign currency, Unidad de Fomento, interest rate forwards, currency and interest rate swaps, currency and interest rate options and other derivatives are initially recognized in the Consolidated Statements of Financial Position at their trading value (cost) and subsequently measured at fair value. Fair value is obtained from market quotes, discounted cash flow models and measurement models for options, as appropriate. Financial derivatives are stated as an asset when their fair value is positive and as a liability when it is negative, within the caption "Derivative instruments."

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their characteristics and risk are not closely related to those of the host contract and not measured at fair value with the related unrealized gains or losses included in profit or loss. As at December 31, 2025 and 2024, the Bank records no separable embedded derivatives.

Financial derivative contracts are classified as derivative instruments for trading and are disclosed under the caption "Financial assets held for trading at fair value through profit or loss."

Changes in the fair value of financial derivative contracts held for trading are included in "Net financial result for assets and liabilities held for trading at fair value through profit or loss" in the Consolidated Statements of Income.

In this regard, hedge accounting derivatives, are designated as fair value hedges for existing assets or liabilities and firm commitments, or for cash flow hedges for future assets, liabilities or highly probable forecasted transactions, under compliance of each of the following conditions:

- at the inception of the transaction, the hedging relationship is formally documented, indicating the risk management objectives and strategies intended with such transaction;
- the hedge is expected to be highly effective;
- the effectiveness of the hedge can be measured reliably (see Note 12.d.2); and
- the hedge is highly effective in relation to the hedged risk, on a continuous basis throughout the entire hedging relationship.

Certain derivative transactions that do not qualify for being accounted for as hedging derivatives are treated and reported as trading derivatives, even though they provide effective hedge for the management of risk positions.

When a derivative hedges the exposure to changes in the fair value of an existing asset or liability, such asset or liability is recorded at its fair value with respect to the specific risk hedged. Gains or losses from the measures in the fair value both for the hedged item and the hedging derivative are recognized through profit or loss for the year. The fair value measurement adjustment of the hedged item is presented in the Consolidated Statements of Financial Position of the same caption including such item.

If the hedged item in a fair value hedge is a firm commitment, the changes in the fair value of the firm commitment attributable to the hedged risk are recognized as an asset or liability through profit or loss for the year. Gains or losses from the measurement of the hedging derivative at fair value are also recognized through profit or loss for the year. When an asset is acquired or a liability assumed as a result of the commitment, the initial recognition of the asset acquired, or liability assumed is adjusted to include the accumulated effect of the measurement at fair value of the firm commitment that was recognized in the Consolidated Statements of Financial Position.

When a derivative hedges the exposure to changes in cash flows of existing assets or liabilities, or highly probable forecasted transactions, the effective portion of changes in the fair value with respect to the risk hedged is recognized in Equity. Any ineffective portion is directly recognized in profit or loss for the year.

Amounts recognized directly in Equity are subsequently recorded in profit or loss in the same years in which the hedged assets or liabilities affect profit or loss.

For a fair value hedge of interest rates in a portfolio, and the hedged item is an amount of money rather than separately identified assets or liabilities, gains or losses from measuring the fair value of both the hedged portfolio and the hedging derivative, are recognized through profit or loss for the year. However, the gain or loss from measuring the fair value the hedged portfolio is recorded in the Consolidated Statements of Financial Position under the caption "Other assets" or "Other liabilities", depending on the position of the hedged portfolio at a given date.

Financial derivative contracts are subject to offsetting, i.e., they are presented in the Consolidated Financial Statements at their net value only when subsidiaries have both, the legally enforceable right to offset the amounts recognized in such instruments, and the intention to settle the net amount, or realize the asset and pay the liability simultaneously.

(o) Financial assets at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions:

- a) It is held within a business model whose objective is to hold financial assets to collect contractual cash flows.
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These captions are composed of non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Bank does not intent to sell immediately or in the near term.

Operations included in these captions are initially measured at fair value, including the related incremental transaction costs, and subsequently measured at amortized cost using the effective interest method, except when the Bank defines certain loans as hedged items, which are measured at fair value through profit or loss as described in letter (n).

i) Rights under resale agreements and securities lending agreements

Transactions under agreements to resell are performed as investments. Financial instruments are acquired under these agreements and included as assets that are measured in accordance with the interest rate in the agreement.

In addition, through its subsidiary Scotia Corredora de Bolsa Chile Ltda., the Bank performs simultaneous transactions granting term financing to the buyer (through the delivery of shares as collateral), in exchange for an interest rate agreed upon in accordance with the contract.

ii) Financial debt securities

Financial debt securities include the balances of debt instruments of Government and Banco Central de Chile and Other financial debt securities issued in Chile and abroad.

iii) Loans and advances to banks

This caption includes balances of transactions with domestic and foreign banks, including the Banco Central de Chile and foreign Central Banks.

iv) Loans and accounts receivable from customers

This caption comprises balances related to transactions conducted in the commercial, mortgage and consumption portfolios with individuals other than banks, corresponding to credits, loans and other financing, financing lease agreements, factoring operations and accounts receivable resulting from operations inherent to the banking business.

Factoring transactions

Factoring transactions are measured considering amounts disbursed by the Bank when receiving invoices or other commercial instruments representing the credit that the assignor provides to the Bank. The price difference between the disbursed amounts and the actual face value of credits is recorded in the Consolidated Statements of Income as interest income through the effective interest method, during the financing period. When the transfer of these instruments is performed with no recourse by the assignor, the Bank assumes the insolvency risks of those obliged to pay.

Lease operations

Finance lease operations correspond to leases that transfer substantially all risks and rewards to the lessee of the owner's leased asset.

When the Bank and its subsidiaries act as the lessor of an asset, the aggregate present values of the lease payments they will receive from the lessee plus the guaranteed residual value, usually, the price of the exercise of the lessee's purchase option at the expiration of the contract, are recognized as third party financing, and accordingly, included in the caption "Loans and advances to customers" in the Consolidated Statements of Financial Position.

For finance leases when the Bank acts as a lessee, it recognizes the cost of leased assets in the Consolidated Statements of Financial Position, according to the nature of the leased asset, and simultaneously, the sum of the present value of minimum lease payments it will make plus the purchase option, are recorded as a financial liability. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liabilities. The finance expense is allocated to each year during the lease term so as to produce a constant periodic rate of interest on the remaining balance of liabilities. Assets are amortized using similar criteria to that applied to property and equipment for own use.

v) Write-off of loans and advances

Impaired loans are written-off when deemed to be uncollectible or when reasonable time has passed without obtaining recovery. For this purpose, the outstanding balance of the loan recorded within assets is written-off as a debit to the accrued provisions for credit risk.

Subsequent payments obtained for transactions written-off will be credited to profit or loss in the line item "Write-offs loans" in the caption "Credit loss expense" in the Consolidated Statements of Income (see Note 41 b)).

Write-offs of loans and accounts receivable, other than leasing operations, must be performed if the following circumstances, depending on which occurs first:

- a) on the basis of information available the Bank reaches the conclusion that it will not obtain any flows from the loan recorded in assets.
- b) when a debt owed to the Bank without an enforcement order reaches 90 days past due since being recorded in assets.
- c) upon expiration of the statute of limitations for actions to demand collection through an executive judgment or at the time of rejection or abandonment of the execution of the title by enforceable judicial resolution.
- d) When the time of delay of a transaction reaches the term limit for write-off as set forth below:

Type of loans	Term
Secured or unsecured consumer loans	6 months
Other unsecured transactions	24 months
Secured commercial loans	36 months
Mortgage loans	48 months

The term corresponds to the time elapsed from the date on which the payment of all or part of the obligation that is in arrears became due.

Assets related to financial lease transactions must be written off under the following circumstances, whichever occurs first:

- a) the Bank reaches the conclusion that there is no likelihood of recovery of rentals and that the value of the asset cannot be considered for contract recovery purposes, whether because it is no longer in the possession of the lessor, due to its condition, as a result of expenses involved in its recovery, transfer and maintenance for technological obsolescence or because there is no information about its current location and condition.
- b) upon completion of the prescription period for the collection procedures or at the moment of the rejection or abandonment of the execution of the contract through legal judgment.
- c) when the period in which a contract has been maintained in delinquency reaches the term indicated below.

Type of contract	Term
Consumer Leasing	6 months
Other non-real estate leasing operations	12 months
Real estate Leasing (commercial or housing)	36 months

The period corresponds to the time elapsed from the date on which the payment past due amounts became payable.

vi) Renegotiations of transactions written-off

Any renegotiation of a loan written-off will not give rise to revenue as long as the transaction continues to be impaired, and the actual payments received will be treated as recoveries of loans written-off.

Consequently, the renegotiated loan will be re-entered as an asset if it ceases to be impaired and the criteria defined by the Bank are complied with, also recognizing the income from the activation as recovery of loans written-off. The same criterion is used in the event that a loan is granted to repay a loan written-off.

(p) Investments in companies

i) Companies in which the Bank has significant influence

Associates are those entities over which the Bank has significant influence, but not control or joint control. In general, this ability relates to interest equal or higher than 20% of voting rights, unless the Bank may clearly demonstrate there is no such influence. These investments are measured through the equity method of accounting.

In accordance with the equity method, investments are initially recorded at cost, and then increased or decreased in order to reflect the Bank's proportional equity in the profit or loss of the investee and other changes recognized in its equity. Goodwill arising from the acquisition of a company is included in the carrying amount of the investment netted against any accumulated impairment loss.

ii) Joint ventures

“Joint ventures” are those businesses which are jointly controlled by two or more unrelated entities. This is evidenced by contractual agreements where two or more entities (“venturers”) have an interest in entities (“multi-group”) or perform transactions or hold assets so that any strategic financial or operating decision affecting them requires the unanimous consent by all the venturers. At the date of these Consolidated Financial Statements, the Bank assessed and determined it is not involved in any joint venture.

iii) Shares or interests in other companies

Entities which are not significantly controlled or influenced by the Bank are recorded in this line item. It includes the minority permanent investments in domestic or foreign companies, recorded at their acquisition cost and subsequently at fair value through Other Comprehensive Income and recording the related impairment adjustments, where applicable.

(q) Intangible assets

Intangible assets are identified as non-monetary assets (separate from other assets) with no physical substance arising as a result of a legal transaction or developed internally by the consolidated entities. These are assets whose cost can be measured reliably and for which the consolidated entities believe it is probable that future economic benefits will be generated.

Intangible assets are recognized initially at its acquisition or production cost and subsequently measured at cost less accumulated amortization and the accumulated amount of impairment losses.

i. Software or computer software

IT software acquired by the Bank and its subsidiaries are accounted at cost less accumulated amortization of impairment value loss.

The subsequent expense in program assets is capitalized solely when the economic benefits in the specific asset to which they relate increase. All other expenses are recorded as expenditures as incurred.

Amortization is recognized in profit or loss under "Depreciation and amortization" in the Consolidated Statements of Income on a straight-line basis over the estimated useful life of IT software from the date on which they are available for use. Estimated useful lives of computer programs have been set from 5 to 10 years.

ii. Other identifiable intangible assets

Corresponds to intangible assets identified in which the asset cost can be measured reliably and it is likely to generate future economic benefits. Amortization is recognized in profit or loss under "Depreciation and amortization" in the Consolidated Statements of Income on a straight-line basis over the estimated useful life of identifiable intangible assets. The estimated useful life of these intangible assets is up to 3 years.

iii. Intangible assets from business combinations

Relates to intangible assets (other than goodwill) arising from business combinations, which are initially recorded at their fair value. Upon initial recognition, these intangible assets are measured at their cost less accumulated amortization and accumulated impairment losses.

Amortization is recognized in profit or loss under "Depreciation and amortization" in the Consolidated Statements of Income on a straight-line basis over the estimated useful life of intangible assets generated in business combinations. The estimated useful life of these intangible assets does not exceed 20 years.

(r) Property and equipment

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses cost includes expenditures that have been directly attributed to the acquisition of the asset and any other costs directly attributable to the process of bringing the asset to a usable condition.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of the assets, including the related debits to profit or loss within the caption "Depreciation and amortization" in the Consolidated Statements of Income.

Maintenance and repair costs are debited to profit or loss. The cost of improvements is capitalized when the useful life of assets or their capacity increases significantly.

The estimated useful life of the Bank's items of property and equipment are the following:

Asset Group	Useful life
Buildings	80 years
Furniture, machinery, vehicles and other property and plant	Between 2 and 10 years
Computer equipment	Between 3 and 10 years
Facilities, improvements in own properties	Between 3 and 10 years

The useful life assigned to leasehold improvements directly depends on the term of the property's lease contract.

(s) Right-of-use lease assets and lease contract liabilities

i) *Right-of-use assets under lease contracts*

The Bank and its subsidiaries have lease contracts related to certain assets to meet the normal performance of its operating activities. When in such contract, it acts as lessee, the Bank should recognize in its Consolidated Financial Statements a right-of-use asset, representing the right to use the underlying asset specified in the lease contract.

The Bank and its subsidiaries may elect not to recognize a right-of-use asset and a lease liability in the following two cases:

- short-term leases (less than 12 months); and
- leases for which the underlying asset is of low value.

If the Bank or its subsidiaries elect not to recognize a right-of-use asset or lease liabilities, they shall recognize the lease payments associated with those leases as an expense in the Consolidated Statements of Income for the year on a straight-line basis over the lease term or another systematic basis (another systematic basis will be applied if that basis is more representative of the pattern of the lessee's benefit.)

At the commencement date, the Bank shall measure the right-of-use asset at cost, which includes:

- a) the amount of the liability's initial measurement of the lease liability;
- b) lease payments made at or before the commencement date, less any lease incentives received;
- c) any initial direct costs incurred by the lessee; and
- d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The lessee may incur the obligation for those costs either at the commencement date or as a consequence of having used the underlying asset during a particular period.

A lessee shall recognize the costs described in letter d) above as part of the cost of the right-of-use asset when it incurs an obligation for those costs.

After the date of initial recognition, the Bank measures the right-of-use asset applying a cost model less accumulated depreciation/amortization and accumulated impairment; adjusted for any remeasurement of the lease liability.

The Bank and its subsidiaries apply the straight-line method to depreciate the right-of-use asset from the commencement date to the earlier of the end of the lease term Management has estimated for its use.

ii) Lease liabilities

In connection with the recognition of a right-of-use asset in the financial statements, the Bank shall recognize as a counterpart a lease liability related to the financial obligation assumed of paying the underlying lease asset.

At the commencement date, the Bank and its subsidiaries measure the lease liability at the present value of the lease payments that are not paid at that date. The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Bank uses its incremental borrowing rate.

A lease liability is remeasured when there is a change in future lease payments resulting from a change in an index or a rate.

iii) Sales with subsequent lease

A sales transaction with subsequent lease implies the sale of an asset and the subsequent lease of the same asset. In this case, the Bank and its subsidiaries measure the right-of-use asset arising from the sale and leaseback transaction commensurate to the previous carrying amount of the asset, which relates to the right-of-use maintained recognizing a gain or a loss related to the rights transferred to the lessee.

(t) Current tax and deferred taxes

The determination of income tax expense is performed in accordance with IAS12 "Income Taxes" and the Income Tax Law. Income tax expense comprises current tax and deferred taxes.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the date of the Consolidated Statements of Financial Position, and any adjustment to income tax payable in respect of previous years.

The Bank and its subsidiaries recognize, where appropriate, deferred tax assets and liabilities resulting from temporary differences between the financial statement carrying value and tax basis of assets and liabilities (temporary differences). Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied to the temporary differences related to the year in which they reverse, based on the laws that have been enacted or substantively enacted at the date of the Consolidated Statements of Financial Position.

Deferred tax expense is recognized except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

A deferred tax asset is recognized only to the extent that is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each date of the Consolidated Statements of Financial Position and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(u) Non-current assets and disposal groups held for sale

i) Non-current assets for sale and disposal groups held for sale

Non-current assets expected to be recovered principally from sale rather than continuing use are classified as held for sale.

Subsequent to being classified as held for sale, these assets are measured at the lower of their carrying value and fair value less costs to sell.

In order to classify these assets as "Non-current assets and disposal groups held for sale", in accordance with IFRS5, the Bank should ensure it complies with the following requirements:

- it must be available in its current conditions for immediate sale and its sale must be highly probable.
- for the sale to be highly probable, an appropriate management level must be committed with a plan to sell an asset (or a disposal group), and a program to find a buyer must have started and operate actively.
- Likewise, the sale must be expected to meet the conditions for recognition as a sale completed within one year from the date of classification.

Impairment losses in the initial classification as non-current assets held for sale and subsequent losses are recognized in profit or loss in the caption "Gain or loss from non-current assets and disposal groups not qualifying as discontinued operations."

ii) Assets received in lieu of payment or awarded

Assets received in lieu of payment or awarded in legal auction of loans and trade receivables are recorded, in the case of assets received in lieu of payment at the price agreed by the parties, or for those cases where there is no agreement between the parties, at the amount for which the Bank is awarded such assets in a court-ordered public auction.

Subsequently, such assets are measured at the lower of the initial carrying amount or net realizable value, which corresponds to its fair value (liquidity value determined through an independent appraisal) less the related costs to sell. Differences between both amounts are recognized as "Gain or loss from non-current assets and disposal groups not qualifying as discontinued operations." in the Consolidated Statements of Income. Assets received in lieu of payment or awarded in a legal auction are classified in the caption "Non-current assets and disposal groups held for sale" and are presented net of provisions.

In general, the Bank believes assets received in lieu of payment or awarded in legal auction will be sold within one year from their date of award. Assets not sold during such term are written-off as per the instructions issued by the CMF. This is subject to possible transitional provisions issued by the regulator that establish new terms on this matter.

(v) Financial liabilities held for trading at fair value through profit or loss

This item mainly comprises financial derivative contracts with negative valuation and which are not part of a specific accounting hedging relationship. They are measured at fair value and the gains or losses are recorded in "Financial result from financial assets and liabilities held for trading" in the Consolidated Statements of Income.

(w) Financial liabilities at amortized cost

Financial liabilities are initially measured at fair value plus directly attributable transaction costs, and subsequently measured at their amortized cost using the effective interest method. The main captions considered in this classification are as follows:

- Deposits and other on-demand liabilities.
- Term and on-demand deposits.
- Obligations under repurchase agreements and securities lending (*).
- Bank borrowings.
- Debt securities issued.
- Other financial liabilities.

(*) Agreements to repurchase operations are performed as a mean for financing purposes. Investment repurchase obligation is classified within liabilities, which is measured in accordance with the interest rate in the agreement.

(x) Regulatory capital financial instruments issued

These instruments are another source of financing for the Bank. This category includes subordinated bonds, bonds with no fixed maturity and preference shares.

On initial recognition, these instruments are recorded at fair value less transaction costs directly attributable to their issuance. The financial cost for the application of the effective interest method corresponds to transaction costs, including issuance costs and interests.

Transaction costs for bonds with no fixed maturity date and preference shares may be deferred for up to 5 years from the date of issuance and will be prorated and recorded in the Consolidated Statements of Income.

In subsequent recognition, perpetual bonds shall be measured at amortized cost using the effective interest rate method. Preferred shares shall be measured at their initial fair value, less any remaining balance of transaction costs that have not been expensed. Additionally, the effects of any potential modification of the issuance conditions and/or the amount paid for a partial capital redemption after 5 years from issuance must be considered, with the differences between the carrying amount and the payment made being recorded in the Consolidated Statement of Income.

(y) Provisions and contingent liabilities

Provisions are liabilities of uncertain timing or amount. A provision is recognized in the Consolidated Statements of Financial Position when the following requirements are copulatively complied with:

- a) as a result of a past event, the Bank has a present legal or constructive obligation;
- b) it is probable that at the reporting date an outflow of economic benefits will be required from the Bank or its subsidiaries to settle the obligation; and
- c) the amount of such resources can be estimated reliably.

A contingent asset or liability is a possible obligation or asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Bank.

Provisions, which are calculated considering the best information available on the consequences of the event that gave rise to them are re-estimated on each closing date, are used to comply with specific obligations for which they were originally recognized. These are reversed when such obligations decrease or cease to exist.

Provisions are classified according to the following obligations covered:

- Provisions for contingencies (includes employee benefit obligations, restructuring plans, lawsuits and litigation, loyalty programs and merits for customers, operational risk and other contingencies).
- Provisions for minimum dividends, interest payments and repricing of regulatory capital financial instruments issued.
- Special provisions for credit losses (including loss risk for contingent loans, country risk, additional allowances for loans and others).

(z) Provisions for minimum dividends

In Article 79 in Chile's Law of Public Companies it is established that, unless different from the adopted in the meeting and by the issued shares unanimously, public companies will have to distribute annually as dividend in cash to its shareholders, proportionally of its shares or the proportion established by the by-laws at least the 30% of liquid gains of each year, except when accumulated losses coming from previous year are to be absorbed.

Minimum dividends are accounted for net of the portion of the provisional dividends that has been approved during the course of the year and are registered in the caption "Provisions for dividends, payment of interest payments and repricing of issued regulatory capital financial instruments" with a debit to the account "Provisions for minimum dividends" in Equity.

(aa) Allowances for credit losses

The Bank has established allowances for potential credit losses from loans and advances to customers, in accordance with the instructions issued by the CMF and its credit risk rating and evaluation models approved by the Board of Directors.

In order to determine its allowance for credit losses, the Bank uses models or methodologies based on the individual and collective analyses of debtors to make provisions for loans and receivables from customers, which are defined below.

i) Allowances for loans by individual assessment

The individual analysis of debtors is applied to customers, natural persons or legal entities which, due to their size, complexity or exposure level, must be known comprehensively, requiring the assignment of a credit rating for each debtor.

All the customers of the Corporate, Real Estate, Large Companies or Wholesale segments will be considered to be business portfolio assessed individually. It will also consider the debtors with operations different to those mentioned above recording annual sales higher than or equal to MCh\$1,000 or business debt obligations higher than or equal to MCh\$500. In addition, all customers who are part of a business group, record commercial loans and whose total indebtedness, excluding mortgage loans, reaches an amount equal to or higher than UF20,000, will be included as individual customers. Finally, all the debtors that have recorded in their loans cross-border transactions will be included as individual customers.

To make the allowances, the Bank classifies its debtors and transactions related to loans and contingent loans in the related categories, with the prior allocation to one of the following three portfolio categories: Normal, substandard and in default as established in the Compendium of Accounting Standards for Banks (CNC) issued by the CMF. Based on the debtor rating, the Bank assigns probability of default and loss on default percentages, which result in the expected loss percentage:

Type of Portfolio	Debtor category	Probability of default (%)	Loss given default (%)	Expected loss (%)
Normal portfolio	A1	0.04	90.0	0.03600
	A2	0.10	82.5	0.08250
	A3	0.25	87.5	0.21875
	A4	2.00	87.5	1.75000
	A5	4.75	90.0	4.27500
	A6	10.00	90.0	9.00000
Substandard portfolio	B1	15.00	92.5	13.87500
	B2	22.00	92.5	20.35000
	B3	33.00	97.5	32.17500
	B4	45.00	97.5	43.87500

Type of Portfolio	Risk grade	Range of expected loss	Allowance (%)
In default	C1	Up to 3%	2
	C2	More than 3% up to 20%	10
	C3	More than 20% up to 30%	25
	C4	More than 30% up to 50%	40
	C5	More than 50% up to 80%	65
	C6	More than 80%	90

To determine the amount of allowances for the normal and substandard portfolio, the first step is to determine the exposure affected by allowances, which comprises the carrying amount of loans plus contingent loans, less the amounts that would be recovered through the execution of the guarantees, financial guarantee or collateral, supporting the transactions. The related loss percentages are applied to such exposure, which are composed of the probability of default (PD) and the loss given default (LGD) established for the category in which the debtor and/or its qualified guarantor is classified, as applicable. In the case of collateral, the Bank must demonstrate that the value assigned to this deduction reasonably reflects the value it would obtain on the disposal of the assets or equity instruments.

Collateral and sureties may be considered to the extent that the documentation evidencing the surety explicitly refers to specific loans, so that the scope of coverage is clearly defined and the claim against the guarantor or co-debtor is unquestionable. The credit quality of the direct debtor or group of debtors, as the case may be, may be substituted, in the proportion related to the exposure supported, by the credit quality of the guarantor or co-debtor.

For the substitution of the debtor's credit risk for the credit quality of the guarantor or co-debtor, this methodology will only be applicable when the guarantor or co-debtor is an entity rated in a category similar to investment grade by a local or international rating agency recognized by the CMF. The substitution method also applies when the guarantor or co-debtor is:

- The Chilean Treasury, CORFO or FOGAPE, assigning them category A1 for such purpose. For loans granted for the financing of higher education studies, granted in accordance with Law No. 20027, the Government may be considered as a qualified guarantor for 90% of the loan.
- Indirect debtors, other than those mentioned in the preceding point, that have audited financial statements and have been classified by the Bank, strictly applying the provisions of No. 2 of Chapter B-1 of the Compendium of accounting standards issued by the CMF, in a category up to A3 and above that of the direct debtor.

Notwithstanding the above-mentioned, the Bank should keep a minimum allowance percentage of 0.50% on loans and contingent loans from the Normal portfolio. This minimum ratio must be met for the Bank considered individually and for the local consolidated report (the Bank and its subsidiaries in Chile).

For the purposes of establishing the allowance for loan losses in default, an expected loss rate is first determined, deducting the amounts recoverable through execution of guarantees and, if specific information is available, the present value of the recoveries obtained through collection actions, net of associated expenses. Once the expected loss range has been determined, the related allowance percentage is applied to the exposure amount comprising the loans plus the contingent loans of the same debtor.

ii) Allowances for loans associated with collective assessment

The collective assessment is used for residential mortgage and consumer loan exposures, in addition to commercial exposures related to student loans and exposures to borrowers that simultaneously meet the following conditions:

- The Bank has an aggregate exposure (gross amount of provisions) to a single counterparty of less than UF20,000 (excluding mortgage loans). For off-balance sheet items, the gross amount is calculated by applying the credit conversion factors. In addition, "to the same counterparty" denotes one or more entities that may be considered as a single beneficiary.

- For the determination of the aggregate exposure, the Bank must consider the exposure of the corporate group and ii) each aggregate exposure to the same counterparty does not exceed 0.2% of the total associated portfolio. To avoid circular computation, the criterion will be checked only once, for the remaining commercial credit exposures the models based on the individual analysis of the debtors must be applied.

The Bank uses a model for commercial exposures under MCh\$500 to determine an allowance based on the concept of expected loss of a loan.

To determine the allowances, the related group evaluations require the creation of groups of loans with homogeneous characteristics in terms of type of debtors and conditions agreed, in order to establish, through technically based estimates and following prudential criteria, both the payment behavior of the related group and the recoveries of its defaulted loans. Banks may use two alternative methods to determine allowances for retail loans that are assessed on a group basis.

Under the first method, the Bank will use the experience gathered that explains the payment behaviour shown by each group of debtors sharing similar characteristics and recovery through the execution of guarantees and collection actions where applicable, to directly estimate a percentage of expected losses that will be applied to the amount of the loans of the related group.

Under the second, banks will segment debtors into homogeneous groups, as indicated above, associating with each group a certain probability of default and a recovery percentage based on a substantiated historical analysis. The amount of allowances to be made will be obtained by multiplying the total amount of loans of the related group by the estimated default and loss given default percentages.

In both methods, the estimated losses must be related to the type of portfolio and the term of the operations. For consumer loans, guarantees will not be considered for purposes of estimating the expected loss.

Notwithstanding the foregoing, for purposes of making allowances, the Bank should recognize minimum allowances in accordance with the standard method established by the CMF. The use of this minimum prudential basis for allowances in no case exempts the Bank from its responsibility for having its own methodologies to determine allowances that are sufficient to safeguard the credit risk of each of its portfolios, and it must therefore have both methods available.

Allowances will be recorded considering the higher value obtained between the related standard method and the internal method.

Standard method of provisions for group portfolio.

a) Mortgage Loan Portfolio

The Bank applies the standard method, which establishes the applicable allowance factors represented by the expected loss on the amount of mortgage loans. These factors are applied based on the delinquency status of each loan and on the ratio, as of each month-end, between the outstanding principal owed and the value of the mortgage guarantee collateral (PVG), according to the following table:

Applicable allowances factors according to delinquency and PVG						
PVG tranche	Days past due at month-end	0	1-29	30-59	60-89	Non-performing Portfolio
PVG ≤ 40%	PD (%)	1.0916	21.3407	46.0536	75.1614	100.0000
	LGD (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	EL (%)	0.0002	0.0094	0.0222	0.0362	0.0537
PVG ≤ 40% PVG ≤ 80%	PD (%)	1.9158	27.4332	52.0824	78.9511	100.0000
	LGD (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	EL (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80% < PVG ≤ 90%	PD (%)	2.5150	27.9300	52.5800	79.6952	100.0000
	LGD (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	EL (%)	0.5421	6.0496	11.5255	17.6390	22.2310
PVG > 90%	PD (%)	2.7400	28.4300	53.0800	80.3677	100.0000
	LGD (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	EL (%)	0.7453	8.2532	15.7064	24.2355	30.2436

Where:

PD : Probability of default

LGD : Loss given default

EL : Expected loss

PVG: Principal owed outstanding of the loan / value of the mortgage guarantee

This standard method will also be applied to housing lease transactions, following the criteria described above and considering the value of the leased asset as equivalent to the amount of the mortgage guarantee.

If the same debtor has more than one mortgage loan with the Bank and one of them records a delay in payment of 90 days or more, all such loans will be allocated to the in default portfolio, calculating the allowances for each of them according to their related PVG percentages.

For mortgage loans linked to housing programs and subsidies granted by the Chilean Government, provided that they contractually include the auction insurance granted by the Government, the allowance percentage may be weighted by a loss mitigation factor (MP), which depends on the PVG percentage and the price of the property stated in the purchase agreement (V). The MP factors to be applied to the related percentage of allowances are those presented in the following table.

MP loss mitigation factor for credits with state auction insurance		
PVG tranche	V tranche: Price of the house in the sale agreement (UF)	
	V ≤ 1.000	1.000 < V ≤ 2.000
PVG ≤ 40%	100.00	100.00
40% < PVG ≤ 80%	100.00	100.00
80% < PVG ≤ 90%	95.00	96.00
PVG > 90%	84.00	89.00

b) Commercial loans

To determine these allowances, the Bank considers the standard methods presented below, as applicable to commercial lease transactions or other types of commercial loans. Subsequently, the applicable allowance factor is allocated considering the parameters defined for each method.

Commercial leasing transactions

For these transactions, the allowance factor is applied to the present value of the commercial leasing transactions (including the purchase option) and depends on the delinquency status of each transaction, the type of leased asset, and the relationship, at each month-end, between the present value of each transaction and the value of the leased asset (PVB), as indicated in the following tables.

Probability of default (PD) applicable according to default and type of asset (%)		
Days of default of transaction at the end of the month	Type of asset	
	Real estate	Non-real estate
0	0.79	1.61
1-29	7.94	12.02
30-59	28.76	40.88
60-89	58.76	69.38
In default portfolio	100.00	100.00

Loss Given Default (LGD) applicable according to PVB section and type of asset (%)		
PVB = Current value of the operation / Value of the leased asset		
PVB Section	Real estate	Non-real estate
PVB ≤ 40%	0.79	1.61
40% < PVB ≤ 50%	0.05	57.00
50% < PVB ≤ 80%	5.10	68.40
80% < PVB ≤ 90%	23.20	75.10
PVB > 90%	36.20	78.90

Student loans

The calculation of the allowance shall be applied to the student loan exposure and the contingent credit exposure, when applicable. The determination of such factor depends on the type of student loan and on the enforceability of the payment of principal or interest at each month-end. When payment is enforceable, the factor will also depend on its delinquency status.

For classification purposes, a distinction is made between loans granted for financing higher education studies in accordance with Law No. 20,027 (CAE) and, on the other hand, loans guaranteed by CORFO or other student loans.

Probability of default (PD) applicable according to payment due date, default and type of loan (%)			
Payment of principal or interest due at month-end	Days past due at closing	Student Loan	
		CAE	CORFO or others
Yes	0	5.2	2.9
	1-29	37.2	15.0
	30-59	59.0	43.4
	60-89	72.8	71.9
	In default portfolio	100.0	100.0
No	N/A	41.6	16.5

Loss Given Default applicable according to payment due date and type of loan (LGD) (%)		
Payment of principal or interest due at month-end	Student Loan	
	CAE	CORFO or others
Yes	70.9	70.9
No	50.3	45.8

Generic commercial loans and factoring

For factoring operations and other commercial loans, other than those mentioned above, the allowance factor, applied to the amount of the loan and the contingent loan exposure, will depend on the delinquency status of each transaction and the relationship existing at each month-end between the debtor's obligations with the Bank and the value of the real guarantees supporting them (PTVG), as indicated in the following tables:

Probability of default (PD) applicable according to default and PTVG section (%)			
Days of default at the month-end	With collateral		Without collateral
	PTVG ≤ 100%	PTVG > 100%	
0	1.86	2.68	4.91
1-29	11.60	13.45	22.93
30-59	25.33	26.92	45.30
60-89	41.31	41.31	61.63
In default portfolio	100.00	100.00	100.00

Loss Given Default (LGD) applicable according to PTVG section (%)			
Collateral (with / without)	PTVG Section	Generic commercial operations or factoring without the responsibility of the transferor	Factoring with the responsibility of the transferor
With guarantee	PTVG ≤ 60%	5.00	3.20
	60% < PTVG ≤ 75%	20.30	12.80
	75% < PTVG ≤ 90%	32.20	20.30
	90% < PTVG	43.00	27.10
Without guarantee		56.90	35.90

The guarantees used for purposes of calculating the PTVG ratio under this method may be specific or general, including those that simultaneously qualify as specific and general guarantees.

A guarantee may only be considered if, according to the respective coverage clauses, it was constituted with first priority in favor of the Bank and secures only the debtor's loans to which it is allocated (not shared with other debtors). Invoices assigned in factoring operations, as well as guarantees associated with mortgage loans in the residential portfolio, will not be considered in the calculation, regardless of their coverage clauses.

For the calculation of the PTVG ratio, the following considerations must be taken into account

- i. Transactions with specific guarantees: When the debtor has granted specific guarantees for generic commercial loans and factoring transactions, the PTVG ratio is calculated independently for each secured transaction, as the quotient between the amount of the loan plus the contingent credit exposure and the value of the real guarantee supporting it.
- ii. Transactions with general guarantees: When the debtor has granted general guarantees or both general and specific guarantees, the Bank calculates the respective PTVG ratio jointly for all generic commercial loans and factoring transactions not covered under item (i). This is calculated as the quotient between the sum of the amounts of loans and contingent loan exposures and the value of the general guarantees, or general and specific guarantees, which according to their coverage clauses secure the loans included in the numerator of the ratio.

The amounts of guarantees used in the PTVG ratio under items i) and ii) must be determined considering:

- The latest valuation of the guarantee, whether appraisal or fair value, depends on the type of real guarantee. For determining fair value, the criteria established in Chapter 7-12 of the RAN must be considered.
- Possible situations that may be temporarily increasing the values of guarantees.
- The limitations on the amount of coverage established in the related contractual clauses.

c) Consumer Portfolio

The allowance factor, represented by the expected loss (EL), corresponds to the product of the probability of default (PD) and the loss given default (LGD). This factor is applied consistently to all consumer loans and contingent consumer loan exposures held by the debtor with the Bank and its subsidiaries established in Chile, including consumer lease operations. For contingent transactions, the exposure measure calculated in accordance with the provisions established in Chapter B-3 of the CNCB is considered.

To determine the PD value, the following factors must be calculated for each debtor:

- Level of delinquency at the Bank: this corresponds to the maximum delinquency level (in days) of the consumer portfolio, including consumer leasing operations, presented by the debtor with the Bank at the end of the month for which allowances are being determined. For customers with more than one transaction, the maximum value observed among all transactions will be used. The measurement of this variable must consider all entities that form part of the institution's global consolidated level.
- 30-day delinquency in the financial system: this corresponds to whether the debtor has at least one direct obligation with delinquency equal to or greater than 30 days in any of the three months prior to the period for which allowances are calculated. To build this variable, the debtor's delinquency must be observed across all credit providers for which information is available, considering the list of debtors published by the Commission, in addition to the Bank itself at global consolidated level, and the different financial products. Only loans subject to restrictions on disclosure under Law No. 19,628 on the Protection of Private Life are excluded.
- Holding of a residential mortgage loan: this variable determines whether the debtor has a residential mortgage loan currently outstanding in the financial system. For this purpose, the Bank uses the most recent information available at the date on which allowances are calculated, considering the list of debtors published by the Commission, in addition to the Bank itself at global consolidated level.

Based on the above variables, the PD is determined according to the parameters presented in the following table:

Maximum past due level in the month and the bank (interval in days inclusive)	With mortgage loan		With no mortgage loan	
	No past due over 30 days in the system	Past due over 30 days in the system	No past due over 30 days in the system	Past due over 30 days in the system
0 and 7	3.3%	14.6%	6.6%	19.8%
8 and 30	20.4%	41.6%	30.6%	48.5%
31 and 60	50.2%	63.0%	65.1%	66.3%
61 and 89	62.6%	81.7%	72.3%	86.9%

If the debtor is in default, the assigned PD will be 100%

To determine the LGD value, it must be identified whether the debtor has or does not have a residential mortgage loan in the financial system, as defined for the PD value, and according to the type of credit involved. The LGD to be applied is defined according to the following table

	Leasing operations and automotive loans	Credits in installments	Credit cards and lines, and other consumer products
With mortgage loan in the financial system	33.20%	47.70%	49.50%
Without mortgage loan in the financial system	33.20%	56.60%	60.30%

The assignment of the LGD value must be made according to the following guidelines:

- “Lease operations and automotive loans” correspond to loans whose purpose is the financing of the acquisition of vehicles for personal use, which remain as collateral (pledge) in favor of the institution. Consumer financial leasing transactions are also included in this category.
- “Loans in installments” correspond to those recorded under the item consumer installment loans in Chapter C-3 of the CNCB, provided that they have been granted after signing a promissory note that clearly establishes the principal amount, term, interest rate and number of installments, without a predefined use of funds (free use) and do not correspond to the previous category.
- If a loan does not fall within either of the two previous definitions, but is classified under the consumer loans line of the CNCB, the LGD value assigned to the category “Credit cards and credit facilities, and other consumer products” must be applied

Special allowances for credit losses

Additional provisions for loans

In conformity with the standards issued by the CMF, the Bank has made additional provisions on its loan portfolio to hedge against the risk of unpredictable adverse economic fluctuations that may affect the macroeconomic environment or the situation in a specific economic sector.

Additional allowances are followed-up on a bimonthly basis to assess maintaining or amending the volume of allowances made.

Allowances for contingent loans

Contingent loans are all those operations or commitments in which the Bank assumes credit losses by having an obligation with a third party upon occurrence of a future event, to make a payment or disbursement that shall be recovered from its customers, as in the case of readily available revolving credit facilities, readily available revolving credit facilities with immediate payment, loans for higher education under Law No.20027 (CAE), letters of credit for goods movement transactions, commitments to purchase debt in local currency abroad, transactions related to contingent events, guarantees and sureties, other irrevocable credit commitments and other contingent loans.

Contingent loans are not recorded as assets. However, in order to hedge the credit risk, an allowance for potential losses is accrued and recorded within 'Expense for credit losses' 'Expense for special allowances for credit losses' in the Consolidated Statements of Income.

To estimate allowances for contingent loans as indicated in Chapter B-1 and Chapter B-3 of the Compendium of Accounting Standards for Banks issued by the CMF, the amount of the exposure to be considered will be equivalent to the following percentages of contingent loans:

Type of contingent exposure	FCC
Unrestricted revolving credit facilities with immediate payment	10%
Contingent loans linked to CAE	15%
Letters of credit for goods movement transactions	20%
Other readily available revolving credit facilities	40%
Local currency debt purchase commitments abroad	50%
Transactions related to contingent events	50%
Co-debtors and guarantees	100%
Other loan commitments	100%
Other contingent loans	100%

However, when operations are conducted with customers with loans in default, as stated in chapter B-1 of the Compendium of Accounting Standards for Banks issued by the CMF, the exposure will always be equivalent to 100% of their contingent loans.

(ab) Financial guarantees

Financial guarantees are contracts that require the issuer to make specific payments to repay the holder for the loss incurred on specific obligor default according to the conditions of a debt instrument.

Liabilities related to financial guarantees are initially recognized at fair value, and initial fair value is amortized through the life of the financial guarantee. The guaranteed liability is recorded at the higher of the amortized amount or the present value of any expected payment (when a payment under the guarantee becomes probable). Financial guarantees are included in "Other liabilities" in the Consolidated Statements of Financial Position.

(ac) Use of judgments and estimates

The preparation of the Consolidated Financial Statements requires Management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, revenue and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis by the Bank's Senior Management in order to quantify some assets, liabilities, revenues, expenses and uncertainties. Adjustments to accounting estimates are recognized in the year in which the estimate is revised and any future periods affected.

Particularly, the information about the most significant areas of estimation of uncertainty and critical judgments in the applying accounting policies that have most significant effect on amounts recognized in the Consolidated Financial Statements, are described in the following notes:

- Notes 8, 11 and 12 : Measurement of financial instruments.
- Notes 13, 26, and 41 : Allowances for credit risk.
- Notes 15, 16, and 17 : Useful life and impairment of intangible assets, property and equipment and right-of-use assets.
- Note 18 : Deferred taxes.
- Notes 24, 25, and 26 : Provisions, contingencies and commitments.

(ad) Interest and indexation income and expenses

Interest income and expenses are recognized in the Consolidated Statements of Income on an accrual basis, using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, in a shorter period) to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

The calculation of the effective interest rate includes transaction costs, premiums, discounts, as well as all fees and commissions and other concepts paid or received that are directly attributable to the acquisition or issue of a financial asset or liability.

Adjustments mainly relate to the indexation associated with changes in the value of Unidad de Fomento (UF), which was Ch\$39,727.96 as at December 31, 2025 (Ch\$38,416.69 as at December 31, 2024).

The Bank suspends the recognition of interest and indexation income on an accrual basis for loans when the loan or one of its installments is 90 days overdue. This implies that, from the date on which it is due to be suspended and until these loans are no longer impaired, the related assets will not be increased with interest and indexation in the Consolidated Statement of Financial Position and no income for these items will be recognized in the Consolidated Statements of Income, unless they are effectively received.

(ae) Fee and commission income and expenses

Financial fees and commissions and transaction costs directly associated with the generation of certain financial assets and liabilities, are a part of the initial valuation of such financial assets and liabilities for the determination of the effective interest rate.

Fee and commission income and expenses not related to the generation of financial assets and liabilities are recognized on an accrual basis.

In general, unearned income and prepayments related to commissions for future services to be provided or received are transferred on a straight-line basis to profit or loss over the period that contractually covers those payments and collections.

Fee and commission income and expenses are recognized as the related services are provided.

(af) Expenses for employee benefit obligations

Short-term benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

In addition, the obligations for long-term employee benefits and employment contract termination benefits agreed in the several collective bargaining agreements in force between Scotiabank Chile and its employees through the labor unions, incorporate clauses for the payment of incentives related to seniority bonuses, severance indemnity payments for voluntary retirement and caps other than those established in the Labor Code, established ad-hoc in the several agreements. In order to receive such benefits the employee must meet a set of clearly-established requirements.

Expenses detailed in the preceding paragraph are calculated using actuarial methods and assumptions, which are based on Management's best estimate and are reviewed and approved on an annual basis. They include variables such as personnel turnover rate, expected salary growth, mortality rate, disability, retirement age, beginning of working age, average age of beneficiary personnel and the probability of using this benefit, discounted at the current rate for long-term operations (the rate of in UF at 20 years of Bonds issued by the Banco Central de Chile is used).

Gains and losses arising from changes in actuarial variables for employment contract termination benefits are recognized in the Consolidated Statements of Other Comprehensive Income.

The effect of the provisions for such benefits are recognized in the caption "Provisions for contingencies" in the Consolidated Statement of Financial Position.

(ag) Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets, excluding deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognized if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in the Consolidated Statements of Income for the period.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized.

(ah) Basic and diluted earnings per share

Basic earnings per share are calculated by dividing the net profit or loss attributable to the Bank by the number of ordinary shares outstanding during that year.

The calculation of diluted earnings per share has been based on the profit attributable to the Bank divided by the weighted-average number of ordinary shares outstanding after adjustment for the effects of all dilutive potential ordinary shares.

At the date of these Consolidated Financial Statements, the Bank and its subsidiaries do not have any instruments that generate dilutive effects on Equity.

Note 3 New accounting pronouncements issued and adopted, or issued but not yet adopted

New pronouncements introduced by the IASB

Current accounting pronouncements

The following amended accounting pronouncements are mandatory for years beginning on January 1, 2025:

Amendments to IFRS (New IFRS)	Mandatory application date
Lack of Exchangeability (Amendment to IAS21)	Annual periods beginning on or after January 1, 2025. Early adoption is permitted.

Lack of Exchangeability (Amendment to IAS21)

On August 15, 2023, the IASB issued the amendment to IAS21 — The Effects of Changes in Foreign Exchange Rates, "Lack of Exchangeability" to respond to commentary from stakeholders and concerns on the diversity in practice when accounting for the lack of exchangeability between currencies. These amendments establish criteria that will allow companies to assess whether a currency is exchangeable into another currency and when it is not, so that they can determine the exchange rate to be used and the disclosures to be provided, in the event that the currency is not exchangeable.

The amendments establish that a currency is exchangeable into another currency at a measurement date when an entity can exchange that currency into another currency within a timeframe that includes a normal administrative delay and through a market or exchange mechanism in which the exchange transaction would create enforceable rights and obligations. If an entity can only obtain an insignificant amount of the other currency at the measurement date for the specified purpose, such currency is not exchangeable into the other currency.

The assessment of whether a currency is exchangeable into another currency depends on an entity's ability to obtain the other currency and not on its intention or decision to do so.

When a currency is not exchangeable into another currency at a measurement date, an entity is required to estimate the spot exchange rate at that date. An entity's purpose when estimating the spot exchange rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under economic conditions prevailing. The amendments do not specify how an entity estimates the spot exchange rate to meet such objective. An entity may use an observable exchange rate without adjustment or another estimation technique. Examples of an observable exchange rate include:

- A spot exchange rate for a purpose other than that for which an entity assesses exchangeability.
- The first exchange rate at which an entity can obtain the other currency for the specified purpose after currency exchangeability is restored (first subsequent exchange rate).

An entity using another estimation technique may use any observable exchange rate (including rates of exchange transactions in foreign exchange markets or mechanisms that do not create enforceable rights and obligations) and adjust that exchange rate, as required, to meet the objective established previously.

An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2025. Early adoption is permitted. If an entity applies the amendments for an earlier period, it is required to disclose that fact.

The Bank's Management assessed the impact of the adoption of this Standard and determined there are no effects on its Consolidated Financial Statements, given that the Bank currently operates with convertible currencies, using the accounting representation exchange rate as instructed in the CNC for Banks issued by the CMF.

Accounting pronouncements issued but not yet effective

The following accounting pronouncements have been issued and are not yet effective:

Amendments to IFRS (New IFRS)	Mandatory application date
IFRS18 Presentation and Disclosure in Financial Statements	Annual periods beginning on or after January 1, 2027. Early adoption is permitted.
IFRS19 Subsidiaries without Public Accountability: Disclosures	Annual periods beginning on or after January 1, 2027. Early adoption is permitted.
Amendments to IFRS	Mandatory application date
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS10 and IAS28)	Effective date deferred indefinitely.
Financial Instruments: Classification and Measurement (Amendments to IFRS9 and IFRS7 - Post-implementation review)	Annual periods beginning on or after January 1, 2026. Early adoption is permitted.
Update of IFRS19 Subsidiaries without Public Accountability: Disclosures	Annual periods beginning on or after January 1, 2026. Early adoption is permitted.
Translation to a Hiperinflationary Presentation Currency (Amendment to IAS21)	Annual periods beginning on or after January 1, 2026. Early adoption is permitted.

New IFRS issued

IFRS18 Presentation and Disclosure in Financial Statements

On April 9, 2024, the IASB issued IFRS18 “Presentation and Disclosure in Financial Statements”, which supersedes IAS1 “Presentation of Financial Statements.”

Main changes in the new standard compared to the previous requirements in IAS1 include:

- Introducing new categories and subtotals defined in the statement of income with the purpose of obtaining additional significant information and provide a structure for the statement of income that is more comparable between entities. In particular:
 - Income and expense items are required to be classified in the following categories in the statement of income:
 - Operating
 - Investing
 - Financing
 - Income taxes
 - Discontinued operations

The classification is different in certain cases for entities which, as main line of business, provide financing to customers or make investments in assets

- Entities must present the following new subtotals:
 - Operating profit or loss
 - Profit (loss) before financing and income tax

These subtotals structure the statement of income in categories without the need to present headings of categories.

- The above categories should be presented unless doing so would reduce the effectiveness of the statement of income in providing a useful structured summary of the entity's income and expenses.
- The introduction of requirements to improve aggregation and disaggregation that aim to obtain additional significant information and ensure that material information is not hidden. In particular:
 - IFRS18 provides guidance on whether the information should be in the primary financial statements (the function of which is to provide a useful structured summary) or in the notes.
 - Entities should identify assets, liabilities, equity and income and expenses arising from individual transactions or other events, and classify them into groups based on shared characteristics, resulting in items in the primary financial statements that share at least one characteristic. These groups are then separated based on other different characteristics, resulting in separate disclosure of material items in the notes. It may be necessary to aggregate immaterial items with different characteristics to avoid obscuring relevant information. Entities should use a descriptive label or, if that is not possible, provide information in the notes on the detail of such aggregated items.
 - Stricter guidelines are introduced as to whether the analysis of operating expenses is by nature or by function. The presentation should be made in a manner that provides the most useful structured summary of operating expenses considering several factors. The presentation of one or more operating expense items classified by function requires disclosure of amounts for five specific types of expenses, such as raw materials, employee benefits, depreciation and amortization.
- The introduction of disclosures on Management Performance Measures (MPM) in the notes to the financial statements aiming at transparency and discipline in the use of such measures and disclosures in one place. In particular:
 - MPMs are defined as subtotals of revenues and expenses that are used in public communications with financial statement users and are outside the financial statements, supplement the totals or subtotals included in IFRS and communicate management's view of an aspect of an entity's financial performance.
 - The accompanying disclosures are required to be provided in a single note that includes:
 - A description of why the MPM provides management's view of performance.
 - A description of how the MPM has been calculated
 - A description of how the measure provides useful information about an entity's financial performance
 - A reconciliation of the MPM to the most directly comparable subtotal or total specified by IFRS Accounting Standards
 - A statement that the MPM provides management's view of an aspect of the entity's financial performance

- The effect of taxes and non-controlling interests separately for each of the differences between the MPM and the most directly comparable subtotal or total specified by IFRS Accounting Standards.
- For a change in how the MPM is calculated, an explanation of the rationale for and the impact of the change

Specific improvements to IAS7 aim to improve comparability between entities. Changes include:

- Using operating profit subtotal as the single starting point for the indirect method of reporting cash flows from operating activities; and
- Eliminating the option of presenting interest and dividends as cash flows from operating activities.

IFRS18 is effective for annual periods beginning on or after January 1, 2027. Early adoption is permitted. An entity is required to apply the amendments retrospectively, in accordance with IAS8 Accounting Policies, Changes in Accounting Estimates and Errors, with specific transition provisions.

The Bank's Management is assessing the impact of adopting these amendments.

IFRS19 Subsidiaries without Public Accountability: Disclosures

On May 9, 2024, the IASB issued IFRS19 "Subsidiaries without Public Accountability: Disclosures."

IFRS19 specifies the minimum disclosure requirements that an entity may apply instead of the extensive disclosure requirements required by other IFRSs.

An entity may apply this standard only when it is a subsidiary without public accountability and its ultimate or intermediate parent prepares consolidated financial statements available for public use that comply with IFRS Accounting Standards (eligible entity).

A subsidiary is required to be publicly accountable if its debt or equity instruments are traded in a public market or it is in the process of issuing such instruments for trading in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets), or it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (e.g., banks, credit unions, insurance companies, securities brokers/dealers, mutual funds, and investment banks often meet this second criterion).

Eligible entities may, but are not required to, apply IFRS19 in their consolidated, separate or stand-alone financial statements.

An entity should consider whether to provide additional disclosures when compliance with the specific requirements of the standard is insufficient to enable users of the financial statements to understand the effect of transactions and other events and conditions on the entity's financial position and financial performance.

IFRS19 is effective for annual periods beginning on or after January 1, 2027. Early adoption is permitted. If an entity elects to early adopt the standard it should disclose that fact. If an entity applies it in the current reporting period but not in the immediately previous period, it should provide comparative information (i.e., prior period information) for all amounts reported in the current period's financial statements, unless otherwise permitted or required by this standard or another IFRS.

An entity that opts to apply this standard for a reporting period before the reporting period in which it first applies IFRS18 shall apply the disclosure requirements set out in Appendix B of IFRS19.

If an entity applies the standard for an annual reporting period beginning before January 1, 2025 and has not applied the Amendments to IAS21 "Lack of Exchangeability", it is not required to make the disclosures in IFRS19 related to those amendments.

The Bank's Management is assessing the impact of adopting these amendments.

Amendments to IFRS

Sale or Contribution of Assets between and Investor and its Associate or Joint Venture (Amendments to IFRS10 and IAS28)

On September 11, 2014, the IASB issued this amendment that requires that when transferring subsidiaries to an associate or joint venture, the total gain should be recognized when assets transferred meet the definition of "business" under IFRS3 "Business Combinations." This amendment establishes strong pressure on the definition of a "business" for recognition in profit or loss. Also, it introduces new and unforeseen recognition for transactions that partially consider maintenance in assets that are not businesses.

The effective application of this amendment has been deferred indefinitely.

Classification and Measurement of Financial Instruments (Amendments to IFRS9 and IFRS7 – Post-implementation Review)

On May 30, 2024, the IASB has issued this amendment to address issues identified during the post-implementation review of the classification and measurement requirements of IFRS9 "Financial Instruments" and the disclosure requirements in IFRS7 "Financial Instruments: Disclosures."

The IASB issued amendments to IFRS9 that address the following topics:

- Derecognition of a financial liability settled through electronic transfer
- Classification of financial assets: contractual terms that are consistent with a basic lending agreement
- Classification of financial assets: assets with non-recourse features
- Classification of financial assets: contractually linked instruments

The IASB also issued the following amendments to IFRS7:

- Disclosures: investments in equity instruments designated at fair value through other comprehensive income.
- Disclosures: contractual terms that could change the timing or amount of contractual cash flows on the occurrence (or non-occurrence) of a contingent event.

The need for these amendments was identified as a result of the IASB's post-implementation review of the classification and measurement requirements of IFRS9.

Amendments are effective for annual periods beginning on January 1, 2026. Early adoption is permitted. An entity is required to apply the amendments retrospectively, in accordance with IAS8 "Accounting Policies, Changes in Accounting Estimates and Errors" in its following annual financial statements unless otherwise specified. An entity is not required to restate prior periods.

Management assessed the impact of adopting this Standard and reached the conclusion that the amendments to IFRS 9 and IFRS 7 do not have significant effects on the Bank's accounting policies. The derecognition of assets and liabilities in accordance with IFRS 9 is maintained, with no implications for contingent clauses or changes in classification. The disclosures required by IFRS 7 are covered in the notes to the Financial Statements

Update to IFRS19 Subsidiaries without Public Accountability: Disclosures

The IASB has issued amendments to IFRS19 "Subsidiaries without Public Accountability: Disclosures", thereby completing the planned update process of this Standard.

Issued in May 2024, the Standard allows eligible subsidiaries to apply IFRS with reduced disclosure requirements. Initially, it considered reductions for standards issued up to February 28, 2021. However, with the aforementioned amendments, the application of IFRS is extended to the following standards and amendments issued between February 28, 2021 and May 1, 2024:

- The IASB reduced disclosure requirements by excluding disclosure objectives related to Supplier Finance Arrangements (Amendments to IAS7 "Statement of Cash Flows" and IFRS7 "Financial Instruments: Disclosures"), Lack of Exchangeability (Amendments to IAS21 "The Effects of Changes in Foreign Exchange Rates"), the standards on the Pillar two model (Amendments to IAS12 "Income Taxes"), Classification and Measurement of Financial Instruments, and Non-current Liabilities with Covenants (Amendments to IFRS9 "Financial Instruments" and IFRS7 "Financial Instruments: Disclosures").
- Reduced disclosure requirements related to Supplier Finance Arrangements (Amendments to IFRS9 "Financial Instruments" and IFRS7 "Financial Instruments: Disclosures").
- Excluded disclosure requirements that, are in fact, guidance, not requirements.
- Replaced disclosure requirements related to Management-defined performance measures (MPMs) by a cross-reference to IFRS18 "Presentation and Disclosure in Financial Statements".

With these modifications, IFRS19 will incorporate all changes to IFRS which are effective for annual periods beginning on or after January 1, 2027, the date on which this Standard will become effective. Early application is permitted, provided that IFRS19 is applied in aggregate.

Lastly, the IASB also indicated that IFRS19 will be updated in the future whenever new IFRS Standards establishing reduced disclosure requirements are issued, thereby ensuring its continued alignment with the accounting framework.

The Bank's Management is assessing the impact of adopting these amendments.

Translation to a Hyperinflationary Presentation Currency (Amendments to IAS21)

The IASB issued on November 13, 2025, this amendment to require an entity whose functional currency is that of a non-hyperinflationary economy, but whose presentation currency is that of a hyperinflationary economy, to translate all amounts in its financial statements, including comparative amounts, using the closing exchange rate at the date of the most recent statement of financial position (new paragraph 41A of IAS21).

When the entity's presentation currency ceases to be the currency of a hyperinflationary economy and its functional currency remains the currency of a non-hyperinflationary economy, the entity prospectively applies (without retranslation of comparative amounts) the normal method for translating foreign transactions. That is, the assets and liabilities in each statement of financial position are translated at the closing exchange rate on the date of that statement of financial position, the income and expenses are translated at the exchange rates prevailing on the date of the transaction (or, where appropriate, at an average exchange rate), and the resulting foreign currency translation differences are recognized in other comprehensive income.

Additionally, the amendments require a different approach when an entity's functional currency and presentation currency are the currency of a hyperinflationary economy (or currencies of different hyperinflationary economies) and the entity translates the profit or loss and financial position of a foreign operation whose functional currency is that of a non-hyperinflationary economy. In such circumstances, the entity is required to restate the comparative amounts of that foreign operation included in previously issued financial statements, applying the general price index applicable to the corresponding figures for the prior reporting period, in accordance with paragraph 34 of IAS29 "Financial Reporting in Hyperinflationary Economies". Entities must disclose that they have applied the new translation method, including summarized financial information about their foreign operations translated using such method.

Amendments are effective for annual periods beginning on or after January 1, 2027 and are applied retrospectively with certain transition provisions. Early application is permitted.

An entity whose functional currency and presentation currency are the currency of a hyperinflationary economy (or currencies of different hyperinflationary economies) and the entity translates profit or loss and financial position of foreign operations whose functional currency is that of a non-hyperinflationary economy is required to:

- i. apply the amendments from the beginning of the annual period in which the amendments are first applied;
- ii. restate the comparative amounts of its foreign operations included in the entity's previously issued financial statements by applying the general price index to which it applies the corresponding figures in accordance with paragraph 34 of IAS 29; and
- iii. disclose summary comparative financial information about its foreign operations and label such information to identify that the entity prepared the information applying the provisions of paragraph ii.

In addition to that indicated above, the entity must apply the amendments retrospectively in accordance with IAS 8 "Basis of Preparation of Financial Statements".

An entity is not required to disclose information that would otherwise be required under paragraph 28(f) of IAS8. Similarly, an entity that applies IFRS19 “Subsidiaries without Public Accountability: Disclosures” is not required to disclose the information that would otherwise be required by paragraph 1178(f) of IFRS19.

The Bank’s Management is assessing the impact of adopting these amendments.

Note 4 Changes in accounting policies

Mandatory Implementation of the New Allowances Model for Consumer Loans

On March 6, 2024, the CMF issued Circular No. 2346, which amended Chapters B-1 and E of the Compendium of Accounting Standards for Banks, establishing a new standardized and mandatory methodology for calculating allowances related to consumer loans. This new methodology considers parameters defined by the regulator, such as the probability of default and loss given default, taking into account, among other factors, the debtor’s delinquency history in the financial system and the existence of mortgage loans.

The new methodology became applicable as of the accounting close of January 2025 and has been fully implemented in these Consolidated Financial Statements.

Considering that this amendment is a change in accounting estimate, the effect of the new model as at the accounting close of January 2025 is presented below.

Internal Model MCh\$	Estándar Model MCh\$	Impact MCh\$
143,368	206,499	63,131

During the year ended December 31, 2025, there have been no significant changes in accounting policies affecting the interpretation of these Consolidated Financial Statements.

Note 5 Significant events

Sanction imposed by the CMF

On February 19, 2025, the CMF imposed a fine on Scotiabank Chile of UF 400, due to a breach of the provisions of Article 16 of Law No. 18010.

Dividends paid

On April 24, 2025, accordance with Articles No. 9 and No. 10 of Law No.18045 on the Securities Market and Chapter No.18-10 of the Updated Compilation of Standards (RAN), the Company communicated as essential information that on such date the shareholders at the Ordinary Shareholders' Meeting of Scotiabank Chile (the "Bank") agreed, among other matters, to distribute 50% of the profit obtained during 2024; i.e., Ch\$216,471,947,563, equivalent to a dividend of Ch\$17.67856 per share and destine the remaining balance to the reserve fund for undistributed profits.

Basel III

On January 17, 2025, through Exempt Resolution No. 780, the CMF reported that, considering the terms of Article 66 quinquies of the General Banking Law and the provisions of Chapter 21-13 of the RAN, the Pillar II requirement at the consolidated level decreased from the 1% required in 2024 to 0.25% of risk-weighted assets net of required allowances for 2025, which has been fully constituted from June 2024.

Note 6 Business Segments

Scotiabank Chile is a universal bank offering a great variety of products and financial services to various kinds of customers, ranging from major corporations and financial institutions to low/medium income individuals, which are classified in different segments referred to their business characteristics.

Scotiabank creates value in a sustainable manner, giving customers the opportunity to choose their world through a range of financial products and services for our diverse segments.

In conformity with IFRS8 "Operating Segments", the Bank has added the operating segments with similar economic characteristics considering the aggregation criteria indicated in such standard. The Bank performs its business activities by lines of business, which have been defined based on the target customers. Scotiabank Chile targets the following market segments which are defined as Retail Banking (Personal and SMEs), Wholesale Banking, CAT, Treasury and Others. A business segment comprises customers to whom a differentiated product offering is directed according to their commercial characteristics, measured on a similar basis in terms of performance.

Information included in this note is not necessarily comparable to that of other financial institutions as it is based on the internal system of management information according to the segments set up independently by the Bank. Each business segment reflects its gross operating income, supporting expenses and net provisions for risk along with their related assets and liabilities. Taxes are managed at the corporate level and are not allocated by business segment.

As the Bank's business is based in Chile, it is not relevant to present information for Geographical Segments.

The following are the business segments established by the Bank:

1. Retail

Personal Banking: This segment addresses individual customers whose income is over US\$500. The main products offered by the Bank in this segment include consumer loans, overdraft credit line, credit cards, and mortgage loans. In addition, the Bank has liability products for this tranche and offers chequing accounts and diverse saving products such as term deposits, agreements, mutual funds and short-term investments. In addition, the Bank provides this segment of customers with a variety of financial services such as foreign currency exchange, shares sales, insurance products, and self-service in branch offices where customers can directly perform a series of transactions in their own account.

SME banking: As Corporate Banking, we have focused our efforts on attracting and linking corporate clients and individuals with business activities, belonging to different economic sectors such as services, commerce, transportation and agriculture, and where annual sales do not exceed MUS\$4. Our value proposition is based on providing financial services of excellence through asset and liability products, such as commercial loans, lease contracts, factoring transactions, current account plans, insurance, investment products, foreign trade and cash management.

2. Wholesale banking

This business segment includes enterprise customers with annual sales over MUS\$4 and corporate customers with annual sales over MUS\$150. The main products offered by the Bank to this segment include working capital financing, foreign trade loans, lease operations, factoring transactions and structured finance (syndicated loans, project finance, etc.). These customers also use liability products such as domestic and foreign currency chequing accounts, term deposits and mutual funds.

Additionally, the Bank provides a wide range of non-credit services such as collection, bill payment, insurance products, salary payment administration, quotation and procurement, electronic invoicing and a wide range of treasury products such as foreign currency exchange, derivative products, foreign currency or interest rate risk hedging and short-term investments.

3. CAT

This segment groups credit cards and consumer loans offered within the framework of the binding partnership agreement entered into with Cencosud S.A., by way of which the bank acquired 51% of the shares of CAT Administradora de Tarjetas S.A. ("CAT") and of CAT Corredores de Seguros y Servicios S.A., with the purpose of the joint and exclusive performance of the financial retail business of Cencosud in Chile.

4. Treasury

This segment performs the global functions of interest rate risk management, structural exchange rate position, inflation position and liquidity risk management. The latter, through the performance of issues and uses. In addition to the management of the available-for-sale investment portfolio. Likewise, the Bank's own resources, the capital endowment made to each unit and the cost of financing the investments made are also managed.

The segment includes revenue associated with the management of the investment portfolio and gains or losses from the management of interest rate and inflation risks.

5. Other

This segment includes all items that bear no connection with customer segments and other minor income and expenses not related to any of the above-mentioned lines of business.

The following table shows the consolidated income of Scotiabank Chile, for each of the abovementioned segments:

	As at December 31, 2025					
	Retail MCh\$	Wholesale MCh\$	CAT MCh\$	Treasury MCh\$	Other MCh\$	Total MCh\$

Total	-	26,198	475,021	-	191,167	416,272	661,864	1,770,522

d) Accounting hedge derivatives

As derivative instruments are important tools to manage the exchange rate, interest rate and liquidity risks of the Bank's activities, its designation as hedge accounting allows the recognition, under certain circumstances, of the offsetting effects of economic hedges, which reduce the volatility that may arise in profit or loss and cash flows, as through such hedges the gains and losses of the derivative and hedged item are recognized and offset during the same accounting period.

Balances by risk management are presented below:

As at December 31, 2025	Nominal amount of the hedging instrument MCh\$	Carrying amount of the hedging instrument	
		Assets MCh\$	Liabilities MCh\$
Cash flow hedges:			
Interest rate risk			
Rate Swap	1,424,274	8,495	(14,503)
Cross currency swap	-	-	-
Exchange rate risk			
Rate Swap	-	-	-
Cross currency swap	2,363,859	110,003	(132,818)
Inflation risk			
Inflation insurances	774,696	5,687	(685)
Cross currency swap	6,842,186	26,122	(1,366,887)
Subtotal	11,405,015	150,307	(1,514,893)
Fair value hedges:

Subtotal	10,042,423	258,983	(1,538,946)
Fair value hedges:			
Interest rate risk			
Rate Swap	854,495	3,397	(1,841)
Inflation risk			
Cross currency swap	447,431	67,883	(13,283)
Subtotal	1,301,926	71,280	(15,124)
Total	11,344,349	330,263	(1,554,070)

d.1) Fair value accounting hedge derivatives

For fair value hedges, changes in fair value of hedge instruments are offset in the Consolidated Statements of Income through fair value of the hedged item attributable to the hedged risk. The Bank uses fair value hedges primarily to translate fixed rate financial instruments to floating rate financial instruments. Hedged items include commercial loans granted at fixed rate in foreign currency and term deposits issued at a fixed rate in pesos.

Additionally, the Bank uses fair value hedges to hedge the effect of inflation of debt instruments held for the sale of the Chilean General Treasury bonds in UF (BTU). Also, to hedge against the effect of the inflation of Bonds issued by the Bank in UF.

Hedging instruments include cross-currency interest rate swaps (CC and IRS).

d.2) Cash flow accounting hedge derivatives

For cash flow hedges, the changes in fair value of the hedging instruments are recorded in equity, to the extent that it is effective, until the corresponding gains or losses associated with the hedged item are recognized in profit or loss. The Bank uses cash flow hedges primarily to hedge the fluctuations in cash flows related to floating rate financial instruments, foreign currency and highly probable projected income. Hedged items include mortgage loans in UF, term deposits at floating rate in Chilean pesos, floating rate foreign currency foreign bank borrowings, available-for-sale securities in Euro, and commercial loans granted at floating rate in foreign currency. Hedging instruments include forward contracts and cross-currency interest rate swaps (CC and IRS).

As at December 31, 2025, the Bank has recorded a loss, net of tax of MCh\$24,647 (gain of MCh\$15,953 as at December 31, 2024) in other comprehensive income for the adjustment of cash flow hedging instruments.

As at December 31, 2025, a loss from cash flow hedge derivatives of MCh\$250,873 (loss of MCh\$58,866 as at December 31, 2024) was recognized in profit or loss, which includes the ineffective portion for changes in fair value of the hedge and the effects on profit or loss of the hedge as the hedged item affects profit or loss.

Cash flows of hedged items are expected to occur and impact the gain or loss from cash flow accounting hedges as detailed below.

As at December 31, 2025	On-demand	Up to 1 month	More than 1 up to 3 months	More than 3 up to 12 months	More than 1 up to 3 years	More than 3 up to 5 years	More than 5 years	Total

Ineffectiveness of accounting hedges

The amounts recorded as ineffectiveness by type of hedge, recorded in the Consolidated Statements of Income, are presented below.

	12/31/2025 MCh\$	12/31/2024 MCh\$
<u>Fair value hedges</u>		
Gain (loss) recorded on the hedged items	4,756	(1,006)
Gain (loss) recorded on hedging instruments	(4,608)	1,083
Ineffectiveness	148	77
<u>Cash flow hedges</u>		
Ineffectiveness	(1,960)	(1,891)

The ineffectiveness and the reclassified amount of the cash flow hedge reserve to profit or loss for the year, by type of risk management, are presented below.

As at December 31, 2025	Hedge ineffectiveness recognized in the result for the year MCh\$	Amount reclassified from the cash flow hedge reserve to profit for the year MCh\$
Interest rate risk	(118)	(118,998)
Exchange rate risk	3	(133,337)
Inflation rate risk	(1,845)	1,462
Total	(1,960)	(250,873)

As at December 31, 2024	Hedge ineffectiveness recognized in the result for the year MCh\$	Amount reclassified from the cash flow hedge reserve to profit for the year MCh\$
Interest rate risk	(96)	(57,516)
Exchange rate risk	138	42,626
Inflation rate risk	(1,933)	(43,976)
Total	(1,891)	(58,866)

Note 13 Financial assets at amortized cost

Financial assets at amortized cost are detailed as follows:

	12/31/2025 MCh\$	12/31/2024 MCh\$
Rights under resale agreements and securities lending agreements	207,785	262,360
Financial debt securities	19,989	25,767
Loans and advances to banks	22,063	1,564
Loans and advances to customers	31,588,950	31,955,208
Total	31,838,787	32,244,899

a) Rights under resale agreements and securities lending agreements

The detail of this line item is as follows:

	12/31/2025 MCh\$	12/31/2024 MCh\$
Operations with domestic banks	-	-
Operations with foreign banks	-	-
Operations with other domestic entities		
Repurchase contracts	207,790	262,364
Securities lending rights	-	-
Transactions with other entities abroad	-	-

i) Lease operations

Gross loans for finance lease contracts have the following remaining terms until maturity:

	12/31/2025			12/31/2024		
	Account receivable	Interest and deferred VAT	Net balance receivable	Account receivable	Interest and deferred VAT	Net balance receivable
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
On-demand	1,886	(33)	1,853	1,107	(30)	1,077
Up to one month	1,401	(232)	1,169	693	(116)	577
More than one up to three months	385,841	(80,296)	305,545	395,445	(76,064)	319,381
More than three months up to one year	11,448	(2,005)	9,443	6,363	(1,265)	5,098
More than one up to three years	402,288	(96,499)	305,789	374,996	(90,363)	284,633
More than three up to five years	61,444	(11,367)	50,077	42,862	(7,505)	35,357
More than five years	381,225	(97,167)	284,058	372,548	(98,442)	274,106
Total	1,245,533	(287,599)	957,934	1,194,014	(273,785)	920,229

The Bank finances its customers for the acquisition of assets, both real estate and non-real estate, through finance lease contracts between 1 and 20 years depending on each contract, which are presented under "finance lease operations" in the Consolidated Statements of Financial Position.

As at December 31, 2025, MCh\$295,619 corresponds to finance leases on real estate (MCh\$264,055 as at December 31, 2024) and MCh\$662,315 to finance leases on non-real estate (MCh\$656,174 as at December 31, 2024).

Interest and indexation income on receivables from finance leases of real estate and non-real estate is disclosed in Note 30 "Interest income and expenses" and Note 31 "Indexation income and expenses."

j) Sale of loans for higher education studies per Law No. 20027

Pursuant to the provisions of the public bidding bases for the award of financing and credit administration service for senior education of Law No. 20027, the Bank sold to the Chilean Treasury a percentage of the related loan portfolio, transferring substantially all the risks and benefits associated with the loans assigned. Only the administration service of the transactions sold was maintained, which considers granting new loans and their collection.

The summary of sales performed is as follows:

Concept	12/31/2025 MCh\$	12/31/2024 MCh\$
Par value	16,174	21,673
Provisions	(731)	(886)
Net value of provisions	15,443	20,787
Sale value	18,853	26,768
Sale result (*)	3,410	5,981
(Loss) profit in sale (**)	1,676	2,430
Income received in advance	1,734	3,551

(*) The gain or loss on the sale is obtained from the sales value less the net value of allowances.

(**) The gain (loss) on sale is included in the Consolidated Statements of Income under the caption "Net financial result from derecognition of financial assets and liabilities at amortized cost and financial assets at fair value through other comprehensive income."

Deferred income/revenue corresponds to revenue obtained for the interest rate spread of loans granted at a rate of 2%. Deferred income/revenue is included in caption "Other liabilities" in the Consolidated Statements of Financial Position.

k) Sale of Loans

During the year from January 1 through December 31, 2025, no assignments of loans from the commercial or retail portfolio (as at December 31, 2024 a gain of MCh\$293 from assignment of loans of the commercial portfolio and loss of MCh\$36 from the sale of loans written-off in the retail portfolio), in the caption "Gain or loss on derecognition of financial assets and liabilities at amortized cost and financial assets at fair value through other comprehensive income."

During the year from January 1 through December 31, 2025, the subsidiary Bandesarrollo Sociedad de Leasing Inmobiliario S.A., recorded a realized gain from the assignment of portfolio of MCh\$47 (a gain of MCh\$65 as at December 31, 2024), in the caption "Gain or loss on derecognition of financial assets and liabilities at amortized cost and financial assets at fair value through other comprehensive income."

I) Securitization

The subsidiary Bandesarrollo Sociedad de Leasing Inmobiliario S.A. maintains in its statement of financial position financial assets transferred and not derecognized, as it retains substantially all the risks and rewards, mainly the credit risk. Under the agreement, customers remit cash directly to the subsidiary and the subsidiary transfers the proceeds to the final beneficiary.

The information below shows the carrying amount of financial assets that have been transferred but not derecognized and their associated liabilities:

	12/31/2025	12/31/2024
	MCh\$	MCh\$
Housing loan portfolio	1,076	1,986
Carrying amount of associated liabilities	557	1,595

As at December 31, 2025, the subsidiary Bandesarrollo Sociedad de Leasing Inmobiliario S.A. recognizes a liability pending repayment of MCh\$557 (MCh\$1,595 as at December 31, 2024), related to the price obtained or part of the price obtained in 2006, in sales of housing lease contracts portfolio for securitization purposes, but such portfolios have not been derecognized, following the instructions issued by the CMF. Not derecognizing the fully or partially-assigned assets is due to the fact that the subsidiary acquired the securitized subordinated bonds issued by the separate equity constituted with such assets, which implies the retention of significant risks and rewards associated with such assets.

Total depreciation	(66,306)	(25,320)	(91,626)
Balance as at December 31, 2025	118,142	14,327	132,469
Gross balance:			
Balance as at January 1, 2024	189,843	41,055	230,898
Adjustment due to liability remeasurement	5,706	-	5,706
Additions	2,026	44	2,070
Increase due to contract modification	110	-	110
Decrease due to contract modification	(8,943)	-	(8,943)
Reclassifications (*)	-	21	21
Withdrawals / Derecognition	(2,222)	(457)	(2,679)
Gross Total	186,520	40,663	227,183
Accumulated depreciation as at January 1, 2024	(48,726)	(22,603)	(71,329)
Impairment	-	-	-
Depreciation for the year	(11,737)	(2,246)	(13,983)
Decrease due to contract modification	1,010	-	1,010
Withdrawals / Derecognition	1,805	457	2,262
Total depreciation	(57,648)	(24,392)	(82,040)
Balance as at December 31, 2024	128,872	16,271	145,143

(*) Mainly relates to amounts for which in the beginning there is no individual identification. Upon completion of the purchase or construction (for the remodeling of leased offices) these are transferred to the final asset.

Debits for depreciation of right-of-use assets are included under "Depreciation and amortization" in the Consolidated Statements of Income.

The Bank's lease contracts consist mainly of real estate leases, intended for the performance of its operating functions. Contracts contain renewal options and for those for which there is reasonable certainty that this option will be exercised, the lease term used to measure the liability and the asset corresponds to an estimate of future renewals.

As at December 31, 2025 and 2024, the Bank has no expenses related to leases of low value. Expenses related to short-term leases amount to MCh\$7,536 as at December 31, 2025 (MCh\$5,468 as at December 31, 2024) and are included under the caption "Administrative expenses" of the Consolidated Statements of Income.

Income received from the sub-lease on right-of-use assets amount to MCh\$686 as at December 31, 2025 (MCh\$228 as at December 31, 2024), which are recorded in the caption "Other Operating Income" in the Consolidated Statements of Income.

As at December 31, 2025 and 2024, no gains or losses were generated from sale with leaseback transactions.

c) Liabilities under lease contracts

Movements of liabilities under lease contracts and cash flows are detailed as follows:

Lease liability	Movements for the years ended	
	12/31/2025	12/31/2024
	MCh\$	MCh\$
Balances as at January 1	138,208	149,308
Lease liabilities generated	-	2,026
Modification of contract	473	(7,823)
Modification of contract- subsidiaries	-	-
Interest expense	4,428	4,400
Capital payments (*)	(10,435)	(10,560)
Interest payments (*)	(4,428)	(4,400)
Contract adjustments	4,046	5,706
Payments due to cancellation /termination of leases	(4,153)	(449)
Total	128,139	138,208
(*) Total Payments associated with lease liabilities in the year	(14,863)	(14,960)

d) Cash flows from liabilities under lease contracts

The Bank holds lease contracts on certain assets for its operating functions. The table below shows the analysis of the cash flows of contractual maturities:

Lease contracts flows	Up to 1 month	Between 1 and 3 months	Between 3 months and 1 year	Between 1 and 5 years	More than 5 years	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
As at December 31, 2025	1,221	2,445	11,003	54,634	91,153	160,456
As at December 31, 2024	1,261	2,471	11,144	59,128	103,641	177,645

Note 18 Taxes

a) Current taxes

	12/31/2025 MCh\$	12/31/2024 MCh\$
Assets:		
Income tax, 27% tax rate	(10,748)	(9,184)
One-off tax under Article No. 21, 40% tax rate	-	-
Less:		
Monthly tax provisional payments	21,248	12,683
Credit for training expenses	402	333
Credit 104 Income Tax Law	-	-
Previous year recoverable tax	-	-
Other	8	-
Total current tax asset	10,910	3,832
Liabilities:		
Income tax, 27% tax rate	(121,462)	(111,429)
One-off tax under Article No. 21, 40% tax rate	(28)	(28)
Previous year income tax	-	-
Less:		
Monthly tax provisional payments	88,678	91,719
Credit for training expenses	709	541
Previous year recoverable tax	591	15,340
Credit 104 Income Tax Law	1,806	1,431
Other	(290)	(141)
Total current tax liability	(29,996)	(2,567)

b) Tax benefit (expense)

The effect of tax expense is composed of the following:

	12/31/2025 MCh\$	12/31/2024 MCh\$
Income tax expenses:		
Current year tax	(150,830)	(142,880)
Excess (deficit) allowance previous year	1,516	(2,321)
Previous years tax	-	-
Credit (charge) due to deferred taxes:		
Origination and reversal of temporary differences current year	68,982	49,965
Origination and reversal of temporary differences prior year	(1,915)	718
Subtotal	(82,247)	(94,518)
Tax for rejected expenses Article No. 21	(28)	(28)
Other	-	-
Net charge to Income due to income tax	(82,275)	(94,546)

The Bank presents no taxes from discontinued operations for the years ended December 31, 2025 and 2024.

c) Effect of taxes recorded in equity

The effect of taxes recorded in equity correspond to the following concepts:

	12/31/2025 MCh\$	12/31/2024 MCh\$
Deferred taxes:		
Financial investments at fair value with changes in other comprehensive income	(12,905)	(9,232)
Employee defined benefit plans	15	61
Bonds with no fixed term of maturity	(97)	1,019
Subtotal deferred taxes	(12,987)	(8,152)
Current taxes:		
Derivatives in cash flow hedges	3,216	22,135
Bonds with no fixed term of maturity	15,030	54
Subtotal current taxes	18,246	22,189
Total (charge) credit in equity	5,259	14,037

d) Deferred tax assets and liabilities

Taxable and deductible differences that make up the deferred tax balances are detailed as follows:

Concept	12/31/2025 MCh\$	12/31/2024 MCh\$
Deferred tax assets associated to goodwill	-	-
Deferred tax assets associated with mortgage servicing rights	-	-
Deferred tax assets associated with other intangibles	12,660	3,194
Deferred tax assets associated with defined benefit pension plans	687	576
Deferred tax assets associated with deductible temporary differences	-	-
Loans provisions	276,244	248,180
Financial penalties of loans thar are tax assets	-	-
Income from interest and adjustments with accrual suspended for loans in impaired portfolio	23,664	22,245
Provisions for employee benefit obligations	8,621	8,480
Leasing operations	82,869	40,185
Tax-financial differences of property and equipment	11,970	11,915
MTM Financial instruments for trading and other investments	7,757	23,104
Sundry provisions	3,126	3,910
Other	14,118	13,475
Deferred tax assets not associated with deductible temporary differences	-	-
Unused Bank Tax Losses	-	-
Unused tax losses of subsidiaries	4,795	4,322
Unused tax credits	-	-
Deferred taxes with changes in equity	10,625	23,627
Other	-	-
Total deferred tax assets	457,136	403,213
Deferred tax liabilities associated to goodwill	-	-
Deferred tax liabilities associated with mortgage servicing rights	-	-
Deferred tax liabilities associated with other intangibles	-	-
Deferred tax liabilities associated with defined benefit pension plans	-	-
Deferred tax liabilities associated with taxable temporary differences	-	-
Tax- financial differences of property, equipment	(635)	(836)
Leasing operations	-	-
Changes in the fair value of financial assets at fair value through other comprehensive income	-	-
Other changes in accumulated other comprehensive income	-	-
Other	-	-
Deferred tax liabilities not associated with taxable temporary differences	-	-
Goodwill for significant investments in companies measured using equity method (associates and/or joint ventures)	-	-
Total deferred tax liabilities	(635)	(836)

e) Reconciliation of effective tax rate

The reconciliation between income tax rate and effective rate applied for determining tax expense is detailed in the table below.

	Tax rate %	12/31/2025 MCh\$
Income before taxes		380,880
Income before corporate income tax	27.00%	134,742
Permanent differences		
Price-level restatement on tax equity	(9.67%)	(48,241)
Other permanent differences	(1.07%)	(5,361)
Taxes not recognized on profit or loss in previous years		
Prior year effect	0.08%	411
Other	0.14%	696
Effective rate and current year income tax proceeds	16.48%	82,247
One-off tax under Article No. 21	0.01%	28
Total income tax expense	16.49%	82,275

	Tax rate %	12/31/2024 MCh\$
Income before taxes		551,869
Income before corporate income tax	27.00%	149,005
Permanent differences		
Price-level restatement on tax equity	(10.03%)	(55,335)
Other permanent differences	0.93%	5,141
Taxes not recognized on profit or loss in previous years		
Prior year effect	0.29%	1,616
Other	(1.07%)	(5,909)
Effective rate and current year income tax proceeds	17.12%	94,518
One-off tax under Article No. 21	0.01%	28
Total income tax expense	17.13%	94,546

f) Joint Circular No.47 issued by the Chilean IRS and No.3478 issued by the CMF

Transactions and effects generated by the application of article 31, number 4 of the Income Tax Law is detailed below. This information relates solely to the Bank's loan transactions and does not consider the operations of subsidiaries which consolidate in these Consolidated Financial Statements.

Loans and accounts receivable from customers as at 12/31/2025

Type of loan	Assets at carrying amount in the Financial Statements(*)		Assets at tax value

(*) In accordance with the abovementioned Circular and instructions issued by the Chilean Internal Revenue Service, the value of assets in financial statements is presented on an individual basis and does not include lease operations and factoring transactions.

Note 19 Other assets

Other assets are detailed as follows:

	12/31/2025	12/31/2024
	MCh\$	MCh\$
Assets to assign in financial leasing as lessor	12,870	8,846
Cash guarantees delivered for derivative financial operations	728,223	653,581
Accounts receivable from third parties	147,006	127,750
VAT tax credit receivable	9,414	7,994
Prepaid expenses	9,792	15,013
Income asset from usual activities from contracts with customers	2	-
Other cash collateral provided	7,314	6,560
Outstanding operations	9,825	9,500
Other assets	12,213	18,810
Total other assets	936,659	848,054

Note 20 Non-current assets and disposal groups held for sale and liabilities included in disposal groups held for sale

a) This line item is detailed as follows:

Concept	12/31/2025	12/31/2024
	MCh\$	MCh\$
Assets received in payment or adjudicated in judicial auction		
Goods received in payment (*)	2,084	1,308
Assets adjudicated in judicial auction	26,277	16,234
Provisions for goods received in payment or adjudicated in judicial auction	(24)	(7)
Subtotal	28,337	17,535
Non-current assets held for sale		
Investments in companies	-	-
Intangible assets	-	-
Property and equipment	1,832	1,832
Assets for recovery of goods transferred in financial leasing operations	1,162	1,368
Other assets	-	-
Subtotal	2,994	3,200
Disposal groups for sale	-	-
Total non-current assets and disposal groups for sale	31,331	20,735

(*) Assets received in lieu of payment correspond to assets received for the payment of customers' past due debt obligations. The group of assets acquired as such must not exceed 20% of the Bank's effective equity at any time. These assets currently represent 0.04% (0.02% as at December 31, 2024) of the Bank's effective equity.

As at December 31, 2025 and 2024, the Bank has no liabilities included in disposal groups held for sale.

b) Movements in non-current assets and disposal groups held for sale and liabilities included in disposal groups held for sale:

e) Actuarial assumptions for employee benefits

The main weighted average assumptions to determine the employee benefit obligations at the end of the period are detailed as follows:

	Provision of long-term employee benefits		Provision of benefits to employees for termination of employment contract	
	12/31/2025	12/31/2024	12/31/2025	12/31/2024
Discount rate	6.75%	6.50%	6.75%	6.50%
Salary increase rate	N/A	N/A	6.50%	6.00%
Rate of inflation	4.50%	4.00%	4.50%	4.00%

The main weighted average assumptions to determine the cost of the defined benefit are:

	Provision of long-term employee benefits		Provision of benefits to employees for termination of employment contract	
	12/31/2025	12/31/2024	12/31/2025	12/31/2024
Discount rate	6.75%	6.50%	6.75%	6.50%
Salary increase rate	N/A	N/A	6.50%	6.00%
Rate of inflation	4.50%	4.00%	4.50%	4.00%

The main demographic assumptions used for both benefits are shown in the table below.

Years	As at December 31, 2025						As at December 31, 2024

Note 28 Equity

a) Distribution of shares

As at December 31, 2025 and 2024, the Bank's authorized capital is composed of 12,244,885,748 registered, single series shares with no par value, all of them subscribed and fully-paid.

	As at 12/31/2025	As at 12/31/2024
Number of shares	12,244,885,748	12,244,885,748
Issuance of paid shares	-	-
Issuance of subscribed and unpaid shares	-	-
Issued shares	12,244,885,748	12,244,885,748

As at December 31, 2025 and 2024, the Bank or subsidiaries included in consolidation do not hold treasury shares.

As at December 31, 2025 and 2024, the distribution of shares is as follows:

Name of shareholder or Company name	As at December 31, 2025		As at December 31, 2024	
	Number of shares	Ownership %	Number of shares	Ownership %
Nova Scotia Inversiones Ltda.	12,219,875,618	99.80%	12,219,875,618	99.80%
Other minority shareholders	25,010,130	0.20%	25,010,130	0.20%
Total	12,244,885,748	100.00%	12,244,885,748	100.00%

b) Capital increases

During the period between January 1 and December 31, 2025 and 2024, there were no capital increases.

c) Dividends paid and reserves

At the Ordinary Shareholders' Meeting of Scotiabank Chile held on April 24, 2025, the shareholders agreed to distribute 50% of the profit for 2024 totaling Ch\$216,472 equivalent to a dividend of Ch\$17.67856 per share, and allocate the remainder to the reserve fund for undistributed profits.

At the Ordinary Shareholders' Meeting of Scotiabank Chile held on March 28, 2024, the shareholders agreed to distribute 30% of the profit for 2023 totaling MCh\$122,388 equivalent to a dividend of Ch\$9.99505 per share and allocate the remainder to the reserve fund for undistributed profits.

d) Earnings per share

Basic earnings per share:

It is calculated by dividing the profit or loss for the year, less preference shares, by the weighted average number of ordinary and investment shares outstanding during the year.

Diluted earnings per share:

Dilution is the reduction in earnings per share or increase in loss per share resulting from the assumption that convertible instruments will be converted, that options or warrants will be exercised or that ordinary shares will be issued, if the expected conditions are met.

As at December 31, 2025 and 2024, the detail of diluted earnings and basic earnings is as follows:

	Balance as at 12/31/2025	Balance as at 12/31/2024
Result attributable to the owners of the Bank (MCh\$)	433,906	432,944
Weighted average number of shares	12,244,885,748	12,244,885,748
Earning per share (in Chilean pesos)	35.44	35.36

As at December 31, 2025 and 2024, the Bank does not have instruments generating dilutive effects.

e) Provision for payment of interest of bonds with no fixed maturity date

The Bank records the accrual of interest on bonds with no fixed maturity period in the provisions for dividends, payment of interest and reappreciation of regulatory capital financial instruments issued, in accordance with the instructions issued by the CMF for this type of instruments. As at December 31, 2025 and 2024, the equity effect on this item amounts to MCh\$3,281 and MCh\$3,624, respectively.

f) Other comprehensive income:

The detail of other comprehensive income is as follows:

Sources of changes in Accumulated Other Comprehensive Income (MCh\$)	Items that will not be reclassified in income				Items that can be reclassified in income							
	New measurements of the liability (asset) for net defined benefits and actuarial results for other employee benefit plans	Net changes in fair value of equity instruments designated at fair value with changes in other comprehensive income	Income Tax	Subtotal	Changes in the fair value of financial assets at fair value with changes in other comprehensive income	Translation differences by entities abroad	Accounting hedging of net investments in entities abroad	Cash flow accounting hedge	Participation in other comprehensive income of entities registered under equity method	Other	Income Tax	Subtotal

b) Contingencies

As at the date of issuance of these Consolidated Financial Statements there are legal actions filed against the Bank and its subsidiaries regarding operations inherent to the business. As at December 31, 2025, provisions for legal contingencies amounted to MCh\$5,063 (MCh\$7,067 as at December 31, 2024), which are part of item "Provisions for contingencies" in the Consolidated Statements of Financial Position.

Regarding the legal actions filed against the Bank and its subsidiaries, Management believes, as reported by its Attorney's Office on the basis of the status and background available to date of such legal actions, that sufficient provisions have been made for contingencies arising from litigation against the Bank and its subsidiaries and as such from the group of cases, there will be no significant losses not considered in these Consolidated Financial Statements.

c) Covenants

The Bank has four current financing contracts entered into with Export Development Canada on July 28, 2021 (MUS\$100), July 13, 2022 (MUS\$250), August 9, 2023 (MUS\$300) and June 5, 2024 (MUS\$200). These contracts establish the Bank's compliance with covenants related mainly to the provision of financial and non-financial information, regulatory compliance and compliance with certain obligations such as: compliance with the laws and authorizations necessary to perform its business and operations in general, perform all aspects necessary to preserve, renew and maintain its legal existence in full force and effect. Note that these financing agreements do not require compliance with specific financial ratios. As at December 31, 2025, the Bank has fully complied with each of the obligations arising from the aforementioned contracts.

d) Responsibilities

The Bank and its subsidiaries have the following responsibilities arising from the normal course of their businesses:

	12/31/2025	12/31/2024
	MCh\$	MCh\$
Documents in collection	70,184	70,904
Transferred financial assets managed by the Bank	1,039,014	1,248,488
Securities in custody	7,195,564	6,650,082
Assets in guarantee	3,458,205	3,703,718
Total	11,762,967	11,673,192

e) Guarantees due to operations

i) At Scotia Corredora de Bolsa Chile Limitada

For purposes of complying with the provisions of articles No. 30 and No. 31 of Law No.18045, the Company engaged an insurance policy No. 330-25-00039861 from MAPFRE Seguros Generales S.A. equivalent to UF20,000, to secure the proper and full compliance with its obligations as a Stockbroker, covering the period from April 22, 2025 through April 22, 2026.

In order to comply with the requirements of the Stock Exchanges, in terms of comprehensive insurance, the subsidiary engaged from Zurich Chile Seguros Generales S.A., a policy No. 0359292 for an insured amount of US\$1,000,000 covering the period from May 31, 2025 through May 31, 2026.

To guarantee the operations of the gross settlement compensation system, collateral securities were delivered to the Bolsa de Comercio de Santiago for MCh\$9,562 (collateral securities amounting to MCh\$9,214 as at December 31, 2024).

In accordance with the internal regulations of the Stock Exchange, in order to guarantee the proper performance of and compliance with the operations of Stockbrokers, as at December 31, 2025, guarantees were constituted on securities of MCh\$2,789 in favor of the Bolsa de Comercio de Santiago. In favor of the Bolsa Electronica de Chile guarantees were established on securities of MCh\$797 (as at December 31, 2024, guarantees were constituted on securities of MCh\$2,687 in favor of Bolsa de Comercio de Santiago, and guarantees were constituted on securities in favor of Bolsa Electronica de Chile of MCh\$768).

In order to guarantee share ledging transactions, as at December 31, 2025, cash of MCh\$848 was provided to Bolsa de Comercio de Santiago, and cash of MCh\$0 was provided to Bolsa Electronica de Chile (as at December 31, 2024, cash of MCh\$1,540 was provided to Bolsa de Comercio de Santiago and cash of MCh\$0 was provided to Bolsa Electronica de Chile).

As at December 31, 2025, the Company holds collateral for simultaneous transactions of MCh\$3,612 in Bolsa de Comercio de Santiago and of MCh\$7,648 in the Bolsa Electronica de Chile. (As at December 31, 2024, the Company holds collateral for simultaneous transactions of MCh\$3,027 in the Bolsa de Comercio de Santiago and of MCh\$3,988 in the Bolsa Electronica de Chile, which are held in the Custody Department of Bolsa de Comercio de Santiago or Bolsa Electronica de Chile).

ii) At Scotia Administradora General de Fondos Chile S.A.

On January 9, 2025, Scotia Administradora General de Fondos Chile S.A. renewed the guarantees until January 10, 2026 for each of the managed funds, in accordance with the provisions of Article 13 of Law No. 20,712 on the Administration of Third-Party Funds and Individual Portfolios. The guarantees constituted by the managed funds through guarantee bonds with Scotiabank Chile amount to a total of UF 1,269,859.21.

i) At Scotia Corredora de Seguros Chile Limitada

In accordance with the provisions of Article No. 58, letter D of DFL 251, as at December 31, 2025, the Company maintains insurance policies that protect it from possible damages that could affect it as a result of breaches of law, regulations and complementary standards that regulate insurance brokers, and especially when the breach arises from acts, errors and omissions of the broker, its representatives, attorneys-in-fact or dependents that participate in the intermediation.

Series A : N°1508686-1

Amount : UF60,000

In favor of : Scotiabank Chile

Purpose : To cover in accordance with the general terms of the professional civil liability for insurance brokers, registered with the policy record under POL120130969 of CMF.

Note 42 Gain or loss from discontinued operations

As at December 31, 2025 and 2024, the Bank does not have this type of operations.

Note 43 Related party disclosures

As established in Chapter 12-4 if the RAN, related parties are persons or entities that, directly or through third parties, hold an interest in the Bank's ownership when such interest exceeds 1 % of the shares, as well as persons who, without holding an interest in the Bank's ownership, have authority and responsibility in the planning, management and control of activities of the Bank or its subsidiaries. Persons or entities related to the Bank holding, directly, through third parties or both, a share higher than 5% are also considered related parties or where they act as director, general manager or other equivalent position.

Article 89 of the Law on Public Companies, also applied to banks, establishes that any transaction with a related party should be performed in fair conditions, similar to the ones commonly prevailing in the market.

On the other hand, article 84 of the General Banking Law establishes the limits for the loans that can be granted to related parties and the prohibition to grant loans to the directors, managers or general representatives of the Bank.

Term and other on-demand deposits	22	13,130,590	13,319,646
Liabilities under repurchase agreements and securities lending	22	501,243	500,972
Bank borrowings	22	2,455,157	2,492,091
Debt financial instruments issued	22	8,110,081	7,874,842
Other financial liabilities	22	199,572	199,572
Regulatory capital financial instruments issued	23	1,953,891	1,990,316

The fair value presented above does not attempt to estimate the value of the Bank's profit generated by its business, or future business activities, and accordingly, does not represent the value of the Bank as a going concern.

Analysis and explanation of calculations

For assets recorded at amortized cost, to determine their fair value, the market curve of each currency was used plus an estimate of the spread of each of the main types of products As at December 31, 2025 and 2024. The greatest differences occur in the values of the mortgage portfolio and the bonds issued, due to the fact that these are long-term. This has an influence on two key aspects:

- There are old loans/issues made at rates which are different from current rates.
- Value is more sensitive to rate fluctuations.

Fair value measurement and hierarchy

The Bank establishes a fair value hierarchy, which segregates the inputs and/or assumptions of the valuation techniques used in measuring the fair value of financial instruments. The hierarchy assigns the highest priority to quoted prices in active markets, for identical assets or liabilities (level 1), and the lowest priority to measures involving significant unobservable inputs (level 3). The three levels of the fair value hierarchy are as follows:

- **Level 1:** inputs correspond to quoted prices without adjustment or with a defined quote frequency that allows the reasonableness of the fair value of the instrument at all times. Instruments and criteria defined are the following:
 - a) Local sovereign debt securities issued by Banco Central de Chile or the Chilean Treasury, which meet the following two criteria:
 - The instrument has been traded during 15 days of the last month.
 - The instrument has been traded during 2 of the last 3 days prior to the date of generation of the report.
 - b) Domestic equity securities traded in a stock exchange.
 - c) Local mutual funds with unit values published daily by the regulator (CMF).
 - d) Treasury Bonds and Treasury Bills.

For shares and Government bonds, prices are observed directly in the Stock Exchange, Bloomberg or Riskamerica (provider of financial information on the local market).

For Treasury, the information is directly observed in Bloomberg. For domestic mutual funds, the information can be noted on the page of the local regulator (CMF).

- **Level 2:** These are financial instruments whose fair value is realized with variables other than the prices quoted in Level 1 that are observable for the asset or liability, directly (i.e., as prices) or indirectly (i.e., derived from prices). In this category, instruments are measured through the discount of contractual cash flows based on a zero-coupon curve determined through the prices of instruments with similar features and issuer risk. Instruments and criteria defined are the following:
 - a) Local Government debt securities that do not meet the requirements defined for Level 1.
 - b) Corporate debt securities.
 - c) Domestic equity securities not complying with the requirement of being traded in the stock market defined by Bolsa de Santiago.

For shares and Government bonds, prices are observed directly in the Stock Exchange, Bloomberg or Riskamerica (provider of financial information on the local market).

- **Level 3:** the fair value is based on models which use significant inputs that are not based on observable inputs. It is used when the necessary prices, inputs are not observable, directly or indirectly, for similar instruments for the asset or liability at the measurement date. These fair value measurement models are subjective in nature. Accordingly, they base their price estimates on a number of assumptions that are widely accepted by the market. Instruments and criteria defined are the following:
 - a) Housing lease bonds (BVL).
 - b) Local and foreign investment funds.
 - c) Domestic equity securities of private companies (limited liability companies).

The level in the hierarchy into which a measurement is classified is based on the lowest level of input that is significant to the fair value measurement in its entirety. The table below presents the assets and liabilities that are measured at fair value on a recurring basis As at December 31, 2025 and 2024:

As at December 31, 2025	Carrying amount MCh\$	Fair value measures		
		Level 1 MCh\$	Level 2 MCh\$	Level 3 MCh\$
Assets				
Financial assets held for trading at fair value through profit or loss	5,492,515	48,856	5,443,659	-

Note 47 Risk management and reporting

1) Introduction

The Bank and its subsidiaries operate in a highly technological, regulated and competitive market exposed to a number of risks, which can have a negative impact on the organization both in financial terms and in corporate image. These risks need to be managed through the use of structures and methodologies consistent with the volumes, complexity of the transactions and levels of automation, in order to ensure that such risks are managed within levels consistent with the risk appetite defined by Management and in accordance with the strategy defined by Corporate Governance. This allows the Bank and its subsidiaries to establish a balance between risks and benefits in order to maximize value for the shareholders.

Principles

The activities that involve assuming and managing risks in the Bank are guided by the following principles:

- Risk and benefit balance - Business and risk decisions are consistent with strategies and risk appetite.
- Understanding risks - All material risks to which the Bank is exposed, including financial and non-financial risks, are identified and managed.
- Progressive thinking - Emerging risks and potential vulnerabilities are proactively identified and managed.
- Shared responsibility - All employees are responsible for managing risk.
- Focus on customers - Understanding our customers and their needs is essential to all business and risk decision-making.
- Protect our brand - All risk-taking activities must be aligned with the Bank's risk appetite, the code of conduct, the values and principles of policies.
- Controls - Maintain a robust and efficient control environment to protect our stakeholders.
- Resilience - Be operationally and financially prepared to respond in a timely manner to negative events.
- Compensation - Performance and compensation structures reinforce the Bank's values and promote effective risk-taking behaviors considering the regulatory environment related to compensation.

2) Risk management structure

- **Board of Directors**

Being the highest part of the Bank's risk management structure, it provides supervision, either directly or through its support committees, to ensure that decision-making is consistent with strategies and risk appetite. The Board of Directors receives regular updates on the main risks of the Bank, including a summary of the Bank's risk profile, main and emerging risks together with the performance of the portfolio with respect to the defined limits, and approves the key risk policies, the limits and the risk appetite framework.

Decision-making is centralized in several committees related to risk management, among which the following stand out:

- **Risk committee**

Corresponds to a support committee, which helps the Bank's Board of Directors of in the supervision of risk management, which includes institutional risk, credit risk, market risk and operational risk faced by the Bank, to facilitate its monitoring and supervision. Likewise, it provides the Board of Directors with updated information on the Bank's risk management.

- **Assets and liabilities committee, (ALCO)**

The mission of this Committee is to deliver strategic guidelines that allow for the proper management of the Bank's financial structure, in accordance with the objectives set by the Board of Directors and the Bank's policies. This committee is made up of members of the senior management, whose responsibility is to supervise the evolution of the balance sheet and long-term strategies, becoming a focus for discussion and resolution of the several issues concerning growth, funding, products, pricing, risks and Bank's profit or loss.

- **Model committee**

The model committee is a body created to define and approve the preparation, application, monitoring, validation and implementation of the models and strategies defined in the risk management policy, as well as their modifications and relevant changes.

- **Capital management and profitability committee**

The Capital Management and Profitability Committee's mission is to provide strategic guidelines to maximize the Bank's profitability within the internal and regulatory risk appetite, in accordance with the objectives set by the Board of Directors and the policies of Scotiabank Chile (SBC).

- **Committee for the prevention of money laundering and financing of terrorism of the Bank and its subsidiaries**

Promotes and facilitates in the Bank and subsidiaries the observance of regulations and best practices to prevent, detect and report unusual operations that could be linked to money laundering.

- **Consequence Management Committee**

The Consequence Management Committee is intended to oversee the management of conduct risk in the Bank, through general direction and guidance, promoting the consistent and collaborative application of the guiding principles contained in the Code of Conduct throughout the Bank, being responsible for the governance and oversight of local conduct risk. In line with this, it is responsible for ensuring effective conduct risk management that ensures clear and permanent communication of the Bank's values and its global principles with respect to the required ethical conduct.

- **External Suppliers Committee of Scotiabank Chile and Subsidiaries**

It manages in a central and unified manner the issues related to the different aspects of outsourcing of the Bank and its Subsidiaries with external suppliers, or with other members of the Group.

- **Liquidity contingency committee**

The liquidity contingency committee is the highest decision-making body within the institution during a liquidity stress event, being the point of contact and consultation for the different areas of the Bank. The committee may be convened and activated by the Executive Vice President-Country Head, in his/her capacity as Chairman and Officer in charge, or in his/her absence by the Regional Vice President Treasurer or by resolution of ALCO. Activation can be based on the evaluation of early warnings of a potential liquidity stress event, contemplated in the liquidity policy and on all available information. When the liquidity situation does not allow waiting until the next ALCO meeting, the Chairman and Officer in Charge of the Committee, or in his/her absence the Regional Vice President Treasurer, has the authority to convene and activate the liquidity contingency plan.

- **Non-financial risk management committee of the Bank and subsidiaries**

Provide high-level supervision of non-financial risks (operational risks, information security, business continuity, risks in outsourced services, new products and initiatives, compliance, regulatory and reputational reports), providing a strategic approach and coordinating the development of local internal control programs.

- **Audit committee**

Corresponds to a support committee for the Bank's Board of Directors, which is in charge of the different aspects that involve efficiency, maintenance, application and operation of the internal control systems of the Bank and its subsidiaries; carefully monitor compliance with the regulatory standards and procedures that govern their practice; have a clear understanding of the risks that the business performed may mean for the institution; reinforce and support the function of the Comptroller's Office, as well as its independence from management and serve as a link and coordinator of tasks between the internal audit and the external auditors, also acting as a link between them and the Bank's Board of Directors.

Risk division

This Division supports the Bank's objectives and must maintain an efficient and ongoing management framework at all the Bank's levels. The risk division is responsible for providing reasonable assurance to senior management, the Board of Directors and Shareholders that risks are actively identified, managed and communicated to all key stakeholders. This is achieved by presenting information in an effective and timely manner. The mission of the risk division is to ensure that the results of risk-taking activities are consistent with the Bank's risk appetite and strategies, and that there is an appropriate balance between risk and reward in order to maximize value for the shareholders.

Certain key tasks in risk management performed by the risk units are, but are not limited to:

Retail credit management

- Evaluation of credit risk, exceptions and other credit operations of the different service channels, for Consumer Finance, Persons, Retail Finance, Micro-enterprises and SMEs.
- Carry out comprehensive strategic collection management hand in hand and aligned with the Bank's policy compliance and lead projects related to automation or improvements in collection systems.

Wholesale credit management

- Evaluate loans, exceptions and other operations of the different service channels for the business, large business, wholesale, corporate and real estate portfolios.

Risk data engineering and reporting

- Centralize the areas of engineering and risk data management in order to homogenize, standardize, streamline and reduce the risk of data processing and reporting (including regulatory provisions).
- Coordinate within risk the tasks related to Basel III, generating EESAR (Effective Equity Self-Assessment Report) and stress tests.
- Model risk is one that produces adverse financial results (for example, capital, losses, income) and reputation, arising from poor specifications, incorrect assumptions, computation errors, lack of controls, among other things, in the design, development, implementation and/or use of models.

Standardization companies and BRP

- Manages debtors transferred from the commercial areas (corporate, large companies, wholesale, real estate and companies) including the lease operations and factoring transactions portfolio, which present problems in meeting their obligations with the bank or show impairment in their economic or financial position. It should be noted that this management is also responsible for administering and managing the sale of assets awarded and received in lieu of payment.

Market risk management

- Correctly measure and report to Senior Management the risks incurred by Scotiabank Group in Chile due to changes in prices and liquidity, so that these are managed in accordance with the Bank's risk appetite and expectations complying with local and the Parent's regulations.
- In view of the announcement issued by the Financial Conduct Authority (FCA), regarding that LIBOR rates would no longer be published, the Chilean market assessed the replacement with new benchmark rates such as SOFR, ESTR and SONIA.
- The Bank adopted the required actions to comply with the standard "Interest Rate Benchmark Reform Stage 2", identifying all transactions affected by the change in the benchmark rate, implementing the necessary IT developments to support the new rate model, drafting the legal language to be included in the contracts and promissory notes, both for those transactions maturing after the end of the publication of LIBOR rates, and for those transactions performed using the new benchmark rate, adhered to not providing loans under LIBOR from January 2022, only providing financing to third parties at SOFR and made valuation price changes at SOFR curves.

Enterprise risk management

Develop and implement methods to identify, assess, measure, and monitor the operational, cybersecurity and technological, data, business continuity risks, perform a challenge to the first line of defense, and report the results to Senior Management and the Board of Directors.

- Business continuity management is the process that consists of developing, in advance, and having the necessary capacities to avoid or mitigate the impact of an event that causes a disruption of operations in one or more business units.
- Information technology (IT) risk relates to the risk of financial loss, disruption or reputational damage due to a failure in IT systems.
- Cybersecurity risk is the risk of loss of confidentiality, integrity or availability of information, data or information systems, and reflects the potential adverse impacts on the organization's operations and assets, customers and other stakeholders.
- Data risk is the exposure to adverse financial or non-financial consequences due to mismanagement, misinterpretation or misuse of the Bank's data assets. This risk can arise from poor data quality; inadequate data management or data architecture; and/or unethical use of data.
- Operational risk is the risk of loss derived from people, from inadequate processes and systems or their failures or from external events. Operational risk includes risk management with third parties and legal risk but excludes strategic risk and reputational risk.
- Implement the risk management framework and the risk appetite framework as the monitoring of risk appetite metrics, responsible for the risk culture, the crisis recovery plan as well as determining the Bank's risk profile.

3) Loss risk

Relates to the risk of financial loss faced by the Bank if a customer or counterparty in a financial instrument does not comply with its contractual obligations. It originates mainly from accounts receivable from customers and investment instruments.

The Bank manages credit loss through a number of tools that include procedures, models, validation, controls, behavioral monitoring, etc. This is part of a global strategy. Different limits and models are established based on the features of the customers and the environment in which they operate.

The process by which the Bank operates its policies and controls includes the following features and instances:

- Centralized loan process, where all powers are based on the credit committees.
- Clearly established discretionary credit limits.
- Credit committees specialized by business segments.
- Credit committees specialized by sectors of economic activity.

The main controls established by the Bank include:

- Control and monitoring of credit limits authorized by sector of economic activity.
- Generation of credit management reports.
- Early warnings of the commercial portfolio.
- Calculation and monthly control of allowances.
- Monitoring of impaired portfolio.
- Control of write-offs and loan recoveries.

The Bank also has differentiated models to establish the appropriate amount of potential losses, based on the following models based on individual and collective analysis of debtors:

Individual assessment:

Debtors having the characteristics described in Note 2 "Significant accounting policies", letter (aa) "Special allowances for credit losses" are considered as individually evaluated commercial portfolio.

In accordance with Chapter B-1 of the CNC for Banks issued by the CMF, the individual assessment considers the following segments:

- a) Regular portfolio: Includes those customers whose payment capacity allows them to meet their financial obligations and ranges from category A1 to A6.
- b) Substandard portfolio: Includes debtors with financial problems or who have been in arrears for more than 30 days. It ranges from category B1 to B4.
- c) Portfolio in default: Includes debtors with insufficient payment capacity in foreseeable situations. The categories used range from C1 to C6.

Collective assessment - Collective expected loss models:

The Bank has an adequate structure for the administration of credit loss models, with independence of functions in accordance with good practices and local regulations.

In addition, a model committee exists to which the development of the models, their validation and their follow-up are presented for approval, both from the performance and sufficiency of allowances standpoint, which allows for adequate control of collective allowances. The aforementioned validation is performed by an internal area different from the area developing such models, carrying out an objective review and without conflicts of interest.

There is a model risk management policy (MRMP) that follows the Risk Management's internal guidelines that allow developments to show a standard defined by the Bank, regardless of the team that performs the work. The guidelines cover different stages in the model life cycle such as: collective models methodology, monitoring and control, data validation, model validation and model development, and adequacy of allowances.

In addition, in order to have adequate support and analysis, there are technical notes that cover relevant points in the development of models, such as, for example, the recessive period to be considered or the discount rate that should be used in the calculation of the parameter of loss given default.

All models have a risk rating based on their use, maturity, typology, materiality and complexity.

Thus, the allowance models are integrated with the management of account administration, collections and account origination.

The different collective credit risk models are presented below according to the Bank's portfolios:

Non-retail group commercial model

This Model is applied to single customers, small businesses, separating customers belonging to commercial loan portfolio from customers belonging to retail portfolio (customers with loans other than commercial loans). Commercial customers with sales above MUS\$1 or debt above MCh\$500 are evaluated individually.

Customers are evaluated at Taxpayer ID level, which are grouped as follows: renegotiated customers, and non-renegotiated customers.

In addition, the commercial portfolio has a standard model published by CMF that is divided into three sub-matrices: lease, student and other commercial. These matrices are generally double-entry where an expected loss (EL) assigned according to the delinquency tranche and guarantee coverage must be applied. The model providing the greatest allowances between the internal or standard model is then applied.

Retail group commercial model

This Model is applied to single customers (natural persons) or micro-enterprises with some classified commercial credit as defined by CMF. There are various business models for the retail segment and these are applied to each account as appropriate to calculate the probability of default (PD) and are: CAE Education, CORFO Education, Micro-enterprises (for new and old customers), general purpose mortgage loan and model for renegotiated customers.

In addition, the commercial portfolio has a standard model published by CMF that is divided into three sub-matrices: lease, student and other commercial. These matrices are generally double-entry where an EL assigned according to the delinquency tranche and guarantee coverage must be applied. The model providing the greatest allowances between the internal or standard model is then applied.

Mortgage model

Mortgage model is applicable to customers with an operation classified as mortgage loans (for new and old customers). Customers are evaluated at Taxpayer ID No. level. In addition, has a standard model determined by CMF in a double-entry matrix where an EL must be applied by tranches of default and tranches of loan to value (LTV). The model that calculates the highest expected losses is then applied.

Consumer Model

This model applies to costumers with any operation categorized as consumer loans. Several consumption models exist, and they are applied to each account as appropriate, seeking the lowest rating at the customer level for the calculation of PD (Probability of Default). The models are: installment consumption (for new and existing customers), revolving consumption, renegotiated consumption (at customer level), and agreements. Additionally, there is a standard model determined by the CMF (Financial Market Commission) in a double-entry matrix where an EL (Expected Loss) must be applied by level of delinquency (bank and financial system) and holding of Mortgage Loan. The Bank applies the model that calculates the highest expected losses.

CAT subsidiary allowance model

The model used for subsidiary CAT uses the same formulation as for the collective consumption model, based on a statistical model with probability of default (PD) and a loss given default (LGD). Models are integrated with the management of the customer; e.g., for non-payment of obligations, considering the different CAT recovery and collection strategies.

In addition, a standard model established by the CMF is used, based on a double-entry matrix in which an expected loss (EL) must be applied according to delinquency level (bank and financial system) and whether a mortgage loan is held. The model that results in the highest expected losses is applied.

Credit quality by class of financial asset – Individual assessment

For individual evaluation, credit quality is presented (A1 to C6), tabulating loans according to the class of financial asset.

Financial assets at amortized cost

The following stages are defined for individual and group evaluation:

Stage	Description	Individual	Group
Stage 1	Assets without a significant increase in credit risk since initial recognition	A1 to A6	Regular
Stage 2	Assets with a significant increase in credit risk since initial recognition but without credit impairment	B1 to B4	Substandard
Stage 3	Credit-impaired assets	C1 to C6	Default

The classification of financial assets at amortized cost and contingent loans in these stages is as follows:

As at December 31, 2025	Stage 1 MCh\$	Stage 2 MCh\$	Stage 3 MCh\$	Total MCh\$
Individual				
Advances to bank	22,074	-	-	22,074
Loans and accounts receivable	11,154,872	840,065	491,433	12,486,370
Group				
Advances to bank	-	-	-	-
Loans and accounts receivable	20,454,495	-	1,349,623	21,804,118
Total	31,631,441	840,065	1,841,056	34,312,562

As at December 31, 2024	Stage 1 MCh\$	Stage 2 MCh\$	Stage 3 MCh\$	Total MCh\$
Individual				
Advances to bank	1,565	-	-	1,565
Loans and accounts receivable	12,182,099	859,137	509,776	13,551,012
Group				
Advances to bank	-	-	-	-
Loans and accounts receivable	19,784,277	-	1,275,506	21,059,783
Total	31,967,941	859,137	1,785,282	34,612,360

Collateral

Collateral accepted by the Bank comply with the requirements established in Chapter 12-3 of the RAN, which establishes that for the purposes of the individual credit limit, all sureties constituted on real or personal property are collateral. Collateral (co-debtors or sureties), as well as those constituted on bills of exchange, commercial promissory notes, shares and, in general, all those that do not affect tangible property, will not be considered for these purposes, except for certain specific documents indicated in the regulations and that comply with the conditions indicated therein. Having guarantees reduces the risk for the Bank.

For the group and individual evaluation, the collateral limitation amount for customers with secured transactions is classified into the following categories:

Individual	As at December 31, 2025			As at December 31, 2024		
	Loans MCh\$	Guarantee MCh\$	Allowance MCh\$	Loans MCh\$	Guarantee MCh\$	Allowance MCh\$
Commercial loans	11,285,451	4,153,685	304,995	12,247,755	4,214,194	299,060
Consumer loans	-	-	-	-	-	-
Mortgage loans	-	-	-	-	-	-
	11,285,451	4,153,685	304,995	12,247,755	4,214,194	299,060

Group (*)	As at December 31, 2025			As at December 31, 2024		
	Loans MCh\$	Guarantee MCh\$	Allowance MCh\$	Loans MCh\$	Guarantee MCh\$	Allowance MCh\$
Commercial loans	1,928,537	2,822,713	84,674	1,943,024	2,677,092	72,435
Consumer loans	2,897,479	-	198,922	2,766,726	-	143,214
Mortgage loans	14,542,488	26,539,066	48,467	14,128,682	25,314,272	46,716
	19,368,504	29,361,779	332,063	18,838,432	27,991,364	262,365

(*) Subsidiaries are not considered for the group portfolio.

Individual portfolio risk profile by probability of default

The table below shows a tabulated breakdown by probability of default (PD) of the Bank's individual portfolio of secured and unsecured debt.

Tranches for probability of default	As at December 31, 2025		As at December 31, 2024	
	Secured MCh\$	Unsecured MCh\$	Secured MCh\$	Unsecured MCh\$
0.0 - 0.1	193,675	4,998,652	123,880	5,549,348
0.11 - 0.4	482,245	1,390,710	462,043	1,490,809

40.58 +	287,450	302,456
Total consumer	2,897,479	2,766,726
Total	19,368,504	18,838,432

Offset of financial assets and liabilities

For accounting purposes, Scotiabank does not offset derivatives.

Credit limits to related groups

For groups related to Scotiabank, the total of their obligations may not exceed 5% of the Bank's effective equity, this limit increases to 25% only if that exceeding 5% corresponds to obligations with collateral (article 84, number 2 of the General Banking Law).

All groups related to Scotiabank are within the regulatory limits, detailed as follows:

As at December 31, 2025

	Total obligations	% Effective equity	
	MCh\$	Secured	Unsecured
BNS Group	570,962	7.0%	3.3%
Salvador Said Group	308,891	4.2%	1.4%
Generic Management-assigned group	174,806	2.5%	0.6%
Business Support Group	30,000	0.0%	0.5%
Gonzalo Said Group	19,253	0.0%	0.3%
Emilio Deik Group	10,285	0.1%	0.1%
Diego Masola Group	35	0.0%	0.0%
Other related groups	66,697	1.0%	0.2%
Total main debtors	1,180,929		
	Regulatory limits	25.0%	5.0%

As at December 31, 2024

	Total obligations	% Effective equity	
	MCh\$	Secured	Unsecured
BNS Group	498,844	8.4%	0.6%
Said Group	320,839	2.8%	3.0%
Generic Management-assigned group	176,250	2.5%	0.7%
Karen Ergas Group	48,935	0.3%	0.5%
Business Support Group	30,000	0.0%	0.5%
Salvador Said Group	45,236	0.0%	0.8%
Víctor Carpio Group	22,443	0.3%	0.2%
Emilio Deik Group	11,425	0.1%	0.2%
Diego Masola Group	38	0.0%	0.0%
Other related groups	57,730	0.8%	0.3%
Total main debtors	1,211,740		
	Regulatory limits	25.0%	5.0%

Concentration by industries

See information on concentration by industry in letter e) “Gross loans and allowances made grouped by type of economic activity of debtors and concentration of credit risk” in Note 13 “Financial assets at amortized cost.”

Total allowances on loans

The total level of allowances on loans reached MCh\$922,291 as at December 31, 2025, which implies an increase of approximately 21.01% compared to the stock of allowances as at December 31, 2024, which reached MCh\$762,164. Accordingly, and considering an increase in total loans (an increase of 0.11% in the same period), the percentage of allowances on total loans was up from 2.33% in December 2024 to 2.84% in December 2025.

Risk rates and allowances	12/31/2025	12/31/2024
	MCh\$	MCh\$
Total allowances on loans	922,291	762,164
Total loans	32,511,241	32,717,372
Allowance / loan percentage	2.84%	2.33%

The increase in allowances for credit losses for the period between December 2024 and December 2025 occurs mainly in retail and CAT Administradora de Tarjetas S.A. due to the implementation of the new standard consumption allowances matrix.

4) Market risk

Refers to the risk of losses arising from adverse movements in market prices. It is associated with the volatility of the financial market and reflects the uncertainty faced by a financial institution in the face of possible adverse effects on the risk factors (market interest rates, exchange rates and prices) on the value of its assets, liabilities and equity. Market risks are classified as follows:

- **Interest rate risk**
Risk of losses due to adverse movements in the intertemporal structure of the interest rate. This is caused by upward or downward movements of the yield curve.
- **Spread – Base risk**
Spread risk is the risk of losses related to adverse changes in spreads existing in the yield of different financial assets and liabilities. These may reflect particular liquidity conditions of assets, credit and/or specific prepayment clauses whose exercise may result in a deterioration on the ability to generate future margin.
- **Exchange rate risk**
Risk of losses due to adverse movements in exchange rates. This risk originates from financial mismatches between assets and liabilities, both effective and contingent.
- **Option volatility risk**
Risk of financial losses associated with positions in explicit or implicit options, whether purchased or delivered, such as those contained in mortgage loans and education loans.

Balance sheet management

The Bank's assets are mainly made up of mortgage loans (mainly denominated at a fixed rate), commercial loans (including those used to finance foreign trade operations), loans for education and consumption.

The Bank manages its balance sheet with the purpose of maximizing its net income from interest and adjustments, maintaining a high proportion of demand deposits for which interest is not paid and of short-term deposits, granting loans for longer periods allowing to take advantage in this way, the slope of the yield curve within an agreed financial risk management context.

The main risks of the Balance Sheet are due to the interest rate risk produced by long-term assets financed with short-term liabilities, and the risk of inflation, where the Bank lends in UF and is funded in Chilean pesos. To mitigate balance risks, the Bank has short-term interest and inflation risk limits, as well as long-term interest risk limits to maintain the level of risk desired by the institution.

The Bank also manages a portfolio of non-derivative financial instruments in order to take advantage of the differences in the yield curve, and at the same time maintain positions in liquid instruments in order to meet eventual resource needs.

Additionally, the Bank performs hedging derivatives to manage risks arising from its mortgage portfolio, its deposit portfolio and specific cases

The portfolio of financial assets held for trading at fair value through profit or loss of the Individual Bank, is detailed as follows:

As at December 31, 2025	(Individual bank)				
	Purchase value MCh\$	Purchase TIR %	Market value MCh\$	Market TIR %	Unrecognized gain (loss) MCh\$

Trading activities/customers

The Bank has a Trading area responsible for the active trading of highly liquid instruments, whether these are Banco Central de Chile, bank and/or corporate paper, interest rate and/or currency derivatives (including UF). This area is responsible for finding profit opportunities in a short-term horizon, taking advantage of transitory no arbitrations in prices and differentials in the yield curve (base and spread), but is also responsible for providing financial solutions to our customers.

Value at risk

The Bank uses value-at-risk (VaR) tools to quantify the risk associated with the trading portfolio positions. This includes papers and derivatives classified in the trading portfolio, as well as the exchange risk of mismatches in foreign currency derived from operations with customers and proprietary positions (directional) in currencies.

In line with our Head Office, market risk management uses the historical simulation method with a confidence level: 99% and 300 days of observations.

Complementarily, the market risks department extensively uses comparison tests in order to establish the predictive quality of its value at risk model (excess frequency test).

As at December 31, 2025, the total VaR (includes rate and currency) reached a value of MCh\$1,087 (MCh\$4,194 as at December 31, 2024).

The impact by the risk factor on the VaR at each closing date is shown below:

	12/31/2025	12/31/2024
	MCh\$	MCh\$
Bonds in UF	6	(14)
Derivatives UF	41	(280)
Bonds in Ch\$	(22)	(1,645)
Derivatives in Ch\$	(391)	(1,103)
Derivatives in US\$	(243)	(1,132)
Basis US\$/Ch\$	(164)	26
Basis L3L6	-	-
Other	-	-
FX	(314)	(46)
Total	(1,087)	(4,194)

Where others, corresponds to the diversification effect, product of having books with different risk measurements.

Interest rate flow sensitivity

Structural interest rate risk is measured using a metric that sensitizes the flows of asset and liability positions.

The metric considers financial assets, liabilities and derivatives not belonging to the trading portfolio. Items, or a portion thereof, that are previously designated as not sensitive to changes in interest rates are excluded, such as:

- Cash.
- Other assets and liabilities.
- Past due portfolio.
- Allowances.
- Capital and reserves.

Interest rate mismatches are built as follows:

- a) Cash flows are determined by the maturity of fixed rate transactions and by the revaluation period in variable rate transactions.
- b) Assets, liabilities and derivatives used in balance management should be grouped according to their currency of accrual: Chilean pesos (Ch\$), Unidad de Fomento (UF), U.S. dollars (US\$) and other foreign currencies combined.
- c) Flows consider only principal of transactions.
- d) Interest rate curves do not consider the spread between assets and liabilities.

f) Adjustments:

To properly calculate the sensitivity of assets and liabilities to changes in interest rates, the flows of financial products having particular characteristics must be modified:

- i) The balance in chequing accounts is distributed in terms of up to 8 years for the local report and up to 5 years for regulatory report. Both as obtained in the stability models of demand accounts with no maturity.
- ii) The ability of customers to prepay loans modifies the risk profile of the balance sheet, as actual maturities differ from the contractual maturities.
- iii) For education loans, the expected flow should be estimated according to the factors that determine the maturity profile of this portfolio. In addition, all disbursements and resales that will be accounted for in the current year, related to those students who are pursuing their studies and that the Bank has committed to deliver the necessary funds, must be entered.

Short-term sensitivity (Net interest income sensitivity)

Quantifies the impact of an adverse change in interest rates in the short term. This impact discloses the deviation that the budgeted financial margin may experience at a year-end.

The interest rate shock is weighted by the residual term of each time band, i.e., a 100 bp shock is applied to the overnight band until it is gradually reduced to 8.33 bp in the eleventh month.

The calculation is made for each currency, then the individual results are aggregated to obtain the overall risk exposure.

$$St = ABS (\sum Spm)$$

Where:

St: Short-term sensitivity to a change in interest rates.

Sp: Sensitivity of a change in interest rate (100 bps) weighted by the annual residual term.

m: The currencies of each book measured: Ch\$, UF, US\$, MX.

Long-term sensitivity (Economic value sensitivity)

Quantifies the impact of an adverse change in interest rates on the Bank's equity, or in other words, represents the variation that the value of the share would experience in the event of a movement in the yield curve.

This impact is obtained by comparing the market value of the balance sheet structure with the present value of the mismatches discounted at market rates modified by a sensitivity factor equivalent to +/- 100bp.

$$Stl = ABS (\min (\sum St+m , \sum St-m))$$

Where:

Stl: Long-term sensitivity to a change in interest rates.

St: Sensitivity to an increase (+) and drop (-) in interest rates.

m: The currencies of each book measured: Ch\$, UF, US\$, MX.

Inflation position sensitivity

The sensitivity of the inflation position results from applying a 100 bp shock to the difference between assets and liabilities denominated in Unidad de Fomento (UF). The mismatch considers on and off-balance sheet transactions, except for those of the trading portfolio. Derivatives the maturity date of which falls within the known UF term are excluded from the measurement.

$$I_f = \text{ABS} (P_i) * 1\%$$

Where:

I_f: Inflation sensitivity

P_i: Inflation position

The Bank uses long-term sensitivity (EvE), short-term sensitivity (NII) and sensitivity to inflation risk to quantify the interest rate risk of the balance sheet book (banking book). These measures include all assets and liabilities, except for trading portfolios.

The impact on present value per currency of a parallel movement of 100 points is illustrated below.

As at December 31, 2025

	VPN	VPN + 1%	VPN - 1%

13,486

Net present value, equivalent to the net present value of asset and liability flows.

Accounting hedges

Transactions under the accounting hedging modality are governed by the technical and procedure specifications described in the Accounting Hedging Policy, managed by the Finance Division. This policy indicates the strategies for hedging with derivatives, specific risk being hedged, effectiveness testing, accounting for hedging relationships and general descriptions related to this product.

As a general concept, a derivative position, which is hedging a certain financial instrument, that arises in the ALM book continues to belong to that book in the event that the hedged item has, for instance, been sold. This translates into no effect on the related regulatory reports and follows the logical determination to separate products and instruments from the trading book and the banking book, as established in Chapter 21-7 of the RAN.

The Market Risk Management Department supervises the deals entered under this modality in the peak system, reviewing concepts such as type of strategy, type of product entered, currency, term and counterparty, making an effective comparison between the system and the confirmation forms received from the back office area, in order to subsequently provide its final approval.

Additionally, for the management process, on a monthly basis it compares the amounts of results that were entered on a daily basis and the final results received from the Parent, making the related adjustments should differences exist.

Stress tests

The market risk management develops and reports to ALCO and local Board regularly stress exercises, which include parallel and non-parallel movements of the yield curve, volatility shocks and historical scenarios.

Detail of exposures

Currency risk

The Bank is exposed to the volatility in exchange rates in which its financial positions and cash flows are expressed or indexed. On an annual basis, the limits for the levels of net exposure by currencies and the total positions during the day and closing are reviewed at ALCO and Headquarters, which are monitored daily by the market risk management.

The Bank actively takes positions in US\$, in addition to having operations in other currencies due to products required by customers.

The following tables show the exposures to the different currencies, whether of banking products or derivatives in their equivalent in local currency:

	As at December 31, 2025			As at December 31, 2024		
	Assets MCh\$	Liabilities MCh\$	Net MCh\$	Assets MCh\$	Liabilities MCh\$	Net MCh\$

Balance book interest rate risk

The Bank is exposed to the volatility in the structure of market interest rates over its structural exposures. As a result of the changes in interest rates, margins can increase, but these can also be reduced and even cause losses in the event of adverse movements.

The Board of Directors sets limits for the effects of mismatches in banking book (which includes all those positions that are not for trading) on the financial margin and on the economic value of its equity, compliance with which this must be reported monthly to CMF.

The following chart shows the structural exposure by interest rate of assets and liabilities, considering the terms of change or renewal of rates; otherwise, the expiration dates of the transactions are considered

Range of days	As at December 31, 2025 Mismatch due to term				As at December 31, 2024 Mismatch due to term			
	Ch\$	UF	US\$	MX (*)	Ch\$	UF	US\$	MX (*)

Regulatory limits

The following table shows the regulatory measurement of interest rate risk and indexation of banking book for the short and long-term.

	Amount 12/31/2025 MCh\$	Amount 12/31/2024 MCh\$
Short-term (margin)		
Short-term interest rate risk	69,772	45,570
Indexation risk	58,444	49,124
Lower income due to commissions sens.	-	-
Total short-term risk	128,216	94,694
Short-term risk limit (35% of the margin)	395,458	393,618
Short-term usage limit percentage	32.42%	24.06%
Long-term (value)		
Long-term interest rate risk	541,043	539,320
Interest rate optionality risk	-	-
Total long-term risk	541,043	539,320
Long-term limit	864,770	862,150
Long-term limit usage percentage	62.56%	62.56%

Balance book exposure (Bank)

Market risks arise from exposures to interest rate and price risks on trading positions and currency risk on its global positions.

The Banco Central de Chile establishes a regulatory limit for the sum of interest rate risks in trading positions (including derivatives) and currency risk. The Bank, at an individual level, must permanently observe these limits and report weekly to the CMF on its positions at risk and compliance with these limits. It must also report monthly to the CMF on the positions at risk consolidated with the subsidiaries and branches abroad. The regulatory limit establishes that the effective equity must be sufficient to cover the sum of 8% of the credit risk and market risk weighted assets.

The following tables show the regulatory measure of risks on the trading book:

	Amount 12/31/2025 MCh\$	Amount 12/31/2024 MCh\$
Interest rate risk	334,305	267,482
Currency risk	9,465	5,676
Shares risk	2,755	2,003
Currency optionality risk	-	4
Consolidated risk-weighted assets	32,041,373	32,021,770
Credit risk regulatory capital (8% CRWA)	1,998,213	2,047,286
Market risk regulatory capital (8% MRWA)	346,524	275,165
Operational risk regulatory capital (8% ORWA)	218,573	239,290
Total regulatory capital	2,563,310	2,561,741
Consolidated effective equity	5,506,247	5,541,100
Consumption % (including CR and MR)	46.55%	46.23%
Basel ratio (including market risk)	17.18%	17.30%

5) Risk data engineering and reporting

Risk data engineering and reporting includes the management of provisions and regulatory limits, quality assurance, risk reporting and model risk management.

Model risk management

Model risk is that type of risk that produces adverse financial results (e.g., capital, loss, income) and reputational consequences arising from the design, development, implementation or use of models. This can originate from inadequate specifications, incorrect parameter assumptions, false assumptions or presumptions, mathematical computation errors, inaccurate, inadequate, or missing information, improper use, and lack of monitoring or controls. The model risk management department is in charge of managing model risk within the Bank and presenting it to the non-financial risk committees and the models committee.

The Bank's model risk management policy describes the general principles, policies and procedures that provide the framework for managing model risk. All models, whether produced by the Bank or supplied by vendors, that meet the Bank's definition of a model, are within the scope of this policy. Likewise, it clearly defines the roles and responsibilities of the key stakeholders involved in the risk management cycle of the models. The organizational units involved in model's risk management cycle have procedures at the unit level, where appropriate, which regulate the stages of the cycle for which they are responsible. The models committee, the non-financial risk committee and the Board of Directors supervise the Bank's reference framework for model risk management and approve the policy.

6) Enterprise risk management (operational risk, data risk, cybersecurity & IT risk, business continuity and risk management)

The Bank recognizes cybersecurity & IT, data, operational, continuity risks as the main risks for the Bank. Within Enterprise risk management are the cybersecurity & IT, data risk, business continuity, operational risk management and lastly the Enterprise risk management governance management, which is in charge of managing all the risks that the Bank defined as main risks.

Cybersecurity & IT risk

Information technology risk relates to the risk of financial loss, disruption or reputational damage due to a failure in IT systems.

Cybersecurity risk is the risk of loss of confidentiality, integrity, or availability of information, data, or information systems, and reflects potential adverse impacts on the organization's operations (i.e., mission, duties, image, or reputation) and assets, customers, and other stakeholders.

Cybersecurity risk is addressed within the cybersecurity strategy, which is the adoption of the National Institute of Standards and Technology (NIST). Within this strategy, the functions of identify, detect, protect, respond and recover have been implemented. These functions contain a series of controls that manage cybersecurity risk and indicators have been established to measure it, one of them is the Security Risk Index (SRI) – Protect, that measures the risk of exposure of all technology platforms. Activities and action plans are constantly developed when the level of risk is outside the threshold.

Operational risk

Operational risk is the risk of loss derived from people, from inadequate processes and systems or their failures or from external events. Operational risk includes risk management with third parties and legal risk but excludes strategic risk and reputational risk.

Operational Risk exists, in a certain way, in each of the business and support activities of the Bank and its subsidiaries, and could give rise to financial losses, regulatory sanctions or damage to the reputation of the institution.

Operational risk management is a continuous process that goes across the organization, carried out by people at all levels of the Bank and its subsidiaries.

The process is designed to identify, evaluate, monitor and report risks and events, current and potential, mitigate the effects, as well as to provide reasonable assurance to the Board of Directors and senior management, on the status of exposure and management of operational risk of the Bank and its subsidiaries.

The Bank and its subsidiaries adopted the three lines of defense model, consistent with the risk management framework, which establishes the related responsibilities for managing operational risk.

The Bank manages its operational risks with a governance structure made up of the Board of Directors in its highest-ranking role in approving strategies and risk management, the enterprise risk management department, the non-financial risk management committee, the risks and control areas (second lines). In addition, the Bank has policies, processes and evaluation methodologies to ensure that operational risk is properly identified and managed through effective controls.

As at December 31, 2025, the Bank and its subsidiaries have recognized MCh\$11,205 for operational risk events (MCh\$13,585 as at December 31, 2024).

Net loss expense, gross loss and expense recoveries from operational risk events	12/31/2025 MCh\$	12/31/2024 MCh\$
Internal fraud	(563)	(1,574)
External fraud	(13,537)	(13,569)
Labor practices and safety in the business	(99)	(155)
Customers, products and business practices	(31)	(45)
Damage to physical assets	(55)	(34)
Business interruption and system failures	(93)	(84)
Execution, delivery and process management	(1,273)	(1,949)
Gross loss in the period due to operational risk events	(15,651)	(17,410)
Internal fraud	28	15
External fraud	4,190	2,587
Labor practices and safety in the business	-	-
Customers, products and business practices	-	16
Damage to physical assets	14	-
Business interruption and system failures	-	9
Execution, delivery and process management	214	1,198
Gross loss recoveries in the period due to operational risk events	4,446	3,825
Net loss in the period due to operational risk events	(11,205)	(13,585)

Operational incident management

The management on operational incidents begins with the identification of an incident by one of the operational risk coordinators present in each division of the Bank, they will be responsible for consolidating, preparing and communicating the related background information. Each incident is subject to an impact analysis and the need to generate an action plan to mitigate the impact and/or frequency of the incident and prevent its future occurrence. Operational incidents are reported to the related instances as appropriate with their related status and action plans and according to Chapter 20-8 of the RAN.

Data risk

Data risk is the exposure to adverse financial and non-financial consequences (e.g., loss of revenue, reputational risk, regulatory risk, suboptimal management decisions) caused by mismanagement, misinterpretation, or misuse of the Bank's data assets. This risk can arise from poor data quality; inadequate data management or data architecture; and/or unethical use of data.

The Data Risk Management Framework (DRMF) describes the general guiding principles of data risk management and defines the governance structure of the institutional data risk management program. The Data Risk Management Policy (DRMP) categorizes and explains data-related risks and describes the interaction model and the duties and responsibilities of the key stakeholders involved in data risk management within the organization.

Self-assessment program on risks and controls

The Bank and its subsidiaries have a process map that considers the existing business and support functions within the entity, which is subject to an annual criticality assessment using qualitative variables.

The definition of the processes for which risk assessments and specific controls will be carried out each year, are prioritized according to such criticality, which is reviewed and approved by the non-financial risk committee. Notwithstanding the foregoing, this committee may suggest and approve changes to the defined annual program depending on relevant situations that have impacted processes, systems, people or external events during said period, such as regulatory changes, materialization of incidents, operational losses, among other aspects that said committee determines, which will imply an update of evaluation of risks and controls of one or more specific processes.

The Risk and Control Self-Assessment (RCSA) program forms an integral element of the Bank's operational risk management framework and policy.

The purpose of the RCSA program is to identify, document and assess relevant operational risks in a significant process, entity or business unit. The risk and control self-assessment process provides a systematic approach to identify risks and related internal controls, as well as deficiencies that affect the achievement of defined business objectives. Likewise, this process is a mean for supervising the actions of management to eliminate deficiencies identified and measure efficiency of the measures.

Cloud computing

In compliance with the CISO Directive (Chief information security officer) on Cloud Outsourcing, TPRM (Third party risk management) has adopted the definition of Cloud Computing published in the National Institute of Standards and Technology (NIST) "NIST Definition of Cloud Computing - special publication No. 800-145".

Cloud computing refers to the practice of using a network of remote servers hosted on the Internet to store, manage, and process data, rather than a local server or personal computer. Cloud computing is a model for enabling convenient, on-demand network access to a shared pool of configurable computing resources (for example, networks, servers, storage, applications, and services) that can be rapidly supplied and released with minimal management effort and interaction by the service provider.

Outsourcing of strategic and non-strategic services

A service is strategic for the Bank when it has the greater potential to impact or have a significant influence (either quantitative or qualitative) on the Bank's operations or reputation. Services that are not classified in the previous category correspond to non-strategic services.

Business continuity

The Bank is committed to take reasonably necessary steps to ensure business continuity during conditions that could disrupt the operations of the workplace or its environment. To achieve this, all business units must incorporate business continuity management practices to create resilient, alternative and/or redundant mechanisms to guarantee the continuity of operations based on the criticality rating established by the business unit itself.

7) Liquidity risk

Liquidity risk refers to the impossibility for:

- Comply in a timely manner with contractual obligations and adjusted behavior, if applicable.
- Liquidate positions without significant losses caused by abnormal trading volumes.
- Avoid regulatory sanctions for non-compliance with regulatory indices.
- Competitively finance commercial and treasury activities.

Two sources of risk are distinguished:

(i) Endogenous: risk situations derived from controllable corporate decisions.

- High liquidity achieved by a reduced base of liquid assets or mismatches of significant assets and liabilities.
- Low diversification or high concentration of financial and commercial assets in terms of issuers, terms and risk factors.
- Deficient management of value hedges, cash flows or credit in terms of hedge efficiency, correlation of changes in value, sensitivity ratios of the item hedged and the derivative, among others.
- Adverse corporate reputational effects that translate into non-competitive access to financing or lack thereof.

(ii) Exogenous: Risk situations resulting from uncontrollable financial market movements.

- Extreme movements or unexpected corrections /events in the international and local markets.
- Regulatory changes, interventions by the monetary authority, among others.

Liquidity risk management for the Bank and its subsidiaries is the process that aims to identify, measure, limit and control this risk, based on a policy framework that sets the criteria, defines the metrics, organizes activities and imposes procedures that the institution must follow to achieve an effective management.

The Bank's Board of Directors approves this liquidity management policy and supervises its compliance through the Bank's Audit division. Likewise, is responsible for defining the appetite for liquidity risk and periodically reviewing the Institution's liquidity strategy.

The CEO, as the main person responsible for managing the Bank's liquidity risk, must conduct the business within the current legal framework and in accordance with established policies, limits and procedures. He/She chairs the assets and liabilities committee, a body in which he/she actively participates in liquidity risk management. The CEO delegates authority to manage liquidity risk to other members of the senior management, committees and appropriate departments.

Daily management of liquidity is the responsibility of the treasury unit, particularly, ALM management, which is in charge of implementing efficient investment and financing strategies compared to our significant competitors. For such purpose, it must adjust the liability maturity profile considering revenue, capital and liquidity recorded in the current and forecasted scenarios, minimizing the risk caused by an excessive mismatch or high concentration of liabilities.

The tools used to measure and control liquidity risk are:

- a) Accumulated mismatches at different terms.
- b) Proportion of liquid assets/enforceable liabilities.
- c) Concentration of depositors.
- d) Liquidity stress tests.
- e) Measurement of liquidity ratios such as the liquidity coverage ratio and net stable financing.

Finally, and based on continuous monitoring, the Bank reviews all aspects of the liquidity management process considering the potential risks to which it is exposed in this matter. Liquidity contingency planning is a critical component of this review, and its objective is to provide a framework to establish appropriate actions in the face of liquidity crisis events. For such purpose, the Bank has a "liquidity contingency plan" that is reviewed and approved on an annual basis by the local Board of Directors and is recommended by our Headquarters.

In order to become aware of and quantify the risk profile, Management focuses on the maturity flows, the concentration of financing, the maintenance of sufficient liquid assets, the quantification of assets committed and liquidity stress tests. The development, implementation and quantification of metrics is performed by the market risk management with A&C of global risk management market risk management (GRM MRM).

As at December 31, 2025 All currencies	Local systemic GAP		Global systemic GAP		Idiosyncratic GAP		Combined GAP	
	30 days	90 days	30 days	90 days	30 days	90 days	30 days	90 days
Liquidity gap	(449,990)	(544,904)	(506,297)	(658,023)	(726,700)	(847,627)	(854,772)	(1,071,373)
Liquid asset hedge	2,526,149	2,526,149	2,526,149	2,526,149	2,531,777	2,531,777	2,531,777	2,531,777
Liquidity need / excess	2,076,159	1,981,245	2,019,852	1,868,126	1,805,077	1,684,150	1,677,005	1,460,404

As at December 31, 2024 All currencies	Local systemic GAP		Global systemic GAP		Idiosyncratic GAP		Combined GAP	
	30 days	90 days	30 days	90 days	30 days	90 days	30 days	90 days
Liquidity gap	(1,228,054)	(1,336,940)	(1,299,941)	(1,415,477)	(1,482,298)	(1,620,774)	(1,633,672)	(1,829,125)
Liquid asset hedge	2,846,860	2,846,860	2,846,860	2,846,860	2,851,058	2,851,058	2,851,058	2,851,058
Liquidity need / excess	1,618,806	1,509,920	1,546,919	1,431,383	1,368,760	1,230,284	1,217,386	1,021,933

The established limit structure and its daily control ensure that liquidity management falls within the margins established by ALCO and approved by the Board of Directors. This is strengthened by the proper segregation of duties, accountability and control by opposition defined in the Bank's organizational structure and its subsidiaries, allowing liquidity management to be performed without conflict of interest.

Supplementing the liquidity management, liquidity stress tests are performed. Indeed, such tests estimate the impact that the different internal, systemic and global liquidity scenarios have on the financing of the Bank and its subsidiaries, through the analysis of liquidity gaps, coverage of liquid assets, amount of additional financing (liquidity excess), horizon of survival, state of internal and regulatory limits.

Scotiabank Chile controls its exposure to liquidity risks at the individual and consolidated level through a tight term mismatch approach, which is complemented by the measurement of liquid assets, concentration and liquidity ratios.

Volume and composition of liquid assets

	12/31/2025 MCh\$	12/31/2024 MCh\$
Available funds	544,846	490,303

The following table provides the detail of changes in liabilities arising from financing activities, including those changes that represent cash flows and non-cash changes, for the year ended December 31, 2025.

Reconciliation of liabilities arising from financing activities	Opening balance 12/31/2024	Cash Flow	Changes other than cash					Final balance 12/31/2025
			Acquisition/ (Disposals)	Foreign currency movement	Movements in UF	Change in fair value	Interests	
			MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	
Current bonds	8,033,742	(407,376)	-	(46,672)	227,552	-	201,356	8,008,602
Subordinated bonds	1,257,573	(73,271)	-	-	42,232	-	45,232	1,271,766
Bonds with no fixed maturity (*)	696,318	(45,564)	-	(66,038)	-	-	45,564	630,280
Dividends paid - Owners	129,884	(216,472)	216,760	-	-	-	-	130,172
Dividends paid - Non-controlling interest	-	(4,843)	-	-	-	-	-	(4,843)
Lease contract obligations	138,208	(14,863)	366	-	-	-	4,428	128,139
Total liabilities from financing activities	10,255,725	(762,389)	217,126	(112,710)	269,784	-	296,580	10,164,116

(*) The interest on Bonds with no fixed maturity is recorded under the item 'Provisions for dividends, payment of interest payments and repurchasing of issued regulatory capital financial instruments' in accordance with Chapter A-2 of the CNC.

8) Counterparty risk

As a result of the activity with customers, the Bank has counterparty exposures due to the probability that its debtors could not comply with payments generated due to financial derivative contracts. The Bank limits credit risk levels by setting exposure limits in terms of individual debtors, which in turn are aggregated into groups of debtors, industry segments and countries. Such risks are permanently monitored by the risk division and the limits by debtor, debtor groups, products, industry and country are reviewed at least once a year and approved by the Board of Directors and the senior risk committee.

Exposure to credit risks is managed through regular analysis on the capacity of debtors and potential debtors to meet payments in accordance with the contractual terms of the loans and is mitigated by obtaining admissible guarantees.

The Bank controls its positions in derivative contracts with its counterparties. This exposure to credit risk is managed as part of the limits on loans to customers, together with potential exposures due to market fluctuations. Likewise, it adjusts the valuation of the contracts according to the credit quality of the counterparty and the expected credit risk exposure given the current contracts.

12/31/2025	Asset fair value MCh\$	Credit risk adjustment MCh\$
Total	(665,786)	13,610

12/31/2024	Asset fair value MCh\$	Credit risk adjustment MCh\$
Total	(273,938)	10,574

Note 48 Disclosure on regulatory capital and capital adequacy ratios

In accordance with the definitions in Chapter C-1 of the compendium of accounting standards, and paragraphs 134 to 136 of IAS1, the main processes that the Bank performs to manage capital and regulatory requirements are described.

Capital management

The Bank's capital management objective is to maintain adequate equity strength and ensure capital adequacy, complying with internal objectives and regulatory capital adequacy requirements, which allows the Bank to sustain its business strategy and face possible adverse scenarios that may materialize in the short and medium-term, meeting its solvency and credit rating objectives. Note that in accordance with adequate capital planning, the Bank has maintained solvency levels higher than those required by current regulations, maintaining sufficient headroom to face adverse scenarios and the regulatory implementation of Basel III.

The Capital management and profitability committee's objective is to provide strategic guidelines to maximize the Bank's profitability within the internal and regulatory risk appetite, in line with the objectives set by the Board of Directors and the policies defined for such purposes. The Bank has a Capital Management Unit, reporting to the Chief Financial Officer, responsible for the regular monitoring and control of capital adequacy. This unit is responsible for ensuring capital levels that allow the sustained and profitable growth of the business units, and the monitoring of early warnings defined in the risk appetite framework that both such committee and the Board of Directors have approved as part of the corporate governance structure for capital matters. Note that during 2025 none of the defined alerts have been activated and the capital is within the parameters defined in the capital planning.

All significant aspects of capital management are contained in the capital management policy, which includes an internal process of permanent evaluation of capital adequacy, definition of standards for performing stress tests and calculation of regulatory capital and internal capital, as well as the definition of the ICO (internal capital objective) higher than the minimum regulatory requirements, which are evaluated annually in the self-assessment report of effective equity (IAPE) that is performed in accordance with the regulatory requirements contained in Chapter 21-13 of the RAN on the evaluation of the adequacy of banks' effective equity.

Implementation of Basel III

In 2019, the CMF initiated the regulatory process for the implementation of Basel III standards in Chile, in accordance with the provisions of Law No.21.130 modernizing banking legislation. Through the present date, the CMF enacted the different standards to adapt the Basel III standard to local banks, which are applicable beginning on December 1, 2021. These regulations describe requirements and conditions applicable to: equity definition and calculations of risk-weighted assets (Pillar 1), the issuance of hybrid capital instruments and subordinated bonds, the criteria for determining additional equity requirements for banks with deficiencies identified in the supervisory process (Pillar 2), requirements on disclosures to the market (Pillar 3), and definitions for the determination of capital buffers (countercyclical and conservation), and additional requirements to which banks defined as systemically important (systemic buffer) may be subject, among others.

As at December 1, 2021, in accordance with the implementation schedule of the CMF and the regulatory convergence process towards the Basel III standards, the new determination of the calculation of Risk-Weighted Assets (RWA) became effective, as described in the following regulations; Chapter 21-6 of the RAN for Credit Risk Weighted Assets, Chapter 21-7 of the RAN for Market Risk Weighted Assets and Chapter 21-8 of the RAN for Operational Risk Weighted Assets.

In March 2025, the second annual Pillar 3 report was issued, which was published on the Bank's website, in accordance with the requirements of Chapter 21-20 of the RAN, which refers to market discipline and financial transparency through disclosing significant and timely information, which allows keeping the different market players informed and allows information users to perform a better assessment of each entity's position, by being aware of the risk profile of the different local banking institutions, their position and capital structure in a unique format, thereby decreasing information mismatch.

Additionally, in April 2025, the IAPE was delivered, such report is intended to perform a self-assessment process (Pillar 2), which ensures that banks keep a capital level that is in accordance with their risk profile and foster development and use of appropriate processes for monitoring and managing the risks they face.

Capital requirements

In accordance with the General Banking Law, the Bank must maintain minimum effective equity to risk-weighted consolidated assets ratio of 8%, net of allowances required, and a minimum basic capital ratio of 4.5% over risk-weighted assets, 6% of basic capital plus AT1 bonds, and 3% on total consolidated assets, net of allowances required. In addition, and in accordance with the regulatory implementation schedule for such law, capital buffers such as the conservation buffer, the systemically important buffer, the countercyclical buffer and/or Pillar 2 capital charges must be complied with.

For these purposes, the Bank has applied the provisions of Chapter 21-1 of the RAN "Equity for legal and regulatory purposes" of the Updated Compilation of Standards (RAN). Accordingly, effective equity is determined based on capital and reserves or basic capital with the following adjustments:

- a) Adding bonds with no maturity and/or preference shares that meet the requirements and conditions contained in Chapter 21-2 of the RAN, if any.
- b) Adding subordinated bonds that meet the requirements established in Chapter 21-3 of the RAN with a limit of 50% of the Basic Capital.
- c) Additional allowances are added with a limit of 1.25% of credit risk weighted assets.

Additionally, in May 2023, the Banco Central informed that its Board decided to activate the Countercyclical Capital Buffer (RCC) of 0.5% of risk-weighted assets, which became effective in May 2024.

Note that, with respect to the equity adjustments described in Chapter 21-1 of the RAN, in December 2025, the percentage of recognition of adjustments was increased to 100%, in accordance with the standard's implementation schedule.

In March 2025, the CMF reported that Scotiabank maintains its rating as a systemically important bank, confirming the 1.25% systemic buffer already required from the Bank, which, as of December 2025, is required at 100% in accordance with the Basel III implementation schedule in Chile.

Finally, following the supervisory review and evaluation process conducted by the CMF, Scotiabank Chile was informed of the resolution adopted by the Board regarding additional minimum regulatory capital requirements and, on January 16, 2026, the Pillar II requirement at the consolidated level was reduced from 0.25% required during 2025, to 0% effective from June 2026. In the event that capital requirements become applicable again under this concept, at least 56.3% must be met with Common Equity Tier 1 (CET1) capital, and the remainder with other capital instruments (AT1 or Tier 2). This additional requirement will be evaluated annually through the supervisory review process.

It should be noted that this decision is based on the evolution of the regulatory Δ EVE regulatory metric, which reflects a reduction in the level of risk and a strengthening of the capital base, as well as on the adequate management actions conducted by the Bank over risks not defined as Pillar I risks.

Minimum capital requirements of the Bank as at December 31, 2025 under the Basel III guidelines

As at December 2025 in accordance with the transitional provisions applicable to the systemic charge, 1.5% the conservation buffer, 0.25% of the Pillar 2 charge, and 0.5% of countercyclical buffer, the minimum required level of regulatory capital for the Bank is 12.50%.

Concept	CET 1	AT1	Level 1 Capital	T2	Regulatory capital
Pillar I	4.50%	1.50%	6.00%	2.00%	8.00%
Pillar II	0.14%	0.00%	0.14%	0.11%	0.25%
Systemic Charge	1.25%	0.00%	1.25%	0.00%	1.25%
Conservation buffer	2.50%	0.00%	2.50%	0.00%	2.50%
Countercyclical Buffer	0.50%	0.00%	0.50%	0.00%	0.50%
Total	8.89%	1.50%	10.39%	2.11%	12.50%

For comparative purposes, the Bank's minimum capital requirements as at December 31, 2024 under the Basel III guidelines were the following:

Concept	CET 1	AT1	Level 1 Capital	T2	Regulatory capital
Pillar I	4.50%	1.50%	6.00%	2.00%	8.00%
Pillar II	0.14%	0.00%	0.14%	0.11%	0.25%
Systemic Charge	0.94%	0.00%	0.94%	0.00%	0.94%
Conservation buffer	2.50%	0.00%	2.50%	0.00%	2.50%
Countercyclical Buffer	0.50%	0.00%	0.50%	0.00%	0.50%
Total	8.58%	1.50%	10.08%	2.11%	12.19%

Basic capital and effective equity levels at each closing date are detailed as follows:

Total assets, risk-weighted assets and effective equity components under Basel III	Note	Local consolidated 12/31/2025 MCh\$	Local consolidated 12/31/2024 MCh\$
Total assets as per statement of financial position		43,536,434	44,521,374

Additional basic capital required to constitute a countercyclical buffer	q	160,207	160,109
Additional basic capital required from systemically important banks	r	300,388	300,204
Additional capital required to assess the adequacy of effective equity (Pillar 2)	s	80,103	80,054

Notes:

- a) Relates to the value of the investment in subsidiaries that are not consolidated. Applies only in local consolidation when the Bank has subsidiaries abroad, fully deducting its value in assets and CET1.
- b) Relates to the value of the asset items that are discounted from regulatory capital, in accordance with that provided in letter a) of title No.3 of Chapter 21-30 of the RAN.
- c) Relates to the credit equivalents of derivative instruments in accordance with letter b) of title No.3 of Chapter 21-30 of the RAN.
- d) Relates to contingent exposures as provided in letter c) of title No. 3 of Chapter 21-30 of the RAN.
- e) Relates to the assets of the intermediation of financial instruments on its own on behalf of third parties, which are within the Bank's consolidation perimeter, as provided in letter d) of title No.3 of Chapter 21-30 of the RAN.
- f) Relates to credit risk weighted assets, estimated in accordance with Chapter 21-6 of the RAN. If the Bank does not have authorization to apply internal methodologies, it must report field 8.b with zero and add 8.a to field 11.a. If it has an authorization, it must add 8.b in 11.a.
- g) Relates to market risk weighted assets, estimated in accordance with Chapter 21-7 of the RAN.
- h) Relates to operational risk weighted assets, estimated in accordance with Chapter 21-8 of the RAN.
- i) Relates to the non-controlling interest, depending on the level of consolidation, for up to 20% of owners' equity.
- j) Assets related to goodwill.
- k) Relates to the balances of the investment assets in the different business support companies that are not included in consolidation, above 5% of owners' equity.
- l) For CET1 and T2, banks must estimate the equivalent value for each level of capital, as well as that obtained by fully applying Chapter 21-1 of the RAN. Then, the difference between the equivalent value and the full application value must be weighted by the discount factor in force at the reporting date in accordance with the transitional provisions of Chapter 21-1 of the RAN, and reported in this row. For AT1, discounts are applied directly, if any.
- m) Provisions and subordinated bonds allocated to additional tier 1 capital (AT1), as established in Chapter 21-2 of the RAN.
- n) Provisions and subordinated bonds allocated to the equivalent definition of tier 2 capital (T2), as established in Chapter 21-1 of the RAN.
- o) In accordance with the transitional provisions, as at December 1, 2022, solvency requirements will also be made at the local consolidated level, reporting the figures at this level in this column. Banks with no subsidiaries abroad should not fill out these details.
- p) Relates to the additional basic capital (CET1) for the constitution of the conservation buffer, as established in Chapter 21-12 of the RAN.
- q) Relates to the additional basic capital (CET1) for the constitution of the countercyclical buffer, as established in Chapter 21-12 of the RAN.
- r) Relates to the additional basic capital (CET1) for banks qualified as systemic banks, as established in Chapter 21-11 of the RAN.
- s) Relates to the additional capital for the evaluation of the Bank's adequacy of effective equity (Pillar 2), as established in Chapter 21-13 of the RAN.

Information on regulatory capital and capital adequacy indicators

Item No.	Solvency ratios and regulatory compliance ratios under Basel III (as % including two decimals)	Note	Local	Local
			consolidated 12/31/2025 %	consolidated 12/31/2024 %
1	Leverage ratio (T1_I18/T1_I7)		8.82%	8.64%

6	Voluntary (additional) provisions associated with CRWA allocated to Tier 2 Capital (T2) (T1_I26/(T1_I8.a or 8.b))	e	0.40%	0.64%
7	Subordinated bonds allocated to Tier 2 Capital (T2) associated with Common Equity Tier 1 (CET1)	f	29.28%	29.50%
8	Additional Tier 1 Capital (AT1) associated with basic capital (T1_I24/T1_I18)	g	17.06%	0.00%
9	Voluntary (additional provisions) and subordinated bonds associated with RWA allocated to Additional Tier 1 Capital (AT1) ((T1_I19+T1_I20)/T1_I11.b)	h	0.00%	2.17%

Notes:

- a) For leverage, the minimum level is 3% without prejudice to the additional requirements for systemic banks that could be established in accordance with the provisions of Chapter 21-30 of the RAN. For core capital, the Bank must consider a cap of 4.5% of risk-weighted assets (RWA). In addition, and where applicable, the Bank must add the current systemic charge in accordance with the transitional provisions and the Pillar 2 requirement that was defined in this capital level. For new banks that have not paid in capital at UF 400,000, they must add 2% to their minimum requirement in accordance with article 51 of the General Banking Law. This value decreases to 1% if the paid-up capital is above UF 600,000 but less than UF 800,000. For Tier 1 capital, the Bank must consider as minimum requirement a value of 6% and the charge for Pillar 2 that has been defined in this capital level. Lastly, at effective equity level, the Bank must consider 8% of the RWA as minimum requirement. Additional charges for Pillar 2, systemic bank and those indicated in article 51 of the General Banking Law for new banks must be added to this value.
- b) The capital buffer deficit must be estimated in accordance with the provisions of Chapter 21-12 of the RAN. This value defines the restriction on the distribution of dividends if it were positive, in accordance with the provisions of the aforementioned Chapter. For effective equity, the value of the conservation and counter-cyclical buffer in force in accordance with the transitional provisions at the date of the report must be added, the value defined in note a), even when there is a requirement per article 35 bis of the General Banking Law.
- c) If the Bank has an effective equity requirement in force per article 35 bis of the General Banking Law, it must report its value in this cell in accordance with the transitional provisions.
- d) Relates to the solvency rating established in article 61 of the General Banking Law.
- e) Cap of 1.25%, if the bank uses standard methodologies (field T1_8a), or 0.625% if the bank uses internal methodologies (field T1_8b), in estimating the CRWA.
- f) Subordinated bonds allocated to Tier 2 capital must not exceed 50% of common equity tier 1 (CET1), considering the discounts applied to these instruments in accordance with Chapter 21-1 of the RAN.
- g) Additional Tier 1 (AT1) capital cannot exceed 1/3 of Tier 1 common equity tier (CET1).
- h) Additional provisions and subordinated bonds allocated to AT1 cannot exceed 0.5% of the RWA beginning on December 1, 2022, in accordance with the transitional provisions of Chapter 21-2 of the RAN.
- i) In accordance with the transitional provisions, beginning on December 1, 2022, solvency requirements are also made at the local consolidated level, reporting the figures at this level in this column. Banks with no subsidiaries abroad should not fill out these details.

Note 49 Subsequent events

The Consolidated Financial Statements were approved by the Board of Directors of Scotiabank Chile on February 26, 2026.

On January 16, 2026, the CMF published, through an official communication, an update of the progress of the implementation of Basel III standards, applying the regulation on additional capital requirements under Pillar II. Following the supervisory review and evaluation process conducted by CMF, Scotiabank was informed of the resolution adopted by the Counsel regarding the additional minimum effective equity requirements.

The CMF's decision established that the Pillar II requirement at the consolidated level of 0.25%, fully required beginning in June 2025, decreases to 0% starting in June 2026. Noted that at least 56.3% of the 0.25% required through the present date must be met with common equity Tier 1 (CET1), and the remainder with other capital instruments (AT1 o Tier2), and that such additional requirements will be evaluated annually through the supervisory review process.

Also, note that this decision is based on the evolution of the regulatory Δ EVE regulatory metric, which reflects a reduction in the level of risk and strengthening of the capital base, as well as the adequate management actions conducted by the Bank over risk not defined as Pillar I risks.

The following table shows the minimum CET1 and Total Capital requirements at the consolidated level applicable as of December 31, 2025 and beginning in June 2026, as well as Scotiabank's ratios as of December 31, 2025:

	Minimum requirements		Ratio as of
	December, 2025	December, 2026	12/31/2025
CET 1 (CET1/APR)	8.89%	8.75%	11.53%
Total Capital (PE/APR)	12.50%	12.25%	17.18%

As shown in the table, Scotiabank maintains sufficient buffers above the required levels for both CET1 and Total Capital.

In the view of the Bank's Management and its subsidiaries, between January 1, 2026 and the date of issuance of these Consolidated Financial Statements, no subsequent events have occurred that could have a significant effect on the figures presented herein or on the economic and financial position of the Bank and its subsidiaries.
